Even after troubleshooting your Shark robot, sometimes a problem may continue. If this is the case, you can try resetting your Shark robot to its factory settings. Here's how to factory reset a Shark robot: To perform a Shark robot factory reset, open the SharkClean app, go to Settings, and select Factory Reset. The Shark robot will restore itself to its factory settings. Alternatively, you can reboot a Shark robot by turning off the POWER switch on the side of the robot, wait 10 seconds, then switch it back on. Like any other digital devices, a Shark robot may deal with excessive data in its memory. A Shark robot may also encounter Wi-Fi connectivity issues as well. To fix most of these issues, you can choose to perform Shark robot factory reset or reboot it. There are two ways on how to reset a Shark robot. 1. Factory reset via the SharkClean app The best way to factory reset a Shark robot is via the SharkClean app. In fact, this is the most recommended way to factory reset your Shark robot. This reset procedure can be done on all Shark robots, including the Shark EZ, Shark IQ, Shark ION, and Shark Ai models. You can only do the Shark robot factory reset from the SharkClean app only if the robot has been connected to your Wi-Fi network. If you have not done it, here's the how-to guide. Please note, however, this process will remove the Shark robot from the SharkClean app, as well as any saved data from the cloud. Here are the exact steps on how to factory reset a Shark robot: Open the SharkClean app. Go to Settings then tap on the Factory Reset option. The Shark robot will restore itself to its factory settings. (The procedure can take a few minutes) 2. Manual reboot on the Shark robot Alternatively, you can also do a reboot manually. If you somehow cannot connect to a Wi-Fi network, performing a manual reboot can get the job done. Fortunately, resetting a Shark robot vacuum is very easy and does not wipe all of the data. To perform the manual Shark reboot, follow these steps: Locate the POWER switch on the side of the Shark robot. Switch the POWER switch to OFF. Wait for at least 10 seconds before turning the Shark robot back on. The Shark robot has been rebooted. Other Shark robot helpful guides Without our step-by-step guide, you will be able to effortlessly factory reset Shark robot vacuum, ION, and cordless vacuum in a few seconds. Shark vacuum is one of the most preferred robot vacuum cleaners available in the market. It is because of its lightweight, powerful suction ability, and hassle-free cleaning abilities. However, there are times when such devices need a reboot to function. Resetting the Shark vacuum will clear all the software settings so that you may start it as a new one. Before resetting the Shark vacuum, remember that it will erase all the settings, including the Wi-Fi passwords, app settings, data stored on the cloud, maps and schedules, and any updates installed on the device.

Resetting Shark vacuum to factory settings is easy. Here are the quick steps: Go to the SharkClean app and open the settings. Select factory reset. The Shark Vacuum will reset to default settings. There is another method to restore your Shark vacuum to factory settings manually: Turn off the power switch on the robot. Turn it on again after 10 seconds. Your Shark vacuum will reset.

How to Reset Shark ION Robot Vacuum There are two methods to factory reset or hard reset the Shark ION. Using the Shark Clean App We recommend using this method. Here is the step-by-step guide: On your mobile device, open the Shark Clean app. Check that the Shark robot and the mobile device are on the same Wi-Fi network. From the settings menu, select factory reset. The reset process will start, and your robot will be set to the default settings in a few minutes. Manual Reboot Here is the step-by-step guide to reset your Shark ION robot vacuum manually: Put your Shark ION robot upside down.

For 10 seconds, press the power button till the power turns off. Now press the power button again after 10 seconds to factory reboot the robot cleaner. The Shark ION will reset to the original settings. The manual reboot method is applicable to most Shark vacuum cleaners, including the Shark AI and Shark IQ. How to Reset Shark Cordless Vacuum If you own a Shark cordless vacuum and want to reset it, here are the two simple steps: Press and hold the power button on your device for 10 to 15 seconds. Release the button and turn on the device again. The Shark cordless vacuum will reset now. If the issue is still there after the resetting, check that the vacuum doesn't have any clogged hoses, dirty filters, or tangled brushes, as all these factors cause the vacuum to malfunction. FAQs Why do you need to reset the Shark robot vacuum? Some glitches on Shark Vacuum cause different problems like connecting to the Wi-Fi network, following the preset schedules or cleaning the mapped areas. Other issues may also include not being able to find the docking location, spinning around, failure to pick the dirt on the floor, etc.

It is easy to resolve these issues with a quick reset. Besides malfunctioning, there can be other reasons for you to reset the Shark Vacuum. For instance, you bought it second-hand from your friend and want to reset it before using it. Or you want to factory reset your Shark vacuum before reselling it. If your Shark robot vacuum randomly starts on its own, you can solve this issue too with the hard reset. Does a Shark vacuum have a reset button? To reset the shark vacuum, you can use the power button. Put in on the on-off position and unplug the vacuum. Clear the hose if necessary. After the vacuum cools, plug it in again. Why is my Shark vacuum not working? Due to the clogged filters or hose, your shark vacuum will stop working. Your vacuum loses the suction if hair or dirt clogs the filter. If you don't clean it regularly, your Shark vacuum will completely stop and won't turn on ever. In addition, you should also check the Shark vacuum fuse location.

Your vacuum can trip the circuit breaker on your wall or blow a fuse, due to which the power cannot turn the machine on. Check if there is any fuse issue and replace it before turning the vacuum machine on.

Why is my Shark vacuum blinking? If your Shark Vacuum blinks on and off, it indicates the wiring issue in the unit's swivel. However, if it is blinking blue, it means the battery is charging on a cordless device. A red blink indicates burnt motor, tangled brush roll, or overheating. To prevent your Shark robot vacuum from blinking or causing any of these problems, it is essential that you clear all the dirty blockages from the vacuum regularly. Also, ensure that you empty the dust canister on regular basis. For a closer inspection, remove all the attachments from the vacuum.

Final Words The Shark robot is a top choice with a long-lasting battery. If there is any glitch in the software or device malfunctioning, hard resetting is a quick suggestion. You may try other troubleshooting options before considering resetting the robot. To prevent your robot from completely turning off, ensure you clean the clogs in the hose or filter

regularly. We hope our quick guide will help you understand the step-by-step procedure of resetting the Shark vacuum. If you still face any issues, contact your customer service team. Share your experience of using the Shark robot in the comments section below. The Shark robot is a great tool for cleaning your floors, but what do you do when the wifi starts acting up?
