The Cemetery is located on Maple Drive between Rt. #248 (Lehigh Drive) and Almond Road adjacent to the church. This document is the record of burials with exact location of the gravesite given. The location specifies either the Old Section or New Section of the cemetery. The distinction is necessary in order to give an accurate location of the gravesites.

INTRODUCTION

TO

St. PAUL'S CHURCH GRAVEYARD AND CEMETERY BURIAL DIRECTORY

This cemetery, located on a steep hillside is divided into two distinct sections separated by what appears to have been an old road. In this document, the section located to the right of the "grassy road" and closest to the church is referred to as the Old Section with burials dating from 1762 - 1921. The New Section is located to the left of the "grassy road" closest to Rt. #248 with burials dating from 1857 - 1989.

INTRODUCTION:

In the late 1940's, stones located in the Old Section were moved into the current straight-line rows. This was consistent with what other cemeteries were doing at that time in order to facilitate lawn cutting and maintenance. Comparison of today's cemetery with a 1929 photograph indicates that this work resulted in a significant change in appearance. See APPENDIX 1. The area where this 1929 photograph was taken can be easily recognized from the gravestones remaining in that location. The stones for Sarah and Henry (Heinrich) Kress were removed in 1940's and replaced by memorial stones. It appears that when rows were defined, the stones were lined up but not moved far from the actual burial sites because the location of tombstones within the lettered rows A to U is somewhat consistent with old records of the Northampton County Office of Veterans Affairs. No major change was made to the New Section; it remained divided into 4 Sections and 5 Tiers. For schematics of the cemetery, see Figures 1, 2, and 3.

In 2003, the Cemetery Restoration Committee of St. Paul's UCC of Indianland began an extensive restoration of their historic cemetery. This included the up righting, repair and straightening of the gravestones as well as the professional restoration of the five retaining walls located in the New Section. On July 2, 2006, a rededication service was held. The following year a memorial area was developed. Granite Benches memorializing known and

unknown persons buried in the cemetery as well as honoring the restoration efforts were placed in the area believed to have been the site of the 1756 church building. For more than five years, the volunteers had worked continuously from May until October. Refer to: The History and Restoration of the Graveyard and Cemetery at St. Paul's Church (2007).

At the completion of the restoration the second phase of the project began. This was the reading of the information found on each stone, comparing that information with the 1888 Burial Record compiled by Stephen Wentz, other existing sources, and then identifying the location of each tombstone. Stones with identifiable information can now be readily located using this 2014 Burial Directory. There remain some stones where there was not enough legible information to either identify names or to match even a partial name to partially legible birth or death dates. All forty-one of the unidentified stones are entered at the end of the alphabetical listing in the Burial Directory.

The information presented here in 2014 is being made available for present and future generations of researchers.

OLD CEMETERY RECORDS:

Since 1756 there has been a cemetery on the property; land purchased from John and William Penn. The oldest legible tombstone, in remarkably good condition, is for Wilhelm Best, a French and Indian War veteran, who was born in 1713 and died in 1762. The cemetery remained the primary burial ground for the Lutheran and Reformed congregations of St. Paul's until the early 1900's. In 1888, Stephen Wentz, sexton of the Graveyard and Cemetery published the Burial Record of St. Paul's Church Graveyard and Cemetery near Cherryville, Northampton Co., PA. This record listed alphabetically names from all the legible gravestones he found in the cemetery at that time. Location of the stones was not identified. Wentz stated that there were over 1107 graves marked with tombstones dating from 1756 to Aug. 20. 1888 as well as 1300 burials unknown.

It is important to note when using the Wentz record that the majority of German first and last names are spelled the same regardless of the spelling found on the tombstone. Many of those German names were entered into his record using an Anglicized spelling. Two examples of names where this is particularly true are: Schafer, Schaffer, Schoffer, Shaffer, Sheffer and Brifogle, Bryfogle, Breifogel. Several times the name on a child's stone was entered as that of a parent possibly because the word for daughter or son was missed at that time. In this directory they are listed as read from the stone.

