

# My Mart- Admin

Admin website to manage “My Mart” customer website

# Overview

## Objective

To design a admin user interface for Admin to manage the customer 'My Mart' website. The admin will be able to-

- Login
- View dashboard
- Manage categories
- Manage products
- Manage orders
- Manage profile

## My role

I have taken the responsibility as a UX and UI designer. This project involved constant interaction with my mentor from stakeholder interview to low fidelity mock up (wireframe) to Visual design.

# Business needs

» Stakeholders interview

## Questions

- What will admin be able to manage through admin website?
- What content admin should be able to glance in dashboard screen?
- What are the important CTA's in product, category & order screens?
- What are the important features that need to be implemented in admin website?
- Will admin add or remove products and categories through this site?
- Should admin have the option to hide products or categories temporarily?
- What are some important content or functionality that should be present under order?
- Will admin have option to update the status of order or delete the product?

# Outline of scope

## Content requirements-

Content (text, images, videos) to be added

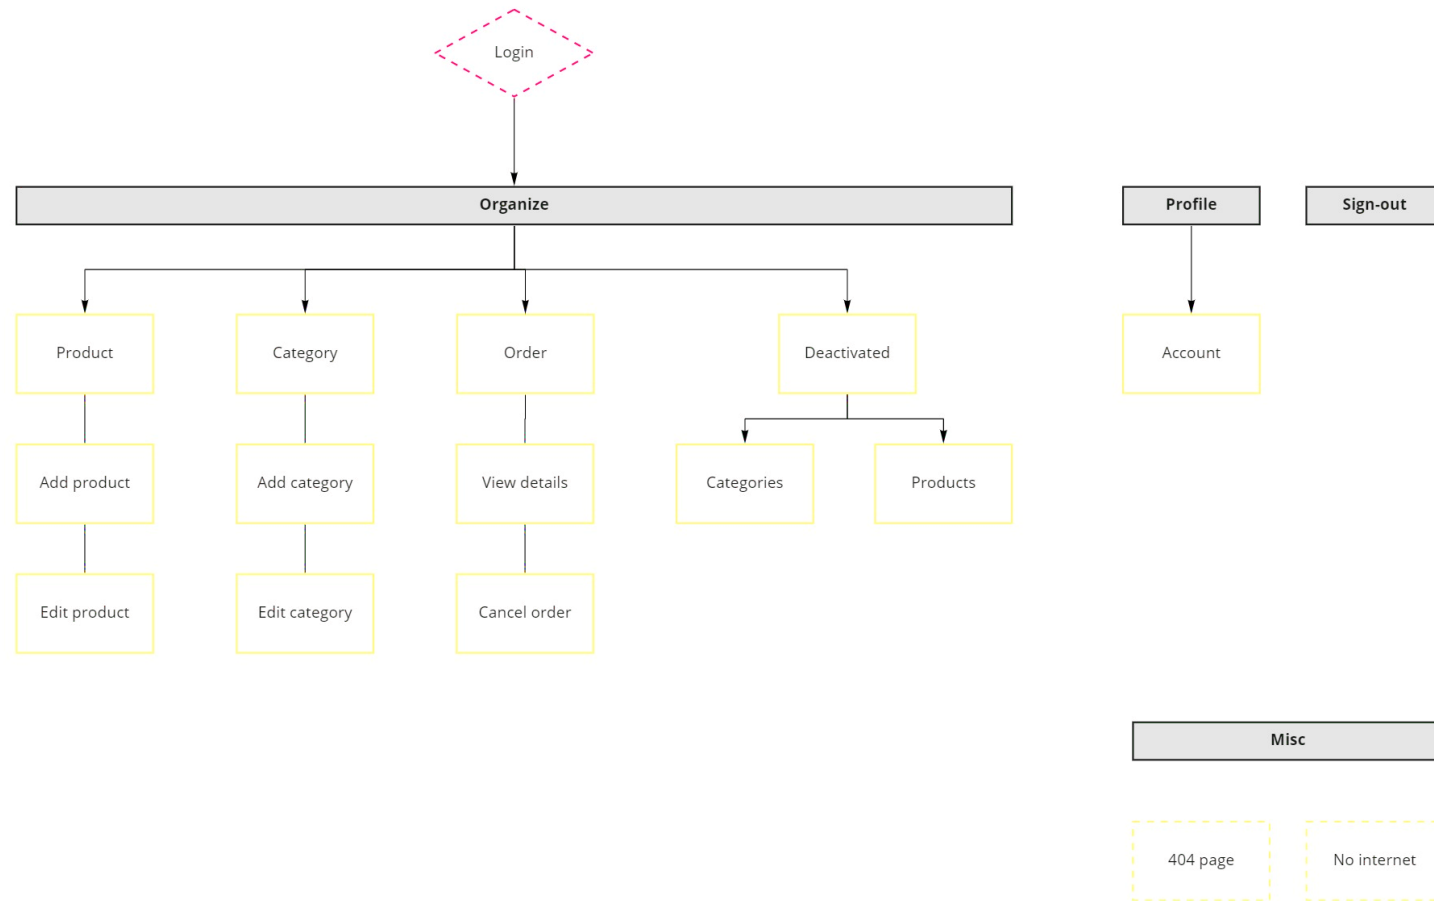

- Overview of **details on total orders** in dashboard
- View **recently added categories & products** in dashboard.  
Also view **recently placed orders**
- View the **list of products** with image, name, availability (left out qty.) & the price of that item in product home screen
- View the **list of categories** with image, name, no. of products under that category in category home screen
- View the **list of orders** with order ID, Customer name, order date, price & status of the order in order home screen
- In **orders detail** screen, display customer name, contact details, delivery address, CTA to update status, billing details & list of ordered items

## Functional requirements-

Systems that will allow the user accomplish task

- **Login** and **sign-out** to & from website
- **Add, remove, deactivate or edit products** from customer website.
- **Add, remove, deactivate or edit category** from customer website.
- **Update status of the order** processing, shipping, delivered or even to cancel
- **Filter products and categories** based on it's type & active-inactive status
- **Sort orders** based on recent or status of order
