For gym set up we may need an entry way into the gym that can be used as a runway. The door can be where the arrows are on <u>either side</u> of the gym.

150 feet

40 feet

PERFORMANCE AREA

speakers   sound system / rider area   speakers
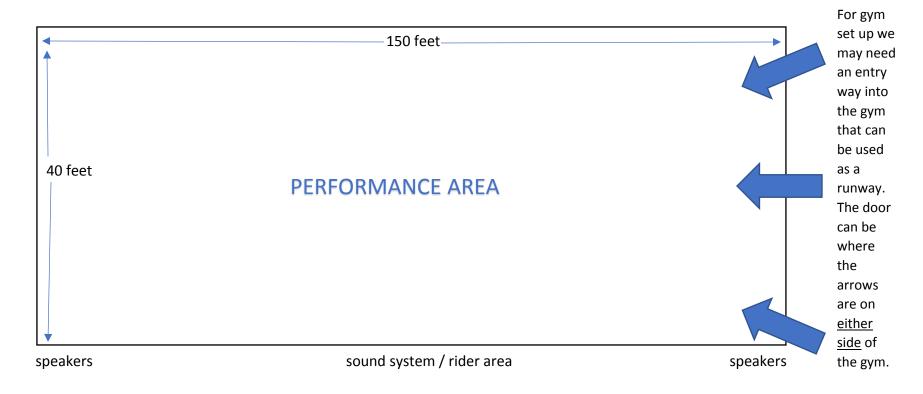

*This set up can be modified if needed, however, this is the best viewing angle for the show. If you do not have correct dimensions, please contact us for other options.

RAMP SHOW REQUIREMENTS LIST

- A minimum performance area of 40' x 150'
- A minimum ceiling height of 20'
- A flat, level, hard surface, free of dust and debris
- 110V outlet (standard) within 100' of the performance area

If you do not meet any of these requirements, please contact WWBMX as soon as possible to discuss alternatives.

RAMP SHOW SET UP AND TEAR DOWN

On the day of the show, the riders will arrive approximately 1.5 hours prior to the show start time to introduce themselves, get set up and warm up. So, please let us know if the performance area is not available 1.5 hours prior to start time.

The school ramp show lasts about 40 minutes (including the message and question and answer session).

After the show is finished (unless you've added on an autograph session) the riders will start to break down the equipment. This typically takes about 30 minutes. Also, any final balances are due at this time (unless otherwise arranges, i.e. purchase orders).