There are numerous names entered in the Wentz's Burial Record where no stones were found by the current authors. See APPENDIX 2. A few of these may be the stones from which no identifying information could be read or it is very possible that some stones were discarded during the 1940's restoration because of deterioration or breakage. Some burials in the 1880's may have been included anticipating placement of a stone and that never happened. Another possibility is that Wentz, as cemetery sexton, had access to what are now nonexistent burial records. An indication that he may have had access to records in addition to reading the stones is that he sometimes included the age in months, days and years when that information is not found on the stone. Interestingly, these authors have found legible stones that were overlooked when the 1888 directory was compiled; a very understandable type of error knowing that the stones were not lined up as they are today. These names are listed in the current directory.

In 1988, J. David Lozinger, BSA Troop #242, St. Paul's Church, Indianland, as partial fulfillment of requirements for his Eagle Scout Rank identified the gravesites, with stones or monuments, located in the New Section. This included both the terraced and non-terraced areas. He developed a grid system and map to identify the locations. This Burial Directory continued the use of his system. His information provided invaluable confirmation for this project.

An old card file, unidentified source, was found in the church office and that information was also compared to both Lozinger's and Stott's. These older cards were best described as incomplete.

DEVELOPMENT OF THE CURRENT BURIAL RECORD:

The current authors have attempted to accurately read every stone in the Cemetery, compare the information with the existing records, verify discrepancies by revisiting the stones and enter into this Burial Directory as accurate information as could be obtained from the actual stone. In the event only partial information was legible an attempt was made to match what was found with information provided by Wentz or other references.

All names entered into this data base are entered using the spelling that was read from the tombstone itself. There are instances where a husband and wife's stone will have differing spellings of their last name. This can be found even when they are buried next to each other.

The written information will be presented in two ways, actually as two distinctive Directories. One will be an ALPHABETICAL DIRECTORY sorted by last name and the other a LOCATION DIRECTORY sorted into either the OLD or NEW Sections of the cemetery. In the LOCATION DIRECTORY, the New Section will be listed first. FIGURES 1., 2., and 3. are schematics of the Cemetery. Eventually this information will be available on the internet as a PDF copy. There will be a search feature, Find Box, which allows a user to search for any word such as a name. Each time the Enter Key is pressed it will find the next entry until the entire document is searched.

APPENDIX 4. is as complete a list of the names of men who served their country during times of War as we have available. This list was compared in 2009 with the records of Northampton County Office of Veterans Affairs. Available resources, all listed as REFERENCES, were consulted and provided additional information that was sometimes helpful in establishing family names and occasionally relationships. No information was ever used from these sources without credit given in the Comments section of the Directory.

As mentioned earlier, in the Old Section of the cemetery, we have found a number of stones that were not included in the record of 1888 by Wentz and additionally have not been able to locate a significant number of the stones he has in his record. See APPENDIX 2. While we have attempted to read each and every stone and record accurately the information it would be presumptuous to assume we would ever reach 100% accuracy with our own work. What can be said with reasonable certainty is that every stone currently in the cemetery (all 1628 of them) has been accounted for in this Burial Directory.

HOW TO USE THE BURIAL DIRECTORIES

The DIRECTORY that will most easily provide information to someone researching their family is THE ALPHABETICAL DIRECTORY. Someone physically visiting the Cemetery may benefit from having a copy of THE LOCATION DIRECTORY in order to see names on the gravesites surrounding their family members.

FOR THE ALPHABETICAL DIRECTORY entries will alphabetized by last name in Column 1., then by first name in column 2.

FOR THE LOCATION DIRECTORY the gravesites location will be found in Column 1., with the entire New Section listed first, followed by the Old Section. The second column is the last name. The remainder of columns are identical to the alphabetical listing. The information is identical to that found in the Alphabetical listing.

FOR BOTH DIRECTORIES

FIGURE 1. Map of St. Paul's Cemetery showing relationship to the Church and roads.

FIGURE 3. Map of the Old Section

Last Name: Spelling as read from the stone.

