

- 1 download the KeyScan software file from the site - go to keyscan.com - then click on downloads
- 2 Please check the correct SN from the bottom of your keyboard on the silver sticker so you get the correct download for your unit.
- 3 The software activation code needed is on that page!
- 4 **SAVE** the software to the computer (do not run from website!)
- 5 open the folder where you saved the downloaded file
- 6 **Right click on file name and left click RUN AS ADMINISTRATOR!!!!**
- 7 You might get at various times during the installation process a Microsoft windows' popup window requesting your permission - please permit!
- 8 Follow installation direction of installation wizard.
- 9 Enter software activation code (pay attention to capitals and small letters)
- 10 Finish installation - A text file will open up - please minimize it for later reading
- 11 Connect power adapter
- 12 Read the TXT file.

At any stage you Operating System might ask for permission to continue the driver installation – please allow.

After driver install please calibrate your scanner

- Go to “KeyScan imaging”
- Click on “file”
- Click on “Calibrate Scanner”
- Follow on screen directions

Thank you
