FOR THE SAILING OFFICE AND RACE TEAM

RaceHub for the whole programme.

Reduce repeated data entry and the handoffs between club tools. RaceHub's expanded offering brings race administration together. The workflows below are being developed or tested; confirm availability with GDS.

EXPANDED CLUB WORKFLOWS / IN DEVELOPMENT

Club & event management

Race calendars, events, regattas, series, boat records and club administration.

Documents & notices

Notices of Race, Sailing Instructions, amendments, version management and required-document acknowledgements.

Skipper & crew updates

Automatic race, event and regatta emails, with WhatsApp group integration.

Entries & payments

Online registration, payments, crew lists, safety documents, certificates and compliance checks.

Course setup & race day

Pursuit races, crew sign-on through the app, finish times and finishing places alongside course setup.

Results & handicapping

Results and series standings; planned Smart PHS, AMS, IRC and ORC support requires confirmation.

Source: supplied SailPro / RaceHub presentation, 2 October 2026.

BEFORE THE GUN

Make the start count.

Bring the key start-line information onto your mobile device. StartSync helps you understand where you are in relation to the line as the countdown runs.

Set the line

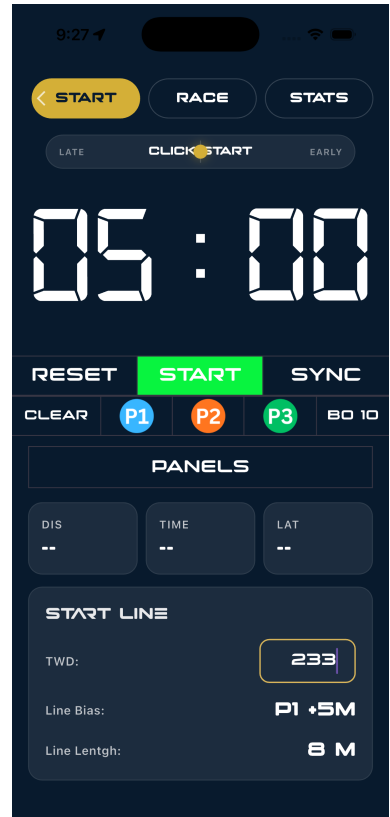

Mark both ends and confirm the pre-start side.

Know your timing

See time and distance to the line, with audible early or late feedback.

Set up for your boat

Bow offset accounts for the distance between your device and the bow.

Keep your attention on the race

Countdown and audible information help the crew stay aware.

FROM START LINE TO FINISH

See the next decision sooner.

RaceCourse combines your course with useful tactical information. Pulse adds weather, wind and tide information to help you prepare for the conditions ahead.

Build your course

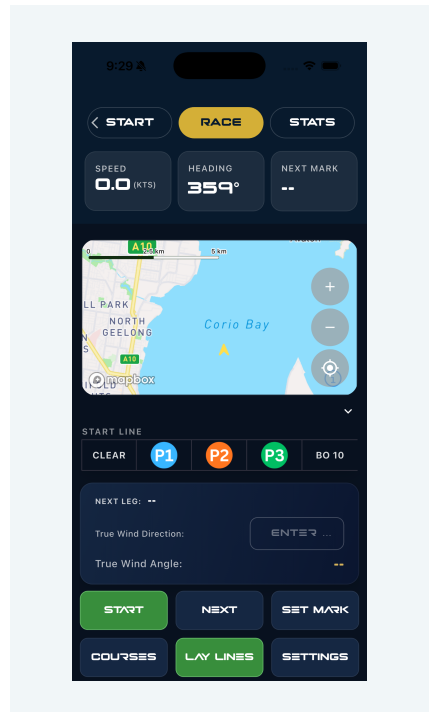

Set marks on the map or use imported mark data, with access depending on your plan.

Sail mark to mark

Use bearing, distance and laylines, with automatic mark progression and next-leg planning.

Plan with Pulse

Explore forecasts for your race location, including tactical weather and tide tools on paid plans.

Advanced tools depend on subscription and app version. SailPro is not for navigational use.

TURN ACTIVITY INTO PROGRESS

Make every session matter.

SAIL. COMPETE. EARN XP.

Join challenges, improve your skills, and climb the leaderboard.

SAILPRO XP

SailPro XP turns recorded sessions into a sailing history you can revisit. Upload your activity, review the track and see how your sailing develops over time.

Record and upload

Save your race or training session from the app.