First Name: Spelling as read from the stone

*** footnote*

Footnotes are given in APPENDIX 3.

Location: Location information is provided in a format appropriate for the Section of the Cemetery. For both the New and Old Sections a map is provided.

NEW Section: FIGURES 1. and 2. are maps for this section.

Either a numerical Tier number or a Section number is given. Tiers are located behind retaining walls.

Tiers: There are 5 tiers beginning half-way up the hillside. Tier 1 is located closest to Maple Dr. and Tier 5 at the top of the Cemetery. Within the Tiers an alphabetical location is given beginning with the letter A. A is located farthest from the residual "grassy" road separating the Old and New sections of the Cemetery. The letters progress toward the residual "grassy" road.

e.g. New-T1-A. Tier 1 is the first tier and the gravesite would be found in the Tier at the far end furthest from the "grassy" road.

Sections: Four sections are located in the flat area between Maple Drive and the start of the Tiers.

Sections 2, 3, and 4 proceed from Maple Drive toward the Tiers. Section 1 is located far to the left of the other Sections.

e.g. New-3-H would be gravesite found about mid-point in section 3

OLD Section: FIGURES 1. and 3. are maps for this section.

Rows: A through U. Row A is closest to the residual "grassy" road and Row U closest to the Church

Note: Rows: E, M, O, & P are partial rows beginning part way up the hill.

Number: The stone located closest to Maple Drive is numbered 1. The numbering remains continuous from bottom to top of the hill. Partial rows also begin with a 1. The top number on a row would identify the number of stones located in that row.

e.g. Old-C-12 would be a gravesite in the third row from the "grassy" road of the Old Section, Row C, and the 12th stone from Maple Drive.

Date of Birth: Month/day/year

Date of Death: Month/day/year

Age: Years/months/days

Age was never calculated by the current authors. It was either read from the stone itself **or** came from the Wentz record of 1888. The information from Wentz was included, even if not found on the stone, for he may have had access to the actual burial records.

Spouse: Name, and if known, the location of spouse's grave is given

The spouses name was taken from the gravestone itself or occasionally from either Eyerman (1899) or Kuntz Family (1931) since both gave some genealogical information. Infrequently, a stone is inscribed with the wife's maiden name as the primary name and then stating wife of: e.g. Mary Jones, wife of John Smith, not Mary Smith. In this record, we have entered her name as the stone reads, listing spouse and then making a note in the Comments section. Wentz was inconsistent when handling this.

Military Service: If known, war service is given. The list was compared with the Northampton County Veterans records (2009). Wentz had identified some veterans as well. There are many more veterans buried in the cemetery than we have names or records for. They are among the 1300 persons without a tombstone. See APPENDIX 4.

Comments: Miscellaneous information is included as comments. Occasionally a comment is from the work of another author. Attribution to Eyerman, 1899, will be an E.; Kuntz 1931 a K.; and Wentz, 1888, a W. Assume that the location of a spouse, child or parent's grave is in the same section, Old or New unless indicated otherwise.

Footnotes: Indicated by a ** are listed alphabetically in APPENDIX 3, Written when there was something of note such as an inscription or a known family connection. Other comments may include description of stone, whether stone matches another, was government issued for veterans, women's maiden name, years married, number of children, citation of a Bible verse and other information found mostly on the individual stones.

BURIALS LISTED IN THE 1888 BURIAL RECORD WHERE NO TOMBSTONE WAS FOUND

No identifiable tombstone was located by 2014 for the following persons whose names are found in the Burial Record of St. Paul's Church Graveyard and Cemetery near Cherryville, Northampton Co., PA, (1888) by Stephen Wentz.

Several important points to remember:

- It is stated by Wentz that his record of 1107 burials was one of persons having tombstones.
- Possibly, badly deteriorated stones were discarded during the restoration in the late 1940s or at other times in the past 124 years.
- Some entries are just initials. Many of the stones with initials and/or dates only are hand carved fieldstones. A few entries of initials only may have been the footstones to larger stones.
- Ken and Nancy Stott attempted to match names in the Wentz list with all stones even those with partial information. Some stones are totally illegible. In this listing, all gravestones are accounted for.

