

How much is FUNGUS costing you?

Are you circulating mold spores in your grow house environment?

ALL treated surfaces (walls, floors, ceilings) actively attract airborne mold/ fungus spores and pierce on contact!

- Fungi-static protection against Powdery Mildew, Botrytis cinerea (commonly known as "bud rot"), Fusarium, sooty molds, and Pythium
- Reduces airborne contaminants and INCREASES yield
- Provides extended antimicrobial protection to ensure surfaces stay fungus free throughout the grow, harvest, post harvest and shipping process
- Forms invisible shield on treated surfaces to inhibit the growth of fungus, algae and odor causing bacteria for up to 30 days per application
- Environmentally friendly and once cured, product is non-toxic/ non-leaching & hypoallergenic

**Product will not harm plants, but is not approved for direct use on plants*

**FDA approved safe for food contact surfaces*
