

Bugs in a Jar Counting Mats

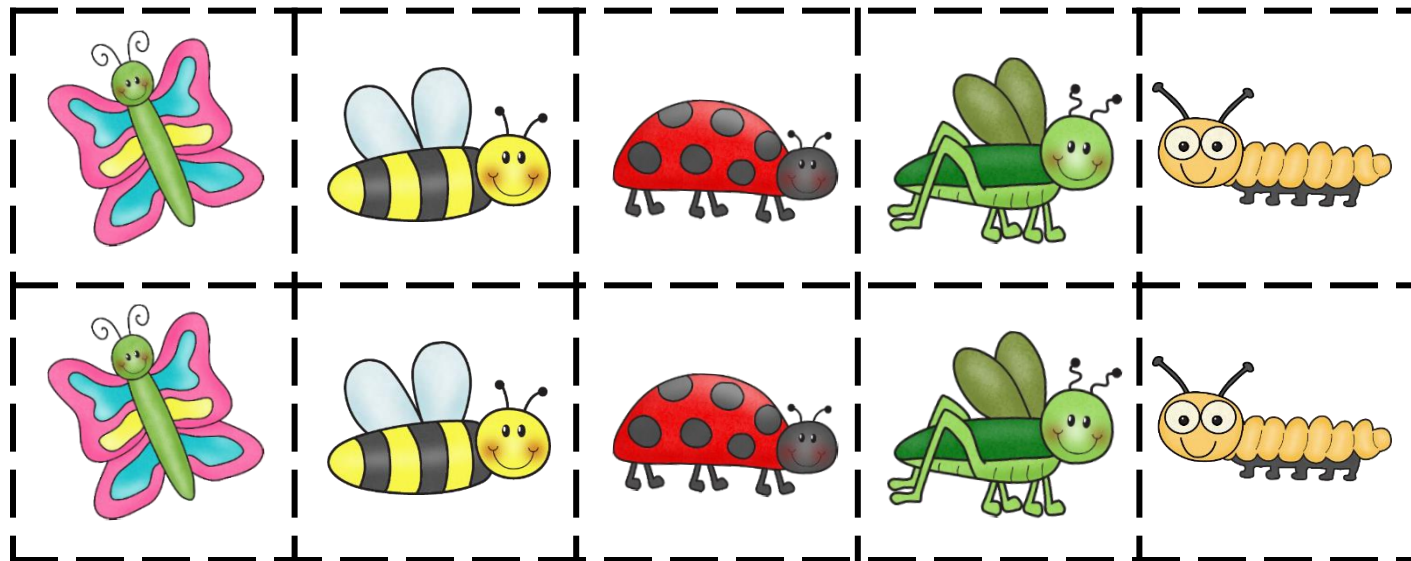

0000

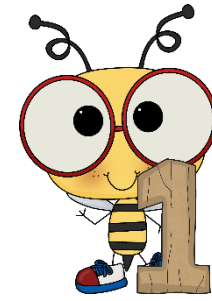

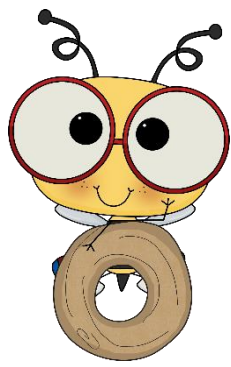

You can use these “Bugs in a Jar” counting mats as a sensory bin activity. Dye rice green, add fake flowers, leaves and toy bugs. Provide tools like tweezers, shovels and nets to strengthen fine motor skills. Follow @mybusylittlelearner on TikTok or Instagram to see how to set up this sensory bin and for similar ideas and activities.

If you do not have toy bugs, you can print and use these! I would print on cardstock or laminate for durability!