Eyerman, John F.Z.S., F.G.S.A. (1899) - The Old Grave-Yards of Northampton and Adjacent Counties, June 1899 Vol.1 Easton. Penna.

John Eyerman was researching his wife's family and in the process visited local church cemeteries including St. Paul's. He focused on stones with births prior to 1780 and notes that at St. Paul's already in 1899 some of the old stones had lost their inscriptions. He also did additional genealogical research and included this information in his book. He did not identify location of graves or include children.

Kress Family History: 1930 - by Karl F. von Frank of Vienna Austria.

The chapter, pp.324-363 is about four Kress brothers settling in America and those living in Lehigh Township, includes much information with some pictures that serves as confirmation of known information including that of other residents' names. Many Kress relatives/descendants were church members of the church and are buried at St. Paul's. Photograph of Henry (Heinrich) and Sarah Kress's gravesite gives a clear picture of a small part of the cemetery in 1929.

The Kuntz Family (1931) - A booklet researched and printed by the descendants of Bernard Kuntz.

Booklet followed the dedication of the granite monument on July 24, 1929 that was erected over the burial site of Bernard Kuntz and his two wives. Their actual grave stones are incorporated into the monument. Contains much information of interest about the primarily the first two generations of descendants of Bernard Kuntz (1723-1807) many living in Lehigh Township.

Wentz, Stephen, (1888) - Burial Record of St. Paul's Church Graveyard and Cemetery near Cherryville, Northampton Co., PA.

Stephen Wentz was the Sexton of the Graveyard and Cemetery for 12 years. His record is of the 1107 graves marked with tombstones dating from 1756 to Aug. 20, 1888. He states there were also 1300 unknown gravesites. This book primarily identifies the persons buried in the Old Section. Since burials began in the New Section in 1850 and the Wentz record was done in 1888, some names listed in Wentz are found in the New Section. He frequently gave age in years, months, and days even when this information is not included on the stone indicating he may also have used records.

ACKNOWLEDGMENTS

The publication of this the 2014 Burial Directory is the culmination of the lengthy process of restoring St. Paul's Cemetery and Graveyard. By 1998 church members recognized that the appearance of the cemetery was rapidly deteriorating and members of the church began to pursue ideas and some funding eventually leading to the formation of the Cemetery Restoration Committee. Committee members worked tirelessly from 2003 until the physical restoration was completed in 2006. See [The History and Restoration of the Graveyard and Cemetery at St. Paul's Church \(2007\)](#). While some records existed listing the names of individuals buried in the cemetery, it was realized that there was no location identified or map of gravesites for the OLD section. Boy Scout J. David Lozinger of BSA Troop # 242, Indianland, had done considerable work mapping the NEW section and reading information from the stones. In 2007- 2008 we undertook to read all the stones in the OLD section, confirm the information from Scout Lozinger's work on the NEW section and then enter both sets of information into a data base.

Much thanks goes to Bob Litsch, who had worked tirelessly on the actual restoration of the cemetery, and then created for us the Excel Spread sheet used for recording this information. At final count, it contains 1628 entries. Early on, several individuals from the Cemetery Restoration Committee and friends assisted with the reading. For the most part, it fell upon us to read and then reread the information to the best of our ability knowing that perfection is rarely an obtainable goal for this type of work. It goes without saying that the stones are wearing and that 8's and 3's, 2's and 5's, as well as letters are often indistinguishable. We would like to have included more verses and poems found on stones but they often defied our best intentions. The combination of age and old German text won out.

Credit for the creation of the booklet and the computerization of the information allowing you to access the information that you have before you goes to one person, Rich Lieberman, who offered much valuable assistance to the authors. He generously donated his time and expertise to this project.

Additionally, our thanks to Pastor Nuscher, the Consistory and particularly the membership of St. Paul's for their unfailing support throughout these past twelve years and all the phases of the Cemetery Restoration.
