## ON GRID SYSTEM

On grid system is the best choice for reducing electricity bill. It mainly consist of panel and on grid inverter. Solar panel is having warranty of 25 years and inverter of 7 years. So this system is one time investment.

## SOLAR PANEL

## OFF GRID INVERTER

## ON GRID INVERTER

## OFF GRID SYSTEM

Off grid is best suited for frequent power cut areas. It consist of panel which charges battery and once charged completely, it supplies load. So it is best option for power back up and a partial reduction in electricity bill
