

120V 3-Wire Type-H Track System (TRK-xFT-BLK/WHT)

This type-H track system is a durable, versatile solution for modern track lighting applications. Constructed from high-quality die-cast aluminum, it offers long-lasting performance while remaining lightweight and easy to install.

Available in multiple lengths (2ft, 4ft, 6ft, and 8ft), the track can also be cut to achieve a precise fit for your space. Designed for universal compatibility, it integrates seamlessly with most leading H track lighting systems.

Engineered with efficiency and flexibility in mind, the system supports California Title 24 compliance when paired with compatible current limiters, helping reduce energy consumption. It can also be expanded with a range of accessories, including connectors and track heads, to create customized lighting layouts.

UL and cUL listed for dry indoor locations, this track ensures reliable and safe operation for residential and commercial environments. Available in black or white colors.
