Finance

Compute finished FY22 with a record breaking Q4!

Revenue

Profit rate expansion

Services Orders¹

Compute continues to be a pillar of HPE

¹Excluding Russia and Belarus ²Percent of HPE net revenue Q422 (\$8B) ³ Percent of HPE operating profit Q422 (\$1B)

Compute Delivered Stellar Performance in Q4...Again!

Revenue

\$x,xxx million

y/y, ↑ ↑ q/q

Operating profit

\$xxx million

% of revenue pts y/y

Revenue

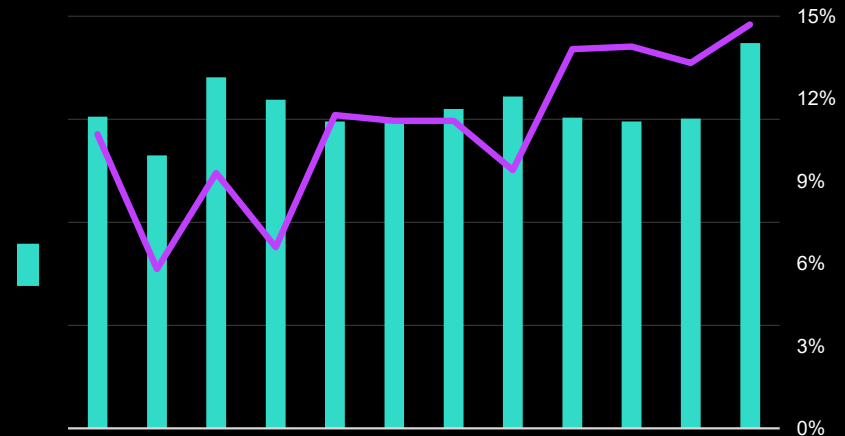

Americas	xx%
EMEA	xx%
Asia Pacific	xx%

Overview

- Revenue xx due to improved supply, disciplined pricing, and double-digit revenue growth across all product categories
- Operating profit margins of xx, up xx pts y/y due to strategic pricing actions and favorable product volume impact
- Services xx pts y/y margin rate expansion driven by lower cost of delivery as a percentage of revenue
- GreenLake orders xx% y/y in Q4

\$billions

Compute Delivered Revenue Growth & Profit Expansion in FY22

Revenue

\$xx billion

↑ % y/y

Operating profit

\$xx billion

x% of revenue ↑ pts y/y

Revenue

Americas	35%
EMEA	38%
Asia Pacific	26%

Overview

- Revenue growth of xx% y/y (A\$) with positive signs of supply improvement reflecting a strong year-end (Q4) close
- Backlog continues to be at an elevated level
- Operating profit margin of xx%, up xx pts y/y despite supply constraints and the Russia/Ukraine conflict
- GreenLake orders xx% y/y

"On the servers, an HPE GreenLake for Compute Ops Management subscription provides a cloud-native management console. This increases operational efficiency by securely *automating* the process to access, monitor and manage servers. This is regardless of where the compute environment lives." **Claudia Adrien, Channel Futures**

COMPUTE

QUALITY IN ACTION AWARD

**VLAD CATOI, COLE VAGTBORG, ELIDA BRUNER GOMEZ
AND PATRICK SCHEEL**

We before I

Enabled world-wide L10 system factories to recover from a vendor mistake to minimize business impact on 4Q. 2,500 P416ie-m PCAs had incorrect programmed FRU and SeeProm images. This team executed the re-programming of these PCAs in the L10 locations. They defined the tools and procedures for programming, and the documentation for the local factory personnel. A 3-D printed ICT-like fixture was designed for both components and sent to the L10 locations to update the affected PCAs on time.

COMPUTE

QUALITY IN ACTION AWARD

**JAY CANLAS, ANDREW ELISAVETSKY, JULIA FISHER AND
CHRIS POWELL AND CHRIS BRADLEY**

Thinking Differently

Developed innovative strategy for delivering virtual Gen11 training for Pointnext Masters to ensure launch readiness. Coordinated, recorded and broadcast over 40 independent sessions focused on technologies and platforms as part of the Gen11 programs. Delivered live virtual training to over 200 attendees across three geographies.

QUALITY IN ACTION AWARD

FEROZ M. ITAGI

Push for Better

Championed Automation across the iLO Test Organization through FY22 enabling effort and cycle time reduction across iLO 4, 5, 6 and RL 300 releases, an efficiency increase of over 80%. He drove 'SHIFT LEFT' effort for Factory through Automation. His efforts increased test coverage and effectiveness of the Build Acceptance Automation suite by 50%.

P, CHANDRASEKHAR

Accelerating what's next

Yes, we can!

Led iLO7 software architecture with many firsts such as Embedded Linux Kernel, Yocto, Nginix with innovation, proof of concepts and a modular approach. The entire iLO7 stack is built with completely new Uboot, Linux kernel, Drivers to run on the new ASIC for next generation server platform. iLO7 (Cornerstone) successfully booted on Trinity Gen11 AMD server with BIOS→ Reduces Gen12 HW dependency for functional validation.
