OVERVIEW

Axicon Trading, where innovation meets excellence in aesthetic medical solutions. We are dedicated to providing cutting-edge equipment for aesthetic clinics, empowering professionals to deliver exceptional results and elevate patient experiences.

Our comprehensive product range is designed to meet the diverse needs of the aesthetic industry, ensuring that clinics can offer the latest in non-invasive and minimally invasive treatments.

At Axicon Trading, we understand that exceptional after-sale service is as crucial as the quality of our products. That's why we are committed to providing unparalleled service support, along clinical and technical training tailored to your specific needs. Our experienced team is here to assist you every step of the way, ensuring you have the knowledge and skills to maximize the potential of our equipment.

With a focus on innovation, quality, and customer satisfaction, Axicon Trading is your trusted partner in advancing aesthetic medicine. Explore our catalogue to discover how we can help your clinic thrive.

EMAX PRO 3000 LASER HAIR REMOVAL

A groundbreaking laser hair removal device that redefines precision, power, and cooling performance. Equipped with four unique wavelengths, 6000W power, and an advanced cooling system that operates at an impressive -22°C , this machine ensures a safe, effective, and comfortable experience for both clients and professionals.

State-of-the-art cooling technology at an -22°C for maximum comfort and safety

3 Technologies
All in one laser solution

Key Benefits

- Suitable for all skin types I to VI
- Ultimate power for all hair types
- Safe even on tanned skin
- Fast results
- Shorter sessions
- Light hand piece
- Low maintenance

Derma Sculpt

12D HIFU

The Hifu 12D technology is a revolutionary advancement in non-invasive skin lifting and tightening. This cutting-edge device delivers precise energy to targeted skin layers, stimulating collagen production and promoting natural skin rejuvenation.

Non-invasive

Key Benefits

- Newest technology with 12 lines of energy
- Superior results
- Non-invasive
- Minimal discomfort
- No downtime
- Safe Seven free cartridges
- Affordable Consumables

360 Vmax

1.5mm and 3.0mm
(40000 shots/cartridge)

Facial

-Single line cartridges:
1.5mm, 2.0mm, 3.0mm
(20,000shots/cartridge)
-12 lines cartridges:
3.0mm, 4.5mm, 6.0mm, 9.0mm, 12mm
(20,000shots/cartridge)

Body Lipo

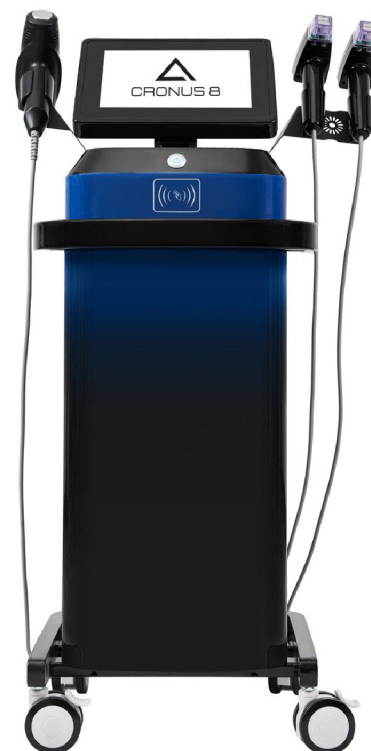

-24 lines cartridges:
8.0mm, 13mm
(600shots/cartridge)

Cronus8

RADIO-FREQUENCY MICRONEEDLING

Cronus8, the latest innovation in skin rejuvenation technology, combines fractional microneedling with radiofrequency (RF) energy. Cronus8 offers patients a highly effective, minimally invasive solution for comprehensive skin rejuvenation. Cronus8 delivers superior outcomes with a technology that aligns with the highest standards of care as to stay at the forefront of aesthetic medicine.

Juventas

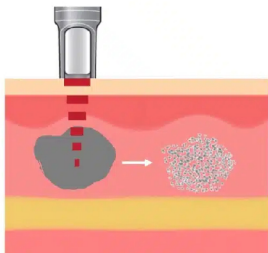

PICOSECOND LASER

A state-of-the-art picosecond laser system employs cutting-edge technology to emit ultra-short pulses of light within picosecond durations. Its swift switching capacity enables the delivery of high-intensity energy, rendering it exceptionally effective across a spectrum of applications, notably within medical and aesthetic domains. Known for its versatility and effectiveness in aesthetic treatments. It delivers ultra-short laser pulses to target skin imperfections with precision, minimizing damage to surrounding tissues.

Pico Laser

Only ultrashort pulse duration triggers photomechanical effect.

