#### INFORMATION AND COMMUNICATION TECHNOLOGY

0417/12

Paper 1 Theory

October/November 2021

2 hours

You must answer on the question paper.

No additional materials are needed.

#### **INSTRUCTIONS**

- Answer all questions.
- Use a black or dark blue pen.
- Write your name, centre number and candidate number in the boxes at the top of the page.
- Write your answer to each question in the space provided.
- Do not use an erasable pen or correction fluid.
- Do not write on any bar codes.
- You may use an HB pencil for any diagrams, graphs or rough working.

#### INFORMATION

- The total mark for this paper is 100.
- The number of marks for each question or part question is shown in brackets [].
- No marks will be awarded for using brand names of software packages or hardware.

This document has 16 pages. Any blank pages are indicated.

1 Web Can 2 Vey toward — Microphane 2 Vey toward — Microphane 3 There are two types of software: system and applications. 	(b)	Modern computers often do not have an optical drive.
		State <b>two</b> ways music can be transferred onto a computer that does not contain an optical drive.
		1 Margered VG floor arme MDD ISDD that is
		1 Transpersed via flash drive HDD SDD that is plugged in via USB port. 2 Transpersed via email attachment, then he was danked
		2 Nansferred via email attachment, then he wer dawlose
		- Sent via blueboth from another denie. [2]
4		te down the most appropriate network device to match the following statements. Your answers uld be different in each part.
	(a)	This network device checks the data packet arriving from one computer and sends the data to a specific computer.
		Switch [1]
	(b)	This network device sends the data packet from a computer to all devices connected to it.
		HVb [1]
	(c)	This network device connects a LAN to the internet.
		Borte/
	(d)	This network device connects one LAN to another with the same protocol.

0417/12/O/N/21

The Internet of Things (IoT) is a computer network which allows users to control household devices remotely. It has many benefits, for example a user can turn on the house central heating via a smartphone. The IoT can use WiFi and Bluetooth which can cause problems regarding data security.

Describe the methods that could be taken to protect the user's data.

**6** As a student you often use a computer keyboard. This could be a virtual keyboard or a physical keyboard on a desktop computer, a laptop computer or even a smartphone.

Evaluate your use of computer keyboards in terms of health risks, and explain any strategies you use to minimise these health risks.

Health risks alsociated to the Se or keghnards:

Neck and back pain a seed by Sitting for long hows.

Repetitive Stain lighty as a restrict of much typing.

Stalegies to Counter the health risks:

by trequestry taking breaks instead or being Sitted for long. After every one how, one is encouraged to take both and the pregnantic chair where one can early be able to adjust their Sitting possible.

- Use of ergonomic Keyboards. This will enoble one to properly adjust the keyboards. This will enoble one to properly adjust the keyboard so that typing is node easy.

- Use of an aim fest to place one's hand while typing.

The user needs to invest an other voice recognition.

System (use of microphone) so as to minimise also at typing.

Ensure that the keyboard keys are soft and waice view not applying allot of energy on the keyboard.

Rockit Motors recently created a new car sales website. The website uses internet shopping

features. Customers can ask questions of the virtual salespeople on the website, and then purchase the car on the website.
(a) Describe two other features of internet shopping.
- It allows used to login using usergane and parshood.  - A Shopping Cart that allows used to place in
- A Shopping Cart that allows uses to place in purchased items.
- Check out Feature for Submission of the water [2]
(b) Discuss the benefits and drawbacks of using internet shopping for Rockit Motors.
Benefits /Advantages
- The company well not need to open many brancher
because they are online hence reducer operational out.
- They operate 24/7 hence can do their Ster any line
- Byers time is saved as uses don't need to
tavel to the showroom.
- The company can sell cars all over the world.
Dignobacker Disalvantager.
- Developing and maintaining the website is expensive.
- The system does not open "Test done" options hence
Client Canst have a feel of the car.
- Both the Chent and the company are truly reliant[6]
on Internet hence without it they cannot be 966 to
to do business.

(c) Before the website became operational it needed to be tested. The web designer created a test plan including module and whole system testing.

