# Waste Management Solutions

A modern kitchen cabinet with a pull-out waste management system. The cabinet is white with a dark grey interior. The pull-out unit is open, revealing a dark grey bin. A pair of white gloves is visible in the top left corner of the bin. The floor is made of dark wood.

# 571 Waste Management System

Made to suit LEGRABOX by Blum

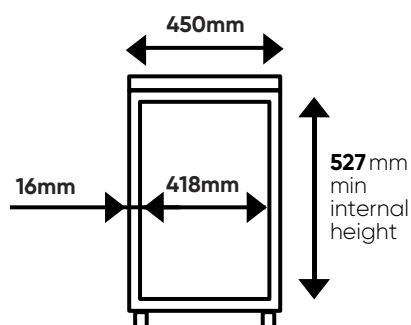

Made in Italy by Gollinucci, the 571 waste management system has been designed to complement the sophisticated, simple and slim design of the LEGRABOX drawer system from Blum. The 571 system is easy to assemble and comes in a range of colours to complement the LEGRABOX program.

The 571 system has been designed to support LEGRABOX C height drawers allowing the additional benefit of tilt adjustment, great for ensuring accurate gaps between cabinet and bench top when accommodating larger fronts.

This ergonomical and modern design is available in two sizes for the cabinet width – 450mm and 600mm. The system comes complete with a lightweight aluminium cover and an internal metal lid to cover the system when closed.

- Suits drawer depth of 500mm

Combi is the new line of modular cutlery trays by Gollinucci. Designed to create the best mix of aesthetics and space, the modules feature a finished edge that allows the cutlery tray to be inserted straight into part of the drawer, giving you the possibility to accessorise the remainder of the drawer however you like.

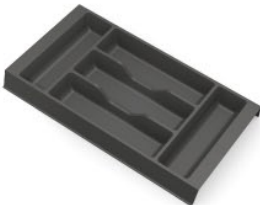

The modules available can create numerous options for a variety of different drawer widths. Combi is made even more functional by the possibility to accessorise the modules with knife holders and chopping boards

# Non-Slip Drawer Liner

## An essential addition to stop items sliding around in drawers.

Non-slip liner is an essential addition to any kitchen to prevent damage to drawers and the items within them. The non-slip liner sits on the inside bottom of the drawer and stops damage from items sliding around. It's also easy to wipe clean, thick and durable, and food safe.

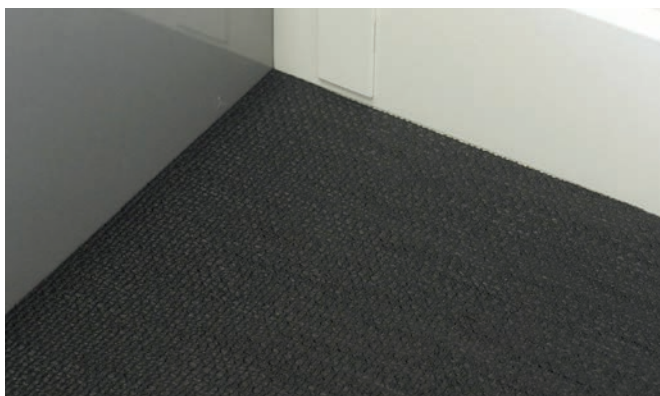

Available in Solid (Blue Grey) or Fibre (Black or Umbra Grey) finish.

## ECHELON RHYTHM WINE RACK

Rhythm wine rack cabinet inserts are a simple way to create a striking feature of your bottle storage. These inserts are designed to slide into built-in joinery. Ideal for custom kitchens and bespoke cabinetry, cellars and wall units.

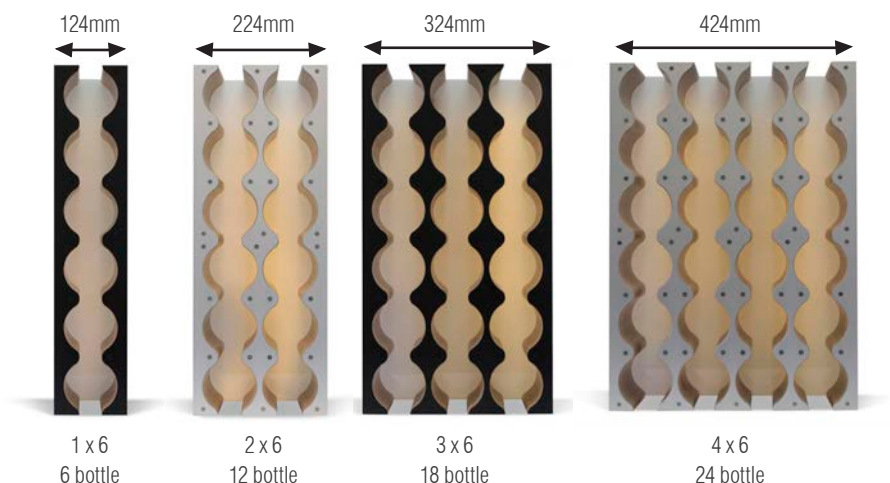

The bottle cavities are formed from wood composite profiles – creating elegant and rhythmic contours. The wood-grain and metal fascia combine to create an intriguing combination of materials – a blend of sculpted and engineered components.

Available in 4 different unit widths and 2 different depths, the Rhythm system allows you to customise the wine rack – choosing from walnut or beech racks and black or alloy front panels.

To order or request a quote, email [specials@lincolnsentry.com.au](mailto:specials@lincolnsentry.com.au) or visit [lincolnsentry.com.au](http://lincolnsentry.com.au) for more information.

### Features:

- Comes in 6 bottle increments
- 4 different unit widths available, all 600mm in height
- Available in depths of either 255mm or 320mm
- Variety of different colours. Choose from either walnut or beech racks and black or alloy front panels
- Back of the unit is white acrylic that is already pilot holed out to fit location points.

Please note: All images shown above feature the beech racks with either the black or alloy front panels.