Reduced pain
Fast healing

HANDPIECES

Main Feature: Precision Head
Customizable Range: 2 to 10mm, adjustable in 1mm increments
Modes Available:
Picosecond (1064nm, 532nm)
Long Pulse (1064nm),
Neo Innovation (1064nm, 532nm)

Optional Cellular Handpiece:
Circular Shape, Diameter: 14mm
Modes Available:
Picosecond (1064nm, 532nm)
Neo Innovation (1064nm, 532nm)

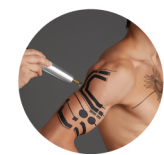

Optional Fractional Handpiece:
Contains 49 fractional dots within a 7x7mm area
Modes Available:
Picosecond (1064nm, 532nm)
Neo Innovation (1064nm, 532nm)

Optional 650 Dye Handpiece:
Operates at a repetition rate of 1Hz
Spot size: 2mm
Modes Available:
Picosecond 532
Neo Innovation 532

Optional 585 Dye Handpiece:
Operates at a repetition rate of 1Hz
Spot size: 2mm
Modes Available:
Picosecond 532
Neo Innovation 532

Tattoo removal

Pigmented lesions treatment

Wound scars reduction

Whitening of sensitive areas

Carbon peeling

Vascular lesions treatment

Hyperpigmentation & sun damage repair

Freckle and age spot treatment

HydraGlo

VACUUM & WATER VORTEX

A non-invasive, transformative skin treatment designed to give the best skin texture. Every Hydrafacial session utilizes advanced technology to deeply cleanse, extract, and hydrate the skin, with options for further customization through personalized boosters, skin firming, and lymphatic drainage to target specific skin concerns. Hydrafacial treatments are suitable for all skin types, tones, ages, and genders. Even those with the most sensitive skin can comfortably tolerate a Hydrafacial session.

Hydrafacial Steps

Cleansing
& Exfoliation

Unclogging
& Extraction

Hydration

- Advanced skin rejuvenation
- Deep cleansing and exfoliation
- Hydration and nourishment
- Minimized pores and blackheads
- Improved skin texture and tone
- Minimization of fine lines and wrinkles

Key Benefits

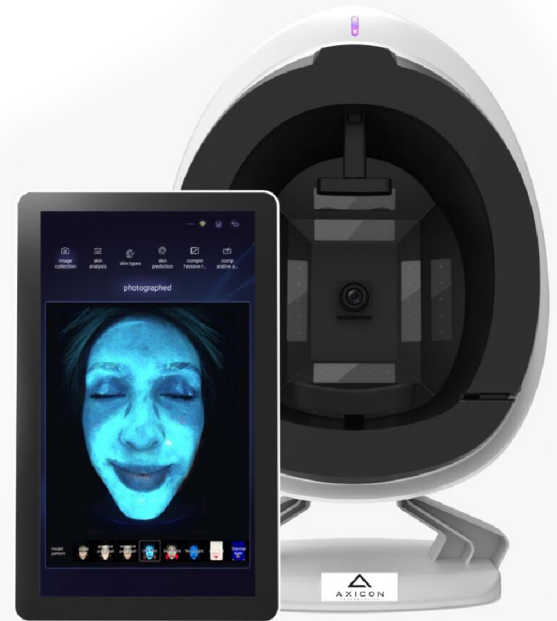

- Gentle and non-irritating
- Immediate and lasting results
- Customizable for individual skin needs
- Multi-functionality
- Zero downtime
- Affordable consumables

FACEOFF

SKIN ANALYZER

A comprehensive skin analysis tool, providing a detailed assessment of various skin parameters including hydration, texture, pigmentation, elasticity, and pore size to name a few. Designed for aesthetic clinics and dermatology practices, this device utilizes high-resolution imaging technology to capture in-depth visuals of the skin, enabling professionals to create personalized skincare and treatment plans. Compact and user-friendly, it integrates seamlessly into any practice, offering clients a truly customized approach to skin health and aesthetic care.

- Identify Skin Type and Conditions
- Measure Hydration Levels
- Assess Skin Aging and Wrinkles
- Analyze Oil and Sebaceous Gland Activity
- Analyze Pore Size and Distribution
- Detect Pigmentation and Sun Damage

Parameters

Stains: Identifies underlying skin discoloration and pigmentation.

UV Spots: Detects UV damage that is not visible to the naked eye.

Pigment: Maps pigmentation irregularities.

Sebum: Assesses sebum production.

Wrinkle: Measures depth and formation of wrinkles.

Pores: Analyzes pore size and distribution.

Acne: Evaluates acne severity and potential triggers.

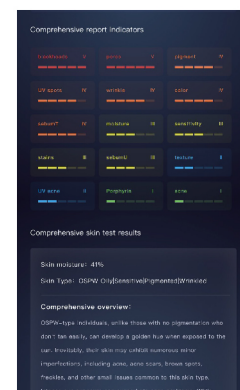

Color: Assesses skin tone uniformity.

Sensitivity: Determines skin sensitivity levels.

Porphyryn: Identifies porphyrins (bacterial markers) on the skin, helping to target acne-causing bacteria.

Predict: Offers a predictive analysis of potential skin issues.

Patients can access their report through a QR code

Track Treatment

Progress: Allows for side-by-side comparisons over time, helping patients and practitioners monitor treatment efficacy and skin improvement.

