MEMBER BENEFITS

- Extra sessions billed at your tier rate
- Priority booking for preferred times
- Home exercise program updates included
- Intensive & Maintenance: free re-assessment every 12 weeks

POLICIES

- **Monthly plans:** unused sessions roll over 1 month
- **3-Month Maintenance:** expires in 4 months
- **Post-Op:** expires 10 weeks after first visit
- Vet-documented medical holds extend expiration
- 24-hour cancellation notice; no-shows use a session
- Non-refundable after first visit
- Non-transferable; sessions may only be used by the dog they were purchased for
- Discounts do not combine

A current veterinary referral is required before treatment begins. Prices subject to change; purchased memberships and packages are honored at the purchase price.

WHAT'S THE DIFFERENCE?

REHAB SESSION

A full workout plan made just for your dog

- Water treadmill walk
- Floor exercises for strength and balance
- Stretches for stiff joints
- Time on the PEMF mat
- We update the plan and give you home exercises
- We send updates to your vet

Best for: healing from surgery, an injury, or pain

TREADMILL ONLY

Just the water walk

- Walks in warm water (about 10–15 minutes)
- The water holds up part of your dog's weight, so moving is easier on joints
- No floor exercises, stretching, or plan changes

Best for: staying fit after rehab, older dogs, or weight loss

PEMF MAT ONLY

Rest on a healing mat

- Your dog lies on a soft mat that makes a gentle magnetic field
- It does not hurt, and many dogs fall asleep
- May help ease pain, stiffness, and swelling

Best for: sore or older dogs, and an easy add-on during daycare, boarding, or grooming

LASER ONLY

A special light for sore spots

- A handheld tool shines light on the sore area
- Feels warm and relaxing; no shaving or needles
- May help ease pain and speed up healing

Best for: sore joints, arthritis, wounds, or healing incisions

All services include a towel-dry after water work. All services need a current referral from your veterinarian.

QUESTIONS OWNERS ASK

Which one does my dog need?

If your dog is healing from surgery, an injury, or pain, choose **Rehab Sessions**. When your dog is done with rehab and just needs to stay fit, **Treadmill Only** is a lower-cost way to keep going. **PEMF** and **Laser** visits are quick, calm treatments for soreness. Your vet and our first visit will help you decide.

What happens at the first visit?

We watch how your dog walks, stands, and moves. We talk with you about your goals, make a plan, and start the first treatment that same day.

How long is my dog in the water?

Usually 10–15 minutes. Healing muscles need short workouts. In a rehab session, the rest of the time is floor exercises, stretching, and the PEMF mat.

What is PEMF?

A soft mat that makes a gentle magnetic field. Your dog just lies on it and relaxes. It does not hurt, and it may help with pain and swelling.

What is laser therapy?

A handheld tool shines a special light on sore spots. It feels warm and does not hurt. Everyone wears safety glasses, including your dog. Your dog's vet must approve it first.

What is the difference between 30 and 60 minutes?

A 60-minute visit means more exercises and more time on the PEMF mat. Your dog's plan will say which one is best.

Why do I need a vet referral?

Texas law says a veterinarian must check your dog first and approve these services. We keep your vet updated along the way.
