

HIGHWAY REPORT

July 3, Thru August 12, 2026

August 20,2026 Meeting

Equipment Maintenance: We had a busy month with repairs. The transmission cooler on 118 started leaking Jason got that all repaired. Then the alternator on 115 stopped charging and the power steering lines started leaking Jason and Rich fixed that problem. Then the pickups went in for inspection and had to have new tires on 111. The rear brakes on 116 needed to replace Jason and Austin repaired the brakes. Hopefully this pattern is behind us.

Road Maintenance: The guys have been very busy. We got our roads oil and chipped Barnaby Meadows, Gorham, Crossett, Dumar, Sandbank and Clinton plus helping out the two villages with their streets. We paved Schapp road and repaired the water break damage to case rd. We have started to get Carmer rd. ready to pave. We have started to sweep up the excess stone on our chipped rds. And making good progress.

Trash Program: The trash program is going along good Fred is making a big difference.

Respectfully Submitted

Jim White

Superintendent Of Highways
