ABOUT INSPECTA

Inspecta Inspection Services Corporation is a 100% Filipino owned company specialized in the consulting services for Engineering Inspection, Non-Destructive Testing (NDT), and all other industrial inspections.

Headed by its founder, President and General Manager - Antonio B.C De Castro, who is a certified NDT Level III by the *American Society for Non-Destructive Testing (ASNT)*, Inspecta Inspection Services Corp. values integrity by conducting Engineering and NDT inspections with safety, accuracy, efficiency and honesty.

In our attitude towards quality and customer service, we are dedicated to being very competitive, that's why we are ranked excellent in our business. Quality is not just another objective; it is our fundamental strategy for our company's continuous growth.

OUR MISSION

Our pledge is to establish lasting relationships with our customers by exceeding their expectations and gaining their trust through exceptional performance by every member of the INSPECTA team. In doing this, we will deliver operational excellence in every corner of the company and meet or exceed our commitments to the many constituencies we serve — including ourselves.

OUR VISION

We at INSPECTA are striving to provide our customers with the highest standard of quality and integrity possible. With dedication to our principles, commitment to our customers and acknowledgement of our limitations, INSPECTA will ultimately achieve this goal.

OUR MISSION AND VISION ARE ACHIEVED THROUGH:

- Innovations in all areas of business.
- Partnerships with our customers, subsidiaries, representatives, distributors, and suppliers.
- Dedicated well trained employees working together in a competitive environment.

STRATEGIC DIRECTION

- We will provide the infrastructure, organizational alignments and work environment to effectively support our business.
- We will grow our business through market-driven approach to provide the most advance and innovative inspection/testing protocols and services.
- We will achieve the highest standards in each area of our business to optimally satisfy our customer's needs and be recognized as the industry leader.

CORE VALUES

These values guide our daily decisions to promote achievement of our vision.

1. Focus on Customers

Build relationships with internal and external customers. Be honest and timely with our commitments and actions.

2. Respect

Be open-minded. Appreciate other points of view. Recognize each other contributions. Encourage individual and organizational development.

3. Be Accountable

Step up to issues with honesty and personal courage. Take responsibility and lead by example.

4. Work Together

Achieve better results through collaborative efforts and collective intelligence.

