# ATTACHMENTS EZ-HD08 HEAVY DUTY POLE SETTER

## KEY FEATURES

Attaches to skid steers or any other machine equipped with the Universal Quick Tach' mounting system

Rotates 115 degrees to the operators left

The two(2) jaws operate independently and close in sequence for safety and security.

As a stand-alone unit it employs two large clamp cylinders on the base to rotate the tool-head and provide stability and precision

Composed of 1/2 inch Grade 80 material or higher and core welded.

Approved to pull poles.

## EQUIPMENT SPECIFICATION

The clamping is activated by two(2) 3" X 6" clamp cylinders with check valves to ensure safety in case of a hydraulic line break.

Comes standard with rubber lining on the jaws to protect the pole and allow use on any type of pole.

The backing plate is designed to carry the pole above the machine to facilitate the pole transportation and reduce the movement of the pole.

Comes complete with flush faced coupler, spring hose mount and wiring harness

Can be adapted to fit mini-excavators, wheel loaders, telehandlers and backhoes.\*

## PRODUCT DESCRIPTION AND APPLICATIONS

The EZ Spot UR Heavy Duty Pole Setter is designed to handle big, heavy utility poles up to a 45 foot Class 1 pole. With the Heavy Duty Pole Setter the operator can easily pick up a pole on the ground or a trailer and quickly rotate it to a vertical position. This allows the operator to position the pole as desired with minimal effort and with a secure clamp. The "Big Bertha" offers 115 degree rotation and the jaws open to 20.5 inches and closed down to 5 inches.

\*\* The Heavy Duty Pole Setter assures quick and easy loading unloading pulling and setting of 45 foot utility poles. The Heavy Duty Pole Setter eliminates the need for cranes, slings, and runs circles around a Digger Derrick. The rubber lining prevents damage and the sequencing jaws allow for precision setting. The Heavy Duty Pole Setter will also allow you to get to places never thought possible with other equipment which makes it ideal for repairs after a storm and for new construction.

\* Requires specialty bolt-on mount.

\*\* Inserts can be purchased to close jaws down to 0.
