

Introducing the Torque Safe Inline Patented Safety Switch for Hydraulic Torque Wrenches

The patented aftermarket safety device designed to prevent hand crush accidents, when using Hydraulic Torque Wrenches

Works with any make or model Hydraulic wrench. Allows the operator to change tools as he wishes and still have optimum safety. Works "in-line" between the Hydraulic Wrench & the Hydraulic Wrench Pump

Make your Hydraulic wrenches safer

Ideal for customers who have a fleet of hydraulic wrenches

Use multiple brands of wrenches

Rent their hydraulic wrenches

The Torque Safe can be used on any hydraulic wrench simply by using the quick connects

- Functions as a lock-out , tag-out system for hydraulic wrenches. The tool cannot be actuated unless & until the tool operator releases the safety lever allowing the tool to actuate

TS-001-INLINE-M

- Patented Safety bypass valve to give tool operator control of the tool
- Developed to significantly reduce or even eliminate dangerous hand crush incidents
- Steel " Reverse Dead Man" Safety Lever for hands free operation
- Positive mechanical lock for lever to ensure safety
- Safety Trigger Guard Handle
- Corrosion resistant finish
- High Strength, Lightweight, Aircraft Quality Aluminum construction

Patented In-Line Safety Switch Assembly
Designed for all Hydraulic Torque Wrenches
Designed & Engineered to prevent hand crush accidents associated with Hydraulic Wrenches

Benefits of an in-line model

1. The torque safe can be used on hydraulic wrench models that do not have a swivel
2. The in-Line model is better adapted for smaller hydraulic wrenches where the tool mounted model can be cumbersome.
3. True hands free reverse dead-man keeps hands off the tool when pressurized
4. In addition to eliminating hand crush accidents, it will reduce the chance of oil injection incidents
4. Safety locks on safe position until released. Acts as a tag-out lock out system for the hydraulic wrench, protecting the operator from accidental actuation of the wrench
5. Versatile and Cost Effective Safety. Makes your Hydraulic Wrenches safer

MEETS ALL EXPECTATIONS

Greatly Reduces the risk of Crush Injuries with hydraulic torque wrenches
Locks out actuation of the wrench until the operator is ready and safe