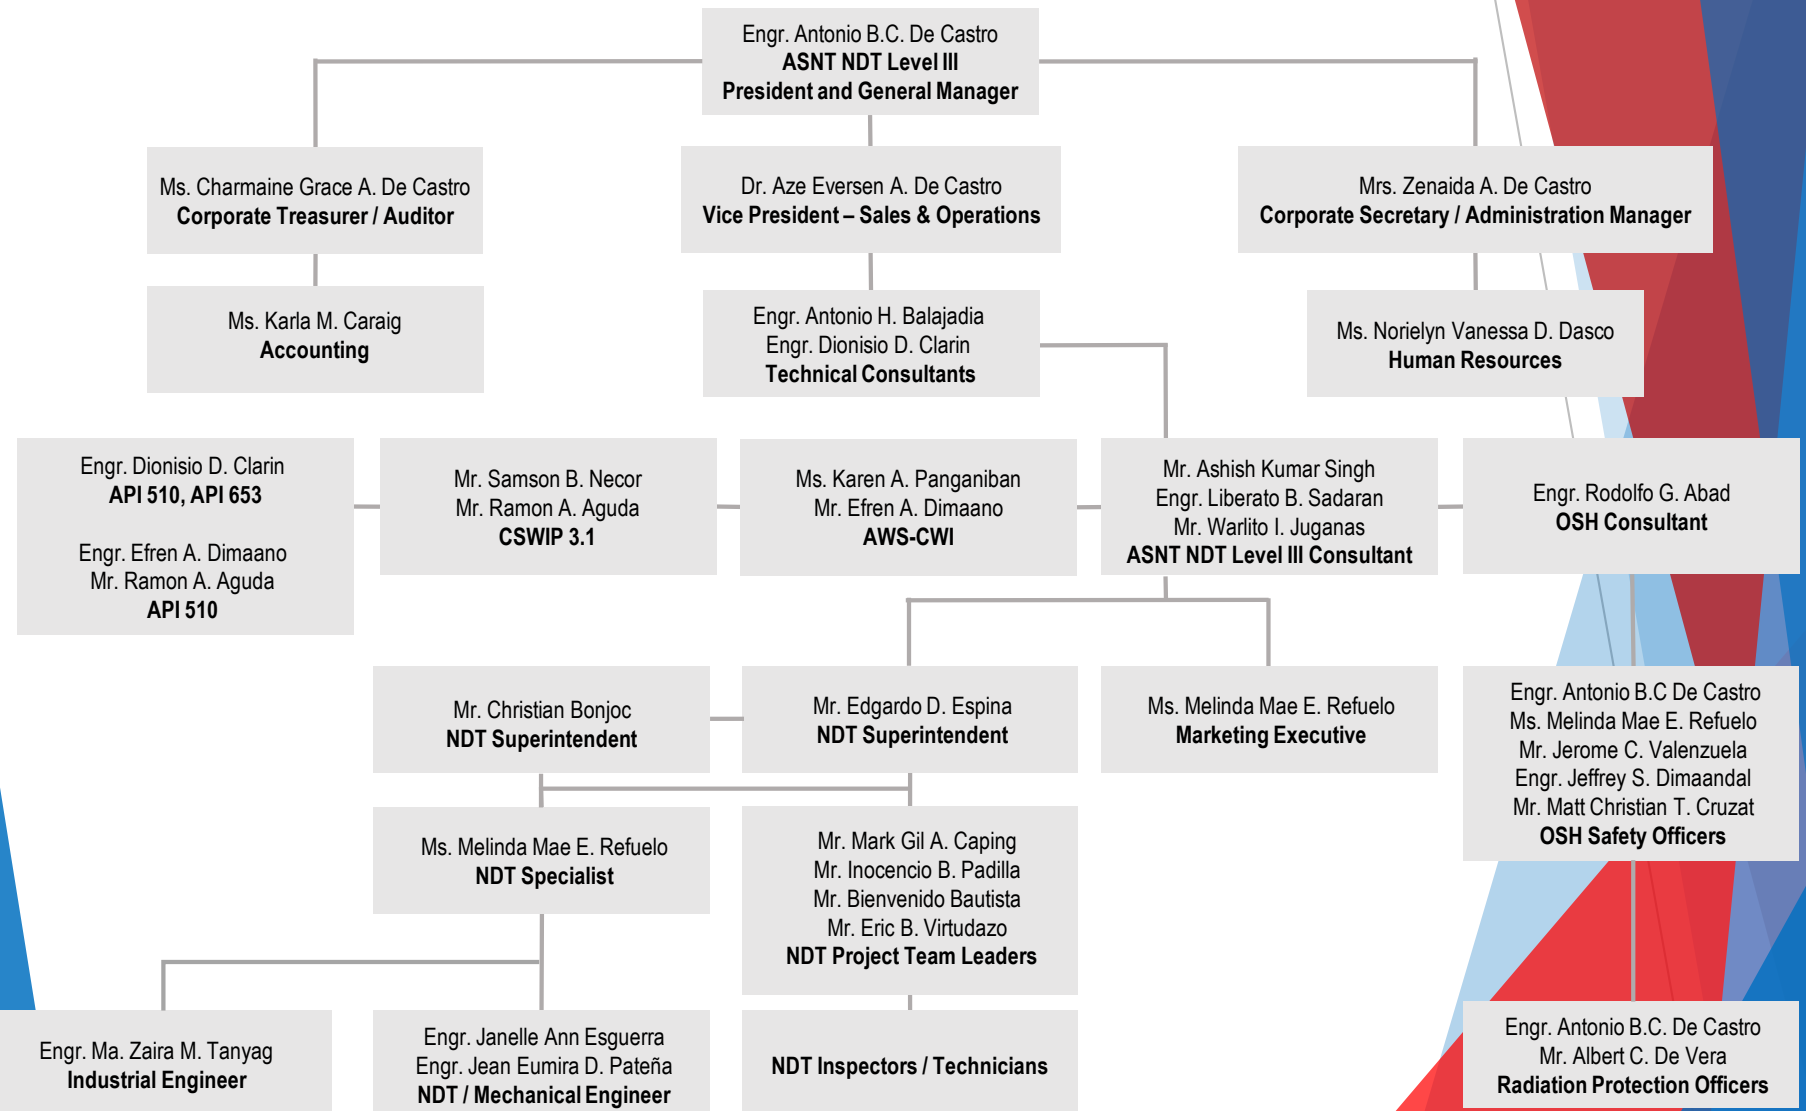

QUALITY POLICY

“INSPECTA is committed to provide its customers with excellence in service through continual improvement that focuses on accurate and timely reporting of results”

This policy has been formulated and approved by company's executive team. The policy is explained and discussed at general orientation training given to all employees. The policy is also posted in conspicuous locations throughout the company.

In the implementation of this policy, all employees of the company share the responsibility to ensure the highest quality. Quality system and program requirements are established to ensure that all company personnel follow appropriate procedures throughout entire life cycles of our services.

ORGANIZATIONAL CHART

OUR SERVICES

CONVENTIONAL NON-DESTRUCTIVE TESTING

ULTRASONIC TESTING (UT)

is a method of characterizing the thickness or internal structure of a test piece through the use of high frequency sound waves. Ultrasonic testing is a very sensitive test method for detection of embedded discontinuities / imperfections either on welds or material. It is fast, economical and results are highly repeatable and reliable.

RADIOGRAPHIC TESTING (RT)

is an important part of the inspection and development process within the non-destructive testing industry. The technique is commonly used on welded parts, castings, forgings, composites and is also used for corrosion mapping and the measurement of wall thickness.

MAGNETIC PARTICLE TESTING (MT)

is a non-destructive testing (NDT) method for detecting surface and subsurface discontinuities in ferromagnetic materials such as iron, nickel, and cobalt or some of their alloys. Magnetic Particle Testing is a fast, simple, inexpensive and highly portable NDT technique for detecting fine or shallow surface cracks in pipes and fixtures made of ferromagnetic material. It is a versatile evaluation technique that can be used to detect imperfections on test specimens of widely varying shapes and sizes.

