## 15W Type-H LED Track Light 5CCT (TRK-15W-CCT-BLK/WHT)

Achieve precise, adaptable illumination with this advanced LED H-type track lighting head, engineered for performance and flexibility. Featuring an upgraded zoom lens, the fixture allows smooth adjustment of the beam angle from 24° to 60°, delivering enhanced brightness, sharper beam edges, and concentrated light output. This ensures accurate illumination regardless of track-to-object distance, making it ideal for highlighting displays, artwork, or architectural features.

Designed with built-in 5CCT technology, this track head offers five selectable color temperatures—2700K, 3000K, 3500K, 4000K, and 5000K—allowing you to easily match existing lighting without guesswork during installation. With 950 lumens and a high CRI of 90+, it renders colors with exceptional accuracy, creating vibrant, true-to-life visuals that enhance any space, from retail environments to residential interiors.

For maximum control, the fixture supports smooth 10%–100% dimming and features 350° horizontal rotation and 90° vertical adjustment, enabling precise multi-angle lighting and dynamic, three-dimensional effects.

Compatible with H-type 3-wire, single-circuit track systems (including Halo systems), this track head is easy to integrate into existing setups (not compatible with J or L tracks). Built for durability and efficiency, it is ETL listed, offers long-lasting performance with minimal maintenance, and is backed by a 3-year warranty for dependable, worry-free operation.

**Zoomable 24°-60°**  
 Flexible Lighting and Angles, Perfect for Artworks of Various Sizes  
 24° / 30° / 40° / 50° / 60° Adjust the Beam to Fit Any Task

**Match Existing Lighting to Create A Harmonious Illuminated Space**  
 From Warm Ambience to Bright Focus