Review and compare

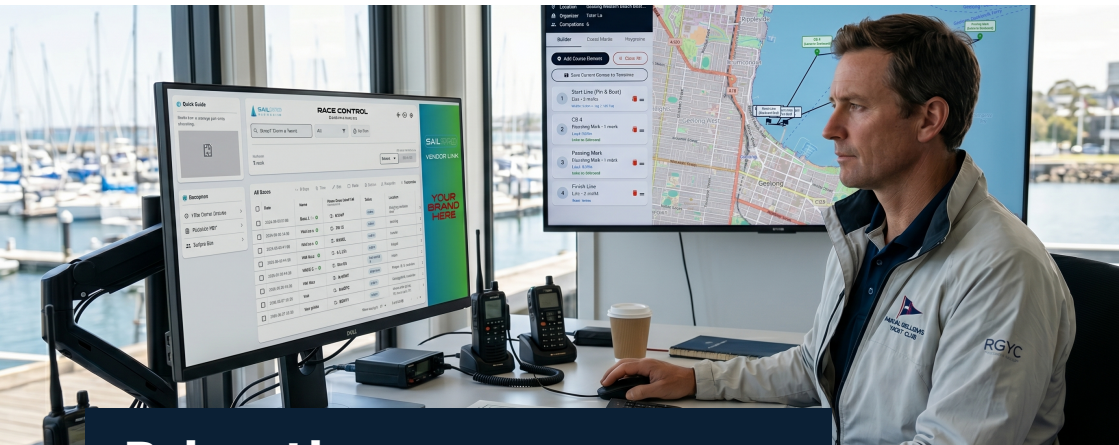

Explore replays, speed, distance and session insights.

Earn experience points

Qualifying sessions can contribute to leaderboards and class rankings.

XP is a virtual participation measure. Qualification rules apply; it has no cash value.

Explore: xp.sailpro.app

Bring the race back to shore.

Give members, families and supporters a way to follow the fleet. RaceHub's shared browser viewer shows positions, speed, heading and trails, with race replay for coaching and review.

Public regatta pages / In development

One promoted link, embedded into the club website, is intended to bring schedules, documents, automatically published results, series standings and live tracking together for skippers, crew and the public.

Sponsor exposure / Planned scope

Branding and advertising placements within race viewing offer a potential sponsorship opportunity. Availability, placement and commercial terms need agreement.

Explore: sailpro.app/sailpro-for-clubs

Start tracking. At the right moment.

FleetStart gives the Race Officer control over when competitors begin transmitting their location. Tracking starts automatically with the first live countdown sent from FleetStart in RaceControl.

01 / Prepare the race

Create and open the race, then configure the countdown in advance. This does not trigger competitors' phones.

02 / Competitors join

Sailors enter the race in SailPro. They do not need to manually start location transmission.

03 / Send the countdown

The first live countdown automatically starts location transmission for entered competitors.

SailPro app shown.
FleetStart is controlled
through RaceControl.

Less setup. Cleaner race tracks.

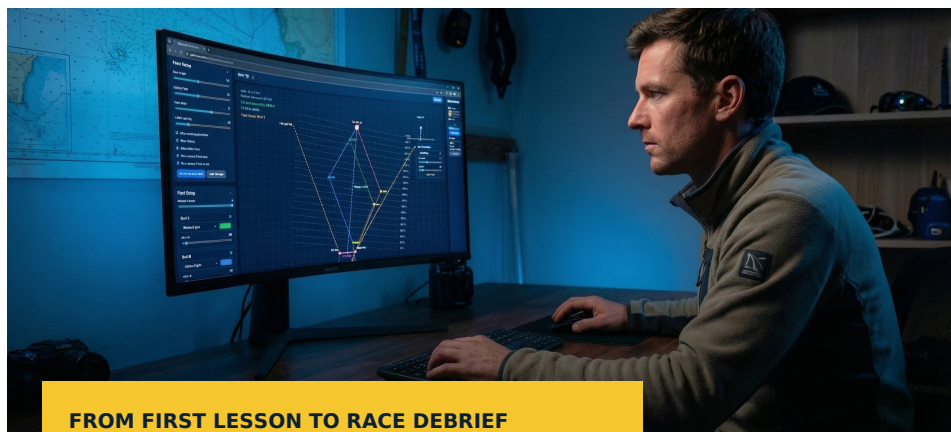

Reduce unnecessary tracking, save battery and support privacy, with less post-race trimming.

LEARNING ON AND OFF THE WATER

Make tactics easier to explain.

Use SailPro SIM to explore start-line bias, laylines, wind shifts and fleet tactics. It gives coaches and sailors a visual way to discuss decisions before taking them onto the water.

Recreate protest scenarios and support race committee training. Use a PC, laptop, Smart TV or large-screen display for the best simulator experience.