DYE PENETRANT TESTING (PT)

is a simple, inexpensive and reliable non-destructive inspection method for detecting discontinuities which are open to the surface of the item to be inspected. It can be used on metals and other nonporous materials. With the proper technique, it will detect a wide variety of discontinuities ranging in size from those readily visible down to the microscopic level, as long as the discontinuities are open to the surface and are sufficiently free of foreign material.

OUR SERVICES

ADVANCED NON-DESTRUCTIVE TESTING

PHASED ARRAY ULTRASONIC TESTING (PAUT)

Is an advanced method of ultrasonic testing (UT) and is widely used for non-destructive testing (NDT) in several industrial sectors, such as construction, pipelines, and power generation. This method is an advanced NDT method that is used to detect discontinuities i.e. cracks or flaws and thereby determine component quality.

TIME-OF-FLIGHT DIFFRACTION (TOFD)

can be used for a variety of applications, its primary use is rapid weld testing of circumferential and axial weld seams, also known as perpendicular TOFD scanning. Since the introduction of TOFD in the 1970s, the use of this reputed reliable nondestructive testing technique has steadily increased.

LONG RANGE ULTRASONIC TESTING (LRUT)

is an advanced non-destructive examination technique that was developed for testing large volumes of material from a single test point. What differentiates this from more traditional methods of ultrasonic testing is that, with LRUT, a liquid couplant between transducers and the surface is not required. For this reason LRUT is one of the fastest inspection tools for carrying out pipeline surveys for corrosion and other damage mechanisms.

