

## **TBI BT-101HD**

# **Professional Bluetooth Speaker System**

The BT-101 is our first Bluetooth speaker and represents the state of the art for the category! Existing as a self contained system comprising the state of the art audio technology that propels audio to a new level of appreciation. As a shoulder carried bag containing a wide range wireless speaker complete with external high capacity lithium battery many hours or days of listening pleasure awaits you! Not a confusing gadget full of tricks its is a high resolution playback system capable of room filling listening pleasure. For the first time a portable speaker designed with the room and high-resolution audio in mind. Forget all the talk about bad room acoustics this audio system says bring it on. Placing the BT-101 on the floor out of the way emphasizes the low frequencies while its powerful projection qualities put a floor standing speaker virtually right where you want it. Put it close to a wall and get even more output across the range. Corner placement emphasizes the bass most without annoying boomy sound that is typical of corners. The 360-degree sound radiation has a wonderful direct reflecting characteristic that sounds like stereo 3-D sound coming from just one speaker. You will have fun just locating the best place to put it. You don't have to blast it as fine detail including the bass can be heard even a low listening levels. Treat your ears to all day enjoyment while you move around the room doing your thing never missing the details without destroying your precious ears! Go ahead and crank it up when you need to overcome ambient noise or for a little more pleasure, however don't overdo it for too long to protect those precious lobes!

Connection to phone or other Bluetooth capable device is simple as you just turn the battery switch to the on (—) position. Open the Bluetooth in your settings and look for VHM-314 and select it. You can rename this device in most cases for easy remembering.

The BT-101 also allows an external source to connect via a 3.5mm cable. The high quality female 3.5mm cable can be seen adjacent to speaker power cable for easy connection. The volume must be controlled by the external device for proper volume levels for your use. Connect to TV earphone or variable audio out to improve sound. A 3.5mm cable of proper length for your connection must be purchased with male to male for 3.5mm headphone out connection. An in line extension (male to female) cable with volume control is included if source output jack has a fixed output level.

## BT-101 package contents includes:

- \*MD-1BT professional micro monitor (20w)
- \*6000ma lithium battery (5 position LED status indicator on exposed side of battery)
- \*Battery charging cable
- \*3.5mm in line cable with volume control
