

Spraywand and Bottle (compressor not included)

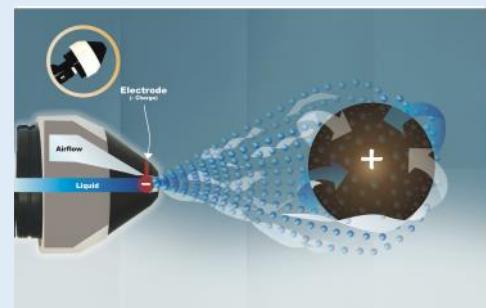

SNB

If you have your own compressor, SNB is a quick and less expensive option to spray electrostatically. This sprayer is ideal for hospitals, schools, hazmat locations, and fire department applications. Two one-liter Nalgene bottles are included, which bottles can be attached on a hip belt, or hand-held, for 15 minutes of spraying time each.

| | |
|-----------------------|--|
| Air Supply | Air compressor not included; Compressor must provide a minimum of 4 CFM |
| Liquid Container Type | 2 Nalgene bottles, 1 Liter each (.26 gal. each) |
| Hose Length | 30 feet, standard |
| Weight | 9 lbs |
| Flow rate | About 1 gal / hour (3.8 L / hour) |
| Spray Range | Up to 8 feet; depending on compressor |
| Additional Options | 45 feet of additional hose can be added to the standard hose length, providing a maximum length of 75 feet Stainless steel connections (optional) |

Electrostatics mean better spray coverage!