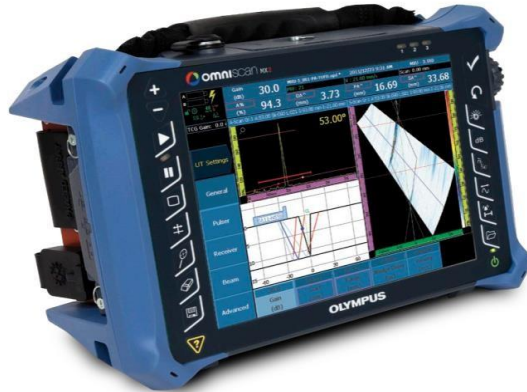

EDDY CURRENT TESTING (ECT)

is one of several non-destructive testing methods that uses the electromagnetism principle for flaw detection in conductive materials. A specially designed coil energized with an alternating-current is placed in proximity to the test surface, generating a changing magnetic field that interacts with the test-part and produces eddy currents in the vicinity. Variations in the changing phases and magnitude of these eddy currents are then monitored through the use of a receiver-coil or by measuring changes to the alternate current flowing in the primary excitation-coil.

INTERNAL ROTATING INSPECTION SYSTEM (IRIS)

is an effective nondestructive examination technique used to detect and size internal and external erosion, corrosion, pitting, denting, and fretting in pipes and tubing. It can also detect bulges, restrictions, remaining wall thickness, channeling, and tube sheet defects. IRIS is used to inspect many types of process equipment, including feed water heaters, air fin coolers, condensers, boilers, heat exchangers, process piping, loading lines, and product flow lines.

OTHER SERVICES WE OFFER

- Welder Qualification Test (WQT)
- Visual / Welding Inspection
- Tank Requalification
- Third Party Inspection
- On Stream Inspection (OSI)
- Out of Service Inspection (OOSI)
- Sandblasting & Painting Inspection
- Vacuum / Leak Testing
- NDT Level II Training and Qualification
- ASNT Level III Services
- Civil Works Inspection
- Post Weld Heat Treatment (PWHT)
- Hardness Testing
- Rope Access
- Calibration of NDT instruments & issuance of Calibration Certificates

