Conditions :

1. Operation of this equipment shall be conducted in accordance with all data and specifications submitted with the application under which this permit is issued unless otherwise noted below.
2. This equipment shall be properly maintained and kept in good operating condition at all times.
3. This spray booth shall not be operated unless all exhaust air passes through filter media at least 2 inches thick.
4. A gauge shall be installed and maintained to indicate, in inches of water, the static pressure differential across the exhaust filters. In operation, the pressure differential shall not exceed 0.25 inch of water.
5. This equipment shall be operated in compliance with Rules 1136 and 1171.
6. Materials used in this equipment shall not contain any carcinogenic air contaminants identified in Rule 1401, Table I as amended on September 1, 2017, or earlier, except for ethyl benzene (CAS No. 100-41-4).
7. The content of ethyl benzene present in any material used in this equipment shall not exceed 1% by weight, as supplied.
8. The total quantity of any coating or any other material containing ethylbenzene used in this equipment shall not exceed 656 gallons in any one calendar year, as supplied.
9. The total quantity of Volatile Organic Compound (VOC) emissions from all permitted equipment and associated operations at this facility shall be less than 667 pounds in any one calendar month. Associated operations include, but are not limited to, surface preparation, manual staining, equipment clean-up, and the application of any other materials to parts that are previously or subsequently processed in the permitted equipment.

10. In addition to the record keeping requirements of Rule 109, the operator shall keep adequate records for this equipment and facility to verify the calendar monthly VOC emissions in pounds and the VOC content of each material as applied (including water and exempt compounds). In addition, monthly and yearly records shall be kept to verify compliance with Condition No. 8. These records shall be prepared in a format which is acceptable to the District.
11. Within 14 calendar days after the end of each month, the operator shall total and record VOC emissions for the month for all equipment covered by the monthly limit. The record shall include any procedures used to account for control device efficiencies and/or waste disposal. It shall be signed and certified for accuracy by the highest ranking individual responsible for compliance with District rules.
12. The operator shall maintain a single list which includes only the name and address of each person from whom the facility acquired VOC-containing material regulated by the District that was used or stored at the facility during the preceding 12 months.
13. The operator shall retain all purchase invoices for all VOC-containing material used or stored at the facility, and all waste manifests for all waste VOC-containing material removed from the facility for 24 months.
14. All records required by this permit shall be retained at the facility for 24 months, and shall be made available to any District representative upon request.
15. Safety Data Sheets (SDS) for all coatings and solvents used at this facility and subject to District rules shall be kept current and made available to District personnel upon request.
16. This permit shall expire if construction of this equipment is not complete within one year from the date of issuance of this permit unless an extension is granted by the Executive Officer.