SPORTSX

PEMF THERAPY

Enter the realm of slenderizing and physique sculpting with SPORTSX, the cutting-edge innovation designed to enhance blood flow, elevate metabolic function, and guarantee a svelte physique. Harness the potent magnetic force of PEMF (Pulsed Electromagnetic Field) technology, which selectively targets neurons to fragmentize fat and cellulite nestled within skin, muscle, and blood tissues.

HANDPIECES

For Belly, Buttocks, and Thighs. (2 pcs)

For Urology, gynecology and Postpartum repair. (Optional)

For Thighs, arms and Legs. (2 pcs) (Optional)

Key Benefits

- Non-invasive
- Safe
- No downtime
- Painless
- No consumables

Green Diamond LOW LEVEL LASER ENERGY

Green Diamond utilizes 532nm green laser beams, which are monochromatic, collimated, and coherent. These lasers create temporary pores in fat cells, allowing fatty liquids to escape, which are then naturally flushed out through the lymphatic system. Unlike traditional methods like fat freezing that focus on eliminating fat cells, Green Diamond laser trains fat cells to shrink and behave like healthy cells, promoting positive hormone responses.

Short treatment duration

Reduces overall body circumference

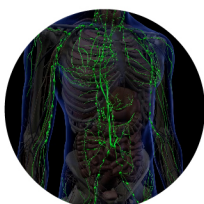

Reduces stubborn fats

Cellulite treatment

Consistent results across skin types

Improved lymphatic drainage & circulation

Targeted fat reduction

Zero downtime

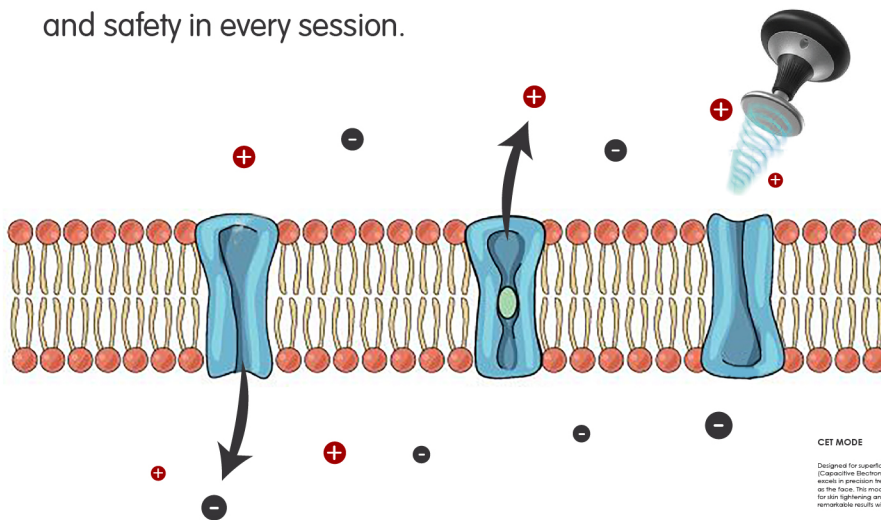

Safe & Painless

Aegle I

RADIO FREQUENCY

Aegle I is a non-invasive radiofrequency therapy that offers a range of therapeutic and aesthetic benefits by utilizing a specific frequency of 448 kHz to stimulate the body's natural healing processes. By integrating state-of-the-art technology, Aegle I sets a new standard in wellness and beauty. This specialized physiotherapy program aimed at preventing and treating visible and histological signs of aging. It works by rebalancing cellular metabolism to promote healthier tissues with a more youthful appearance. Aegle I ensures maximum efficacy and safety in every session.

CET MODE

Designed for superficial tissues, the CET (Capacitive Electronic Transfer) working mode excels in precision treatments for small areas such as the face. This mode is exceptionally effective for skin tightening and anti-aging, delivering remarkable results with unmatched accuracy.

RET MODE

Perfect for thicker, fatty, and fibrotic tissues, the RET (Resistive Electronic Transfer) working mode is ideal for larger treatment areas. It penetrates deeply into tissues, targeting subcutaneous areas for comprehensive rejuvenation.

- Enhanced tissue regeneration for both face & body
- Pain relief and inflammation reduction
- Skin tightening and rejuvenation
- Body contouring
- Accelerated healing post-surgery
- Cellulite reduction
- Improved microcirculation

Key Benefits

- Non-invasive
- Painless
- Safe
- Zero Downtime
- No consumables

Contourwave is used for skin rejuvenation, body contouring, and lymphatic drainage. It works by delivering gentle vibrations to targeted areas of the body or face, helping improve the appearance and health of the skin. Immerse yourself in the pinnacle of rejuvenation with cutting-edge micro-vibration compression, achieved through a sophisticated 360° rotation of the inner ball within the roller. Experience the refined sensation of "pulsation compression," as the rotating ball precisely applies pressure to the skin, creating a continuous push-pull dynamic for unparalleled results.

- Lymphatic drainage
- Cellulite reduction
- Skin tightening and firming
- Enhanced blood circulation
- Improved product absorption
- Muscle relaxation and toning
- Pain relief and relaxation

Key Benefits

- Versatile area application
- Red LED light for skin rejuvenation
- Non-invasive
- Zero downtime