RENTAL / SUPPLY OF NDT EQUIPMENT

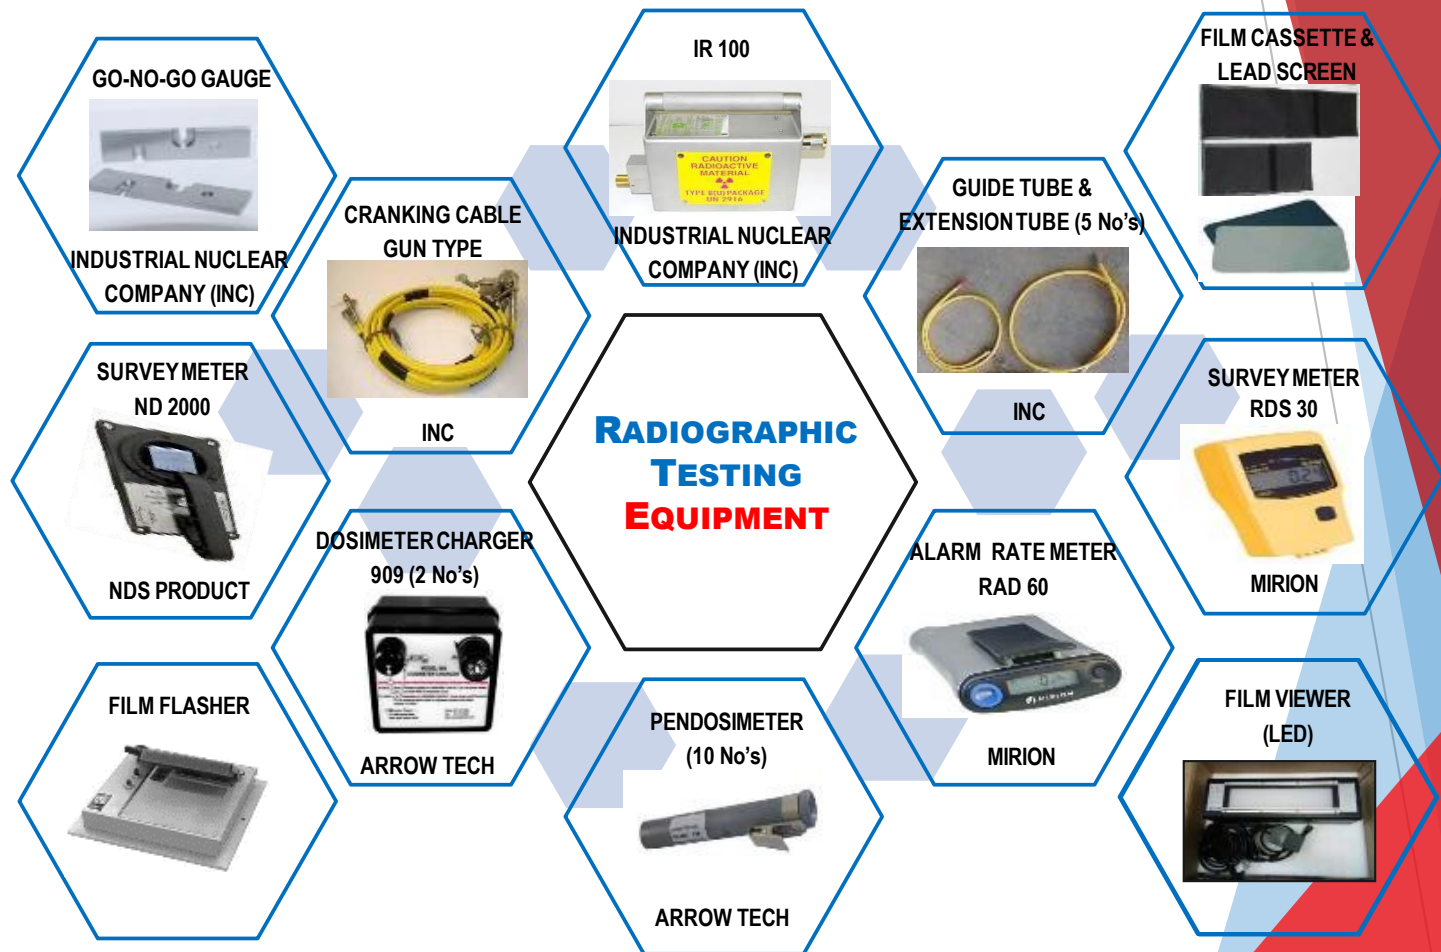

- UT Machines / Probes / Calibration Block (Flaw Detection / Thickness Gauging)
- Wet Fluorescent Magnetic Particle (WFMT) Testing Equipment (Magnetic Yoke & Ultraviolet Light)
- Radiographic Testing Projector and Accessories
- Liquid Penetrant Testing Chemicals & Consumables
- Magnetic Particle Testing Chemicals & Consumables
- Radiographic Film Processing Chemicals (Developer & Fixer) & Consumables

has attended the

**DNV's TRAINING PROGRAM:
 ONE DAY INTRODUCTION TO QUALITY
 MANAGEMENT & ISO 9000:2000**

Conducted in-house for Belleli Saudi Heavy Industries Ltd. (BSHI) at Jubail,
 Kingdom of Saudi Arabia on 26th November 2002

Main topics covered were:

- Introduction to Quality Management.
- The ISO 9000 series of documents.
- Introduction to ISO 9001.
- Quality system structure and documentation.
- How to develop a Quality System.

Dubai/30th November 2002

INTRODUCTION

VETCO SAUDI ARABIA LTD were requested by BELLELI SAUDI HEAVY IND.CO. to conduct A.S.N.T. examinations on their behalf using Vetco's appointed Level III examiner Mr D.H. Amos. The following Belleli personnel were put forward for examination.

NAME	LEVEL	DISCIPLINE
Mr A.B. C.De Castro	Level II	RT/MT/PT/UT
Mr Thomas Kutty K.K.	Level II	MT/PT/UT
Mr Saadard Khumfongkrua	Level I	RT/MT/PT
Mr Amad Pundjuntuk	Level I	RT/MT/PT

The required examinations were commenced on Saturday the 3/11/90 at the Belleli main workshops in Jubail. Typical A.S.N.T. questions were used for the written tests and the practical tests were supplemented by an oral examination to fully assess the candidates practical ability. The results of the examinations are included overleaf.

