High Performance Real-Time Embedded Technologies

Joe Palermino (301) 869-4000
Wyatt Tuzo (410) 627-4921
Terry Conroy (410) 227-7373
Aram Grigoryan (215) 776-4614

www.mrcy.com

Mercury – Digital Signal Processing and High Performance I/O for Radar, SIGINT, Software Radio, Communications, EW, Data Acquisition, EOIR and Image Processing applications.

- Xilinx FPGA boards w/ Direct RF, RFSoc, and Versal
- Altera FPGA boards w/ Direct RF, Agilex, MCP
- VPX, XMC, PCIe, FMC & SFF in COTS, Rugged, Mil-Spec & Space
- High-Performance A/Ds, D/As & DDRs, up to 64.0 GHz sample rates
- Fully-Integrated Development Systems & Data Recorders

concurrent

www.concurrent.tech

Concurrent – Industry Leading Manufacturer of COTS Single Board Computers (SBCs) for the Mil/Aero, Defense, Security, Telecom, Industrial, Medical and Transportation markets.

- Latest Gen Intel XEON & Intel Core CPUs for Embedded applications
- VPX, VME, cPCI and XMC form factors
- VPX Switches, A-PNT and Storage Modules
- Complete Development & Deployable Systems with all HW integrated
- Commercial, Industrial, Rugged and Conduction Cooled

www.elma.com

Elma – Premier manufacturer of Chassis Solutions for Mil/Aero, Space, Industrial, and Comms. Active members of VITA, SOSA and PICMG.

- SOSA, VPX, VME, CompactPCI, and Small Form Factor (SFF)
- Development to Deployable Subsystems, CMOSS Sys, VPX Switches
- Industrial, Rugged, and full Mil-Spec; Rackmount, ATR, Manpack
- Convection, Conduction, AFT, LFT and Liquid Cooled platforms
- Backplanes, Sub-racks, Enclosures & Cabinets

Optima • Stantron

An Elma Company

www.elma.com

Optima-Stantron – Rugged modular cabinets based on field-tested concepts designed to exceed MIL-STD-810F & 901D, MIL-STD 461.

- Customer-specific requirements for thermal management, power distribution and I/O cabling
- Aluminum extrusions or heavy-duty steel are welded or bolt-together
- Services - printing, structural simulation, enviro testing & agency certs
- Purpose-built for shipborne electronics, ground mobile command centers / shelters, comms hubs and more

www.newwavedesign.com

New Wave Design – Leading provider of Computing and Networking Solutions to meet your most rigorous Mil/Aero/Defense requirements. NWD excels in offering Engineering Services and Customization to meet your unique program requirements.

- 10/40/100G+ Ethernet & Fibre Channel with on board FPGAs
- VPX, XMC & PCIe form factors in Commercial, Rugged & Full Mil-Spec
- High speed Serial Cores for Ethernet, Fibre Chan, ARINC-818, 1394b,
- Digital Design and Verification engineering services

www.altadt.com

Alta Data – is a market leader in 1553 & ARINC connectivity. They offer a full line of PCI (PMC/PC104P), PCI Express (PCIe, XMC) interface cards/boards for almost every computer configuration, innovative real-time Ethernet & NLINE connectivity devices, Thunderbolt™ and USB appliances.

- MIL-STD-1553/1760, WMUX, EBR
- ARINC-429/575/717, Serial Interfaces
- Cyber Test / RT Validation
- Lab / Flight Line / Rugged / Embedded

Please contact Ace Embedded directly for additional information and pricing on all these products and services.

Terry Conroy (410) 227-7373
Aram Grigoryan (215) 776-4614

www.onestopsystems.com

One Stop Systems – Innovative edge computing modules and systems for AI applications. Open Systems Architecture Platforms offer scalability, ultra-low latency and max data throughput.

- Rugged servers, GPU Accelerators and PCIe Expansion Systems.
- Flash Storage Arrays, SAN, NAS and data recording software
- AI data set capture, training, and large-scale inference
- Edge Computing - High Performance, mobile & rugged
- PCIe expansion and switching

www.delphieng.com

Delphi Engineering Group – Industry leader delivering Mission Critical Processing and Recording Solutions to the Mil/Aero Defense Industry since 1994. Solving SIGINT, Radar, EW and other critical applications.

- High-Speed Data Capture, Data Processing & Data Recorder Systems
- Data Rates Up to 50GB/s
- Integrated NVIDIA GPUs utilizing GPUDirect RDMA
- Precision clocking and triggering solutions for multi-channel alignment
- Rugged, liquid-cooled VPX, PCIe, and FMC+ data recorders

www.memkor.com

Memkor– Leading US engineering firm designing and building secure, high endurance, and rugged military grade SSDs and data storage solutions. COTS and Custom SSDs that meet the strict demands of aerospace and defense applications..

- **Form factors:** M.2, 2.5"/U.2, 1.8", mSATA, XMC, VPX and custom
- **Interfaces:** Low power SATA or high speed PCIe Gen 4, -40 °C to +85 °C
- **Security:** AES 256 hardware encryption. FIPS 140 validation (cert #3750)
- **Ruggedization:** Designed to MIL STD 810G

www.codaeng.com

Engineering Design Services – Innovative provider of rugged products and systems for Mil-Aero, Defense, and Harsh Environments.

- Custom Hardware Design, Prototype thru Full Production
- Software Design & Development, Embedded Multi-Threaded
- FPGA & DSP Development & Integration
- RF Engineering, Signal Conditioning
- Rugged Small Form Factor (SFF) COTS Mission Computers

RF receivers, Direction Finding Systems and Antennas for use by Military and Law enforcement

www.aventasinco.com

Design and manufacture of cable assemblies, wire harnesses and all connectivity solutions

www.controlcable.com

Rugged Cases engineered to your payloads weight, size and vulnerability with shock and environmental testing.