Explain the difference between module and whole system testing.

A module is a software program that performs a specific task independently: later they are integrated together to form the enhie while system:

- With module testing, the individual modules are tested independently and separately whereas with whole system test, it involves many modiles all integrated together.

- Its easier to do module testing and to find bugs le most as it involves a single program notice while with [4] whole system testing, its an entire process and taxes thing to locate all the errors.

You are creating a presentation on the World Games. You have created a spreadsheet showing the number of gold, silver and bronze medals awarded to different countries.

You are planning to create a graph in the presentation showing the country, the number of gold medals and the total number of medals.

4	Α	В	С	D	E	F
1		Wor	ld Gam	nes Me	dals	1
Z						W
3		Country	Gold	Silver	Bronze	Total
4	1	Italy	153	145	142	440
5	2	United States	142	131	109	382
6	3	Germany	137	111	138	386
7	4	Russia	137	110	72	319
8	5	France	101	102	105	308
9	6	China	68	55	27	150
10	7	Great Britain	61	89	210	360
11	8	Japan	55	38	53	146
12	9	Ukraine	47	36	125	208
13	10	Spain	42	42	42	126
		Orio	ginal data	CT	RL/osel	ect

(a) Explain how you would create a vertical bar chart, showing the name of the country, the number of gold medals and the total number of medals awarded to each country, on a new slide in the presentation.

Delect the indicate of collect above thow?

Select B3 to C13. Don't click anywhere else.

Hold the CTRL key on your keyboard;

(this is to enable you select more collect while the others are sh'y selected.) Then select collect the appropriate chart, then Box chart, then select the appropriate chart type, and the chart will now display. Highlight the chart mas so that its spied to powerpoint. Highlight and right click to copy, then open presentations software (powerpoint), add a new slide, select the right the new slide. Add a new slide, select the right format of your slide, then parte the box chart on [6] the new slide. Add the and legend and any other information and then save the file.

## with these type of quarters, by working with test date an excel.

(b)	The total number of medals has been calculated manually and entered as a value. This could
	lead to errors.

	Explain how you could create a formula to calculate the total number of medals awarded for
	Italy using only the mouse. Note that you are not allowed to type in Fo
	For Italy its cell F4; Click on Cell F4 and
	men Click on Formslar, Clicic Avrosin or the
	Sicar Company it how picked he range
	Correctly of C4 to E4.
	Besides the formle box, Mere's a "V I con
	Clien on it; 11s for the Enter button.
	[4]
(c)	Explain how the data could be sorted by the total number of medals won by each country. The country with the largest number of medals should be at the top of the list.
	Highlight the entire cell that needs to be swhed
	1e B3 all though to F13.
	Clair on Data, then Sort.
	Select data has headers!
	Select Sort by Column F Then
	Select largest to smallest or else in Descending form.
	Cháir OK.
	Save the none sheet. [4]

Identify and describe the three web development layers.
1 Content layer: - used to enter the content of a
1 Content layer: - used to enter the content of a web page Structure. It Go consist of book text and b
images.
J
2 Presentation layer: - Used to turnat whole web page (5)
or individual elements. The layer is defined by the
2 Presentation layer: - Used to turnat while web page (5) or individual elements. The layer is defined by the styler to indicate how elements are displayed.
3 Behavioir Layer: - Used to exter scripting language to a web page or an individual element: it allows interaction within the weblite.
to a web page or an individual element. it
allow interachen within the weblite.
6

10 A school is planning to change the way it reports back to parents about their child's academic progress. They plan to produce a mail merged document and then email this to parents.

They have created a spreadsheet which shows the pupil's name, target, attainment and effort levels for Maths and the Science subjects.

Part of the spreadsheet is shown.

