leaders in airport information management

## AVSTATS – AVIATION STATISTICS

Browser based software for managing required aviation statistics for US airports, such as numbers of inbound/outbound flights; operations, passengers, cargo tonnage, and checked baggage. The AvStats portal allows carriers to enter and cross-check data and provide airport operators with a concise operational picture.

### FEATURES

- Direct access to your latest airport statistics
- Tracks passenger, baggage, cargo and flight information
- Integrates with radar data where available
- Supports multiple data types
- Built in data scrubber
- Custom reports easily configured
- Intuitive, adaptable user interface

### BENEFITS

- Comprehensive and trustworthy airport passenger and flight statistics
- Better decision making
- Easily configured for all your needs
- Enhances and improves data workflows
- Guaranteed data integrity
- Straightforward administration
- Increased productivity

## AVSTATS SCREENSHOTS

Monthly statistics and reports

The screenshot displays the AvStats software interface. The main window shows the following details:

- Carrier:** Delta Air Lines, Inc. (DAL)
- Weight Units:** Pounds(Lb)
- Service Category:** Bermuda/Bahamas/Caribbean
- Month:** March

The interface includes a navigation menu on the left with options like Home, AvStats Today, User Profile, Contact AvStats Admin, Queries, and Monthly Statistics. The Monthly Statistics section is expanded to show a tree view of operators and their scheduled flights.

The main data area displays a table of statistics for Buildings, Operators, and Carrier Totals. The table is as follows:

Buildings	In Bound	Out Bound	Remarks
Terminal C (Main Terminal) - Bldg 22	3,875	3,887	
<b>Reported Category Totals :</b>	<b>3,875</b>	<b>3,887</b>	
<b>Reported Operator Totals :</b>	<b>3,875</b>	<b>3,887</b>	
<b>Reported Carrier Totals :</b>	<b>3,875</b>	<b>3,887</b>	

At x-Spatial, we understand the business value of your data and the business processes you need to support. We have worked with airport operators and owners to develop software solutions for large, complex infrastructures. Our solutions build on open standards and open database access to make sure they work easily with any systems you already have in place.
