

# Rainmaker Hard Piped Systems

Our hard piped systems combine the Double Arm with Full Circle Impact Sprinklers to drench your home and surrounds to protect your home during a bushfire event.

Your system is designed specifically for your home and risk, we discuss with you your risk and how to best increase your homes bushfire resilience.

*20mm Dual Port Full Circle Impact as part of a system installed at Woodhill NSW.*

Once installed, the system is activated by attaching a hose from your water source to the wall manifold.