RaceHub protest management / Future release

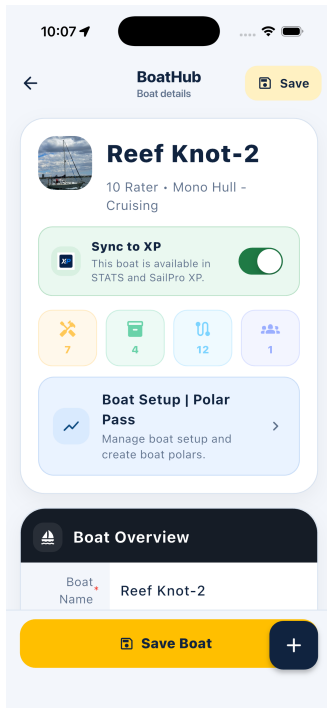

Planned workflow: protest lodgement, supporting documents, hearing schedules, decisions and resulting scoring updates.

Explore: sailpro.app/racing-simulator

FOR OWNERS AND CLUB FLEETS

Your boat. Everything together.

For racers and cruising owners alike, BoatHub puts boats and their information in one place. Connect profiles, crew, equipment, maintenance and trip records with your sailing activity.

Know your boat

Organise boat details, sail numbers and class information.

Keep useful records

Maintain an accessible record of crew, inventory, servicing and trips.

Support club operations

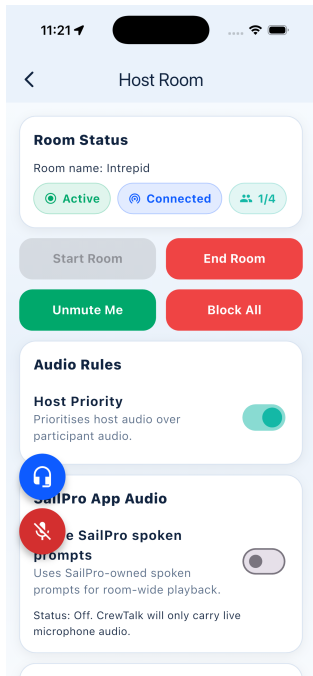

Manage club boats, rescue vessels and training fleets, including bookings and digital records.

The free app can view existing records. Adding records and using Boat Setup or Polar tools requires SailPro-X.

Explore: sailpro.app/boathub

CONNECTED ONBOARD

Keep your crew in the conversation.

CrewTalk creates a two-way audio room for up to four SailPro users, using mobile phones and Bluetooth-connected headsets.

Share the countdown, speed over ground and course over ground audio. The host can manage the room with priority, mute and block controls.

Local rooms and shared SailPro prompts are included in the free feature list.

AnchorMe: a GPS anchor watch

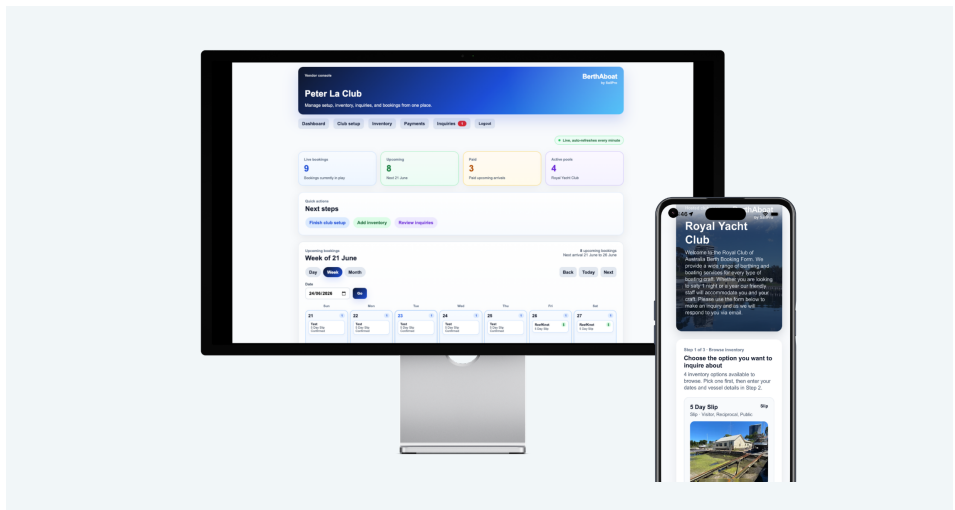

Set an anchor-watch radius. Free access uses 20 m; SailPro-X offers an adjustable radius up to 500 m. Not for navigational use.

Explore: sailpro.app/crewtalk

FROM ARRIVAL TO DEPARTURE

Make berthing simpler to manage.

BerthABOat gives yacht clubs an online platform for marina berths, visitor bookings and hardstand spaces. Members can book from a phone or computer while the club manages availability.

Bookings and availability

Manage member and visitor reservations through a visual calendar.

Yard and payments

Coordinate maintenance spaces and accept online payments for bookings.

Explore: sailpro.app/berthaboat

SEE IT FOR YOURSELF

Start free. Grow with your sailing.

Download SailPro for iOS or Android and create your account. Explore the essentials, then choose the advanced features and club services that suit your requirements.

Get SailPro

sailpro.app

Free essentials include timer basics, speed and compass information, basic weather, CrewTalk and selected course tools.
