

# Timex App

Designed to meet the user needs

# Overview

## Objective

With the increase in accessibility of internet & mobile devices, shopping online has become more accessible. With this potential, Timex is looking at enhancing the users experience of buying watch online by focusing on the user needs, pain points and also analyzing the competitors in the market. This is achieved by enhancing the website experience according to user needs and also creating a Timex app to bring more accessibility & harnessing the features that can be availed through a mobile device.

## My role

Being a imaginary project, I have taken the responsibility as a stakeholder, UX and UI designer.

# Problem definition

## **Problem definition (User needs & pain points)**

While buying a watch online, there can be many pain points for a user. Some of them are-

- Lack of in-hand experience to understand size & fit, durability & color
- Return & exchange policy
- Difficulty in understanding if the product is good or bad due to lack to customer rating & review
- Lack of features like book appointment, pick up at store, tracking nearby stores & service centers
- Lack of corporate page for bulk ordering

## **Use cases**

- Self purchase
- Gifting to others
- Corporate purchase (gifting their employees)

# User research

» Competitive Analysis

## Competitors

**TIMEX**  **TITAN**

**FOSSIL** **SONATA** **CASIO**

  
**fastrack**

### Strengths-

- **Website features-** Online shopping website, chat support feature, better preview of watch with zoom view and login with google or social media.
- **Product & services-** selling smartwatches and Gifting feature

### Weak points-

- **Website features-** Currency selector feature, customer rating & review, shop by price in primary navigation, compare size & try at hand feature,
- **Product & services-** Corporate page, Ship to other countries, book appointment and pick up at store.
- Lack of dedicated mobile app.

# User research
