Work Experiences

UX & UI Designer
Zaber Technologies
Vanocuver, BC
Jun 2022 – Present

- Led UX/UI design for complex software applications, simplifying workflows and improving usability for beginner users.
- Built wireframes, user flows, and high-fidelity prototypes to guide development and maintain consistent UI patterns.
- Worked closely with developers in agile sprints to ensure designs matched technical requirements and reduced rework.
- Owned the UX/UI redesign of the website, improving navigation, content layout, and accessibility.
- Partnered with stakeholders to turn business goals into user-centered, scalable design solutions.
- Supported the Marketing team by designing print and digital collateral, including brochures and tearaway cards, while maintaining consistent branding

UX & UI Designer
D3 Security
Vancouver, BC
Oct 2017 – Apr 2020

- Took ownership of design solutions from concept through implementation, working closely with two other UX/UI designers, PMs/BAs, and engineers to define problems, set goals, and deliver user-centered designs.
- Collaborated within a highly coordinated design team with daily morning scrum meetings and transparent task tracking to align priorities and streamline hand-offs.
- Established and maintained a design system for a cybersecurity platform while simultaneously designing and building the product UI, ensuring consistency across components and screens.
