

Scalp HydraFacial

TREATMENT

Caring For Hair Trichology Clinic | 5 Upper Wimpole Street| London, W1G 6BP

www.caringforhair.org

What is a Scalp HydraFacial?

It is a non-invasive, gentle deep-cleansing, exfoliating, and hydrating treatment designed specifically for the scalp. It helps remove dead skin cells, unclog hair follicles, eliminates excess oil, and nourishes the scalp with powerful serums, improving overall scalp health.

It promotes a healthy scalp environment, essential for strong and healthy hair growth.

WHO IS IT FOR?

It is recommended for all hair types and is for anyone looking to improve scalp health.

A consultation will be conducted to ensure that treatment is suitable for you.

WHAT CAN A SCALP HYDRAFACIAL DO FOR YOU?

Deeply Cleanses: Removes dirt, excess oil, product buildup, and dead skin cells that can clog hair follicles.

Gentle Exfoliation: Helps to remove impurities with a gentle suction, revealing a fresher scalp surface.

Intense Hydration: Infuses the scalp with intense moisturisers, combating dryness and flakiness.

Promotes Circulation: The gentle massage and product application can stimulate blood flow to the scalp, nourishing hair follicles.

Who cannot have a Scalp Hydrafacial?

The treatment is not suitable if you have any open wounds or pus-filled bumps, an infection or an active scalp condition (e.g. psoriasis, eczema flare-ups) or have had recent scalp surgery, or you have severe sunburn on your scalp.

LOW-LEVEL LASER LIGHT THERAPY (OPTIONAL)

The Scalp Hydrafacial treatment can be followed up with a session with low level laser therapy. The system uses laser energy to help to increase blood circulation to stimulate hair follicles and It can also help to reduce inflammation.

The main purpose is to stimulate hair growth and enhance scalp health.

This is an additional service, so if you are interested, please enquire if this will be suitable for you and also for pricing.