A	Α	В	C	D	E	F	G	н	Ī	J	K
1	Name		Target level	Maths	3	Biolog	ЭУ	Chemis	try	Physic	S
2				Attainment	Effort	Attainment	Effort	Attainment	Effort	Attainment	Effort
3	Ahmal	Wulandan	6	7	2	6	2	8	1	7	2
4	Nurul	Prakoso	8	7	3	7	3	9	1	7	2

(a) Design a suitable document layout to display the information of one pupil. The name of the pupil must be clearly shown separated from the rest of the data. It must have appropriate spacing. Do not include the pupil's data.

REP	ORT FORM TER	~ 1 2020/2021
FIRSTA	AME LAST NA	₩1E
Target Level		
SUBJECTS	Attainment	Effort
Maths Biology Chemistry		
Physics		[6]

(b) The attainment levels range from 1 to 9 and the effort levels range from 1 to 3 Before teachers are allowed to enter data, the spreadsheet needs to be tested.

Write down one example of extreme data to test the attainment field and one example of abnormal data to test the effort field.

Attainment – extreme data Either 7 or 9 (Maximu valver)

Effort - abnormal data a , - 1 ; Orkide the defined rage

(c)	Describe four advantages of using a mail merge for this document.
	1 mail merge is a faster process them editing each
	letter independently.
	2 The reports book alike hence naintain consistency.
	3 While Sending the reports, one needs to do emr check
	Once on the data and the template.
	4 One can save the dak source that comprise of address
	and this can be re-used again and again. [4]
(d)	When the mail merge is created, a special field containing the date needs to be added. This date will change automatically each time the merged document is sent or printed.
	Explain how the date field can be added.
	Place the Cursor to the place where you want the
	date to be added; then click an Insert Field on
	the list men lar. Then click on Quick ports
	and then select Date and Time.
	Select the Date format you need to Te; at the
	bottom night, It check on 'speciate astomatically' [3]
	Checkbox pen click OK.

11		air-conditioning system has been fitted in a notel bedroom. The air-conditioning system will tain fans which operate at varying speeds.
	lde	ntify the devices used in the system from the descriptions given.
	(a)	This device captures the temperature from the room.
		Sensor [1]
	(b)	This device changes the data from the microprocessor into a form that can change the speed of the fan.
		Digital to Analogue Convertor. [1]
	(c)	This output device operates the fan.
		Achator. [1]
12	Disc	cuss the disadvantages of policing the internet. — Explain the points to earn fly
	_	
		he most feel intimodated while making their amounts
		A number of Internet users tend to be anarymour and
	h	ence maker it very dypoint to police internet uses.
	<b></b>	where connectivity is global and that means that
	d	ignerent combines have their by-laws hence some by laws
	M	ight not be accepted in some country's hance a challenge.
	- (	the cost and man-power needed to police the Internet
		s han hence a very expensue process.
		The vie of Coded language among certain societal groups
		naver policing [6]

13 The internet has both moderated and unmoderated forums.

Explain what is meant by a moderated forum.

These are online duciusion foroms where before
a post appears to the public posted then the administrator have to approve.
administrator how to approve.
In a moderated from all parts are menitored and
they don't neet the threshold they are removed.
with moderated former, they have noter to be
adhered to and mase one does not adhere to
then then they are barred from parting. [4]

- 14 Students in Tawara College are using the internet to find information for a project. They have been told that the college has a firewall.
  - (a) Explain what is meant by a firewall and why it is used.

A frewall is either a hardware or software that is used to filter all moorning and outgoing traggic in a network. They are very week as:

- may check data coming in it must a set criteris and it not its blocked.

- It keeps a list of undesired IP address of that leads one to paragraphic sites; it blocks them.

- It keeps a list of undesired IP address of that leads one to paragraphic sites; it blocks them.

- It keeps a log lecord of all the accessorand also all data accessed within a given section. These records can be accessed within a given section.

- It can alest a user about unwanted data being a coessed within the network.

(b) Explain why it is **not** always easy for the students to find reliable information on the internet.

The students visit different websites to get information for their project.

hence argone can end up posting impound him Ordiner
- Sometimes one can access date online from dispersel
sources that are conflicting hence not able to very.

- If the website is not updated, then data might e being obsolete and not relevant at all.

Dearth hence always get wong suggestion. [4]
