leaders in airport information management

LMA – LEASELINE MANAGEMENT APPLICATION

An AutoCAD based application for managing floor plan drawings, and can work in conjunction with AviSoft. LMA automates the creation of “lease exhibit” drawings and provides the data used by the Geographic Information System (GIS) component of AviSoft.

FEATURES

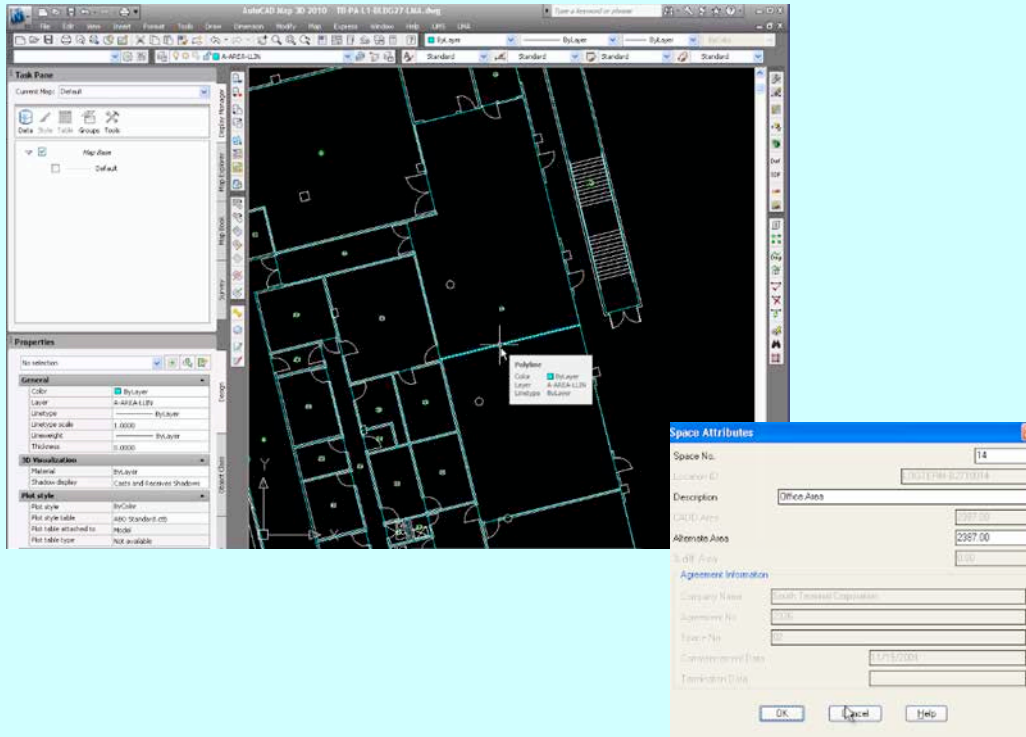

- Direct access to your latest space management
- Updates space allocation and related attributes to match architectural or functional changes
- Enforces enterprise data standards during data creation and updates
- Familiar CAD interface

BENEFITS

- Links and synchronises spatial and non-spatial data
- Ensures trustworthy and consistent spatial data across the enterprise
- Better decision making
- Guaranteed data integrity
- Easily configured for all your needs
- Enhances and improves data workflows
- Straightforward administration
- Increased productivity

Viewing attributes for selected space

At x-Spatial, we understand the business value of your data and the business processes you need to support. We have worked with airport operators and owners to develop software solutions for large, complex infrastructures. Our solutions build on open standards and open database access to make sure they work easily with any systems you already have in place.
