

# Lasting Protection

MediDefense Penetrexx

Active Barrier  
bonds to treated surfaces for long term  
protection between cleanings.

*Highly effective in reducing ATP scores and  
acts as an effective bacteriostatic coating*

- Protective barrier reduces risk of cross contamination on high touch and at risk surfaces
- Environmentally friendly non-toxic /non-leaching antimicrobial technology
- Promotes lower ATP (adenosine triphosphate) scores
- Fast and convenient spray and wipe application
- Cured treatments remain effective in the presence of bleach between disinfections
- Supports accreditation mandates for patient protection
