

ACT TEST

SAT

PREP STEPS

Dee Matthews Johnson

Deemathews26@gmail.com

These sessions are for **English and Reading**.

Those two areas are the **most important** in getting a qualifying score. Once the highest practice score can be achieved we can move to prepping math, if requested.

Sessions are done **one to one**.

(I want to understand what you know and how you think. I can't do that with a group. )

Sessions are **60 to 75 minutes on ZOOM**.

**Each session is \$ 25.00**

We agree upon a **scheduled day and time of day**.

All sessions are scheduled after 430p - Monday – Sunday.

Ideally, I would like a copy of the student's current transcript? Why?

I will be able to determine the score needed based upon the core GPA.

I can have some idea of the student's work ethic and the score that could be achievable.

**2 days before session, student or parent will Zelle \$ 25.00**

After receipt, I will send a copy of the practice test, (that the student must complete prior to the virtual session,) and the invite for the scheduled Zoom session.

During the Zoom session, I will discuss each incorrect answer and the strategies for getting the highest scores possible.

My success rate for getting students the scores they need based upon their GPA is 95%

Bio-

Dee Matthews-Johnson

Ms. Dee as she is known to her students and families has been an educator for more than 35 years in all levels of education, elementary to collegiate. Her favored opportunities included teaching GED classes for Atlanta Public Schools, working as an off-site educator for DeKalb Technical College, traveling the State of Georgia providing professional staff development trainings for teachers in Early Childhood Education and evaluating and supervising teachers working toward their CDA credentials. As the Academic Director for Georgia Storm Prep Academy, she directs and supports athletes who have not completed HS diplomas or are non-qualifiers. She provides ACT Prep, in person and virtually, working with numerous students and student-athletes across the US and teaching middle school math for Jefferson County Middle School.
