

LumaEdge™ Plus Smart Outdoor LED Lights (LE-RGBWWIC-72W-36V-72LED)

The LumaEdge Plus Permanent Outdoor Lighting System is a smart RGBIC+Warm White architectural lighting solution designed to deliver vibrant, customizable exterior illumination for homes and commercial buildings year-round. Featuring individually addressable LEDs capable of producing up to 16 million colors and dynamic scene modes, LumaEdge Plus allows users to create stunning lighting effects for holidays, special events, or everyday accent lighting. Built with weather-resistant, outdoor-rated construction, the system is engineered to withstand rain, snow, and varying temperatures while maintaining consistent performance. With Wi-Fi and Bluetooth connectivity, users can easily control colors, brightness, schedules, and lighting scenes through a mobile app, remote control, or compatible voice assistants. Designed for clean installation along rooflines, soffits, and architectural edges, LumaEdge Plus provides professional-grade permanent lighting with energy-efficient LED technology and long-lasting reliability.

Product Specifications
