

Rainmaker Hosed Systems

Our hosed systems combine utilise the DA, Impact and Super Impact Rainmaker Bushfire Sprinklers to drench your home and surrounds protecting your home during a bushfire event.

Adaptable and modular, a hosed system can be used to protect all assets, simply connect to a water source, hang it up and turn it on.

Rainmaker Impact on a star post and gutter

The system uses 12 and 20mm hosed to distribute the water from your water source, allowing for a variety of configurations.

A complete Hosed System ready to protect your home..