 OF
 AMENDED ARTICLES OF INCORPORATION

KNOW ALL PERSONS BY THESE PRESENTS:

THIS IS TO CERTIFY that the amended articles of incorporation of the

INSPECTA INSPECTION SERVICES CORP.
 (Amending Article II by adding Secondary Purpose thereof)

copy annexed, adopted on July 1, 2020 by a majority vote of the Board of Directors and by the vote of the stockholders owning or representing at least two-thirds of the outstanding capital stock, and certified under oath by the Secretary and a majority of the Board of Directors of the corporation was approved by the Commission on this date pursuant to the provision of Section 15 of the Revised Corporation Code of the Philippines, Republic Act No. 11232, which took effect on February 23, 2019, and copies thereof are filed with the Commission.

Unless this corporation obtains or already has obtained the appropriate Secondary License from this Commission, this Certificate does not authorize it to undertake business activities requiring a Secondary License from this Commission such as, but not limited to acting as: broker or dealer in securities, government securities eligible dealer (GSED), investment adviser of an investment company, close-end or open-end investment company, investment house, transfer agent, commodity/financial futures exchange/broker/merchant, financing company, pre-need plan issuer, general agent in pre-need plans and time shares/club shares/membership certificates issuers or selling agents thereof. Neither does this Certificate constitute as permit to undertake activities for which other government agencies require a license or permit.

IN WITNESS WHEREOF, I have hereunto set my hand and caused the seal of this Commission to be affixed to this Certificate at Pasay City, Metro Manila, Philippines, this 20 day of September, Twenty Twenty.

REMNDS:

1. An annual registration fee shall be paid upon registration and every year thereafter on or before the last day of January, using BIR Form No. 0605.
2. Filing of required tax returns to conform with the above tax types, whether with or without business operation, to avoid penalties.
3. For new business registrants, application for registration of manual Books of Accounts (BiAs) shall be before the deadline for filing of the initial quarterly income tax return or annual income tax return whichever comes earlier, from the date of registration. Registration of new set of manual BiAs shall be before its use.
4. Immediately inform the district office in case of transference of business and other changes in registration information by filing BIR Form No. 1905.
5. For Self-Employed Individuals (SEI) whose gross sales and/or receipts and other non-operating income does not exceed P3,000,000 and who opted to avail of the 8% income tax rate, the tax type Percentage Tax (PT) shall not be reflected in the Certificate of Registration (COR). However, at the start of each taxable year, such SEI shall be automatically subjected to graduated income tax rates and required to file quarterly percentage tax return (BIR Form No. 2551Q) and option to replace the COR to reflect "PT", unless qualified and opted to avail of the 8% income tax rate annually.

**CERTIFICATE OF
Recognized Service Supplier**

This is to certify that

INSPECTA INSPECTION SERVICES CORP.

located at

156 San Agustin, Ibaan, Batangas, Philippines

having been audited by ABS and having given a satisfactory practical demonstration of the service listed below, is recognized by ABS as a Service Supplier to provide services which ABS Surveyors may rely on to make decisions affecting classification or statutory surveys.

Nondestructive Inspection

Attached Certificate Appendix provides specific scope of approval, authorized personnel, manufacturer authorizations, and subcontractors.

It is the responsibility of the Service Supplier to employ, train and qualify persons in the service provided. If the service requires approval from manufacturers, the Service Supplier is responsible to maintain contact with the manufacturer and maintain any service manuals up to date. Where required by the category of service, the Service Supplier shall provide valid evidence that it is authorized or licensed by the equipment manufacturer to service the makes and models of equipment for which approval is sought. If approval from the manufacturer is not attained, a surveyor must be present at time of survey to continue work. Alternatively, current written instructions from the flag state are to be obtained to continue work without the surveyor present. Service Suppliers must present photo identification, evidence of qualification and authorizations from manufacturers, as applicable, at the time of service.

The ABS office issuing this certificate is to be kept updated with changes to the management of the company, employees, equipment and models on the authorization list and any changes made.
