

COVID FATALITY AND HOSPITALIZATION RATES

**"The only thing we have to fear is fear itself -
nameless, unreasoning, unjustified terror which paralyzes
needed efforts to convert retreat into advance."**

- Franklin Delano Roosevelt

Covid Fatality and Hospitalizations Rates

I. Fatality Rates

According to every independent and legitimate immunological study, the overall fatality rate of covid is 0.05% to 0.2% - which is most closely comparable to the medium influenza pandemics of 1936, 1957 and 1968. Covid is actually only 1/10 as deadly as advertised by the news media and politicians - and government-paid "experts" who depend on the government for their livelihoods. The fatality rate is lower for people under 60, and increases with increasing age.

"The pre-vaccination case fatality rate was extremely low in the non-elderly population. The largest burden of COVID-19 is carried by the elderly, and persons living in nursing homes are particularly vulnerable. However, 94% of the global population is younger than 70 years and 86% is younger than 60 years."

Dr. Thomas Binder is a Swiss cardiologist, board member of Doctors for Covid Ethics, Aletheia – Medicine and Science for Proportionality, and member of the Corman-Drosten Review Report. He summarizes the covid-19 narrative perfectly:

“There has been no epidemic of COVID-19 of national scope in any country, no pandemic internationally for the general population. SARS-CoV-2 is not a killer virus, and it is the same in every country.

“The prevailing corona narrative is this: Since early 2020, there is a pandemic of a perennial killer virus, that must be searched for with the Corman-Drosten RT-PCR test in everybody, that is even spreading epidemiologically relevantly asymptotically, against which there is no basic or cross-immunity, whose provoked disease, COVID-19, is barely treatable, which is becoming increasingly infectious and dangerous due to erratic mutations, and which can only be overcome by non-pharmacological measures that have never been applied before, such as antisocial distancing, masks in public sphere, contact tracing, isolation, quarantine, school closures and curfews, nowadays called lockdowns, even for asymptomatic, previously called healthy, people, and by serial vaccination of the entire world population.

“All myths of the prevailing corona narrative are made up out of a fact-free vacuum.”

Dr. Binder details the 10 myths surrounding covid. He then provides the true science and facts about covid.

Dr. Patrick Provost, an infectious and immune diseases researcher at Laval University in Quebec City, Canada, states:

“This mortality rate is greatly overestimated, mainly (i) by including, in the numerator, deaths with, and not because of, COVID-19, which were apparently as numerous, and (ii)

by excluding, in the denominator, cases of asymptomatic or unreported infections, which were several times higher than the reported symptomatic infections.”

From PANDA (Pandemic Data & Analytic):

“SARS-CoV-2 presents a negligible risk to the great majority of the world’s population. It primarily poses a risk to elderly, metabolically unhealthy and immunocompromised individuals. Many individuals already had a degree of immunity acquired through previous encounters with similar viruses. Moreover, those infected develop further natural immunity against severe disease, which appears to be more flexible and durable than any protection acquired through the Covid-19 vaccination.”

<https://www.pandata.org/review-covid-vaccines-oct2022/>

From Dr. Paul Alexander, Epidemiologist:

“We argue that without any government intervention, with nothing, had our governments done nothing, just strongly protect the elderly and vulnerable and allow the rest of the low-risk healthy population to live unfettered normal lives taking reasonable precautions (no lockdowns, no school closures, nothing), that covid is and was just a regular influenza-like illness. There was never EVER a pandemic, never met the threshold of a pandemic and we were lied to deliberately for nefarious reasons by governments. We knew 2 weeks out that the risk of survival was 99.998% for those 70-75 years old and below! Zero child in US died across 3 years if infected! life expectancy 79 yrs, median age of COVID death is 83”

From the Great Barrington Declaration, signed by over 60,000 doctors and medical scientists:

“We know that vulnerability to death from COVID-19 is more than a thousand-fold higher in the old and infirm than the young. Indeed, for children, COVID-19 is less dangerous than many other harms, including influenza.”

These are representative of the thousands of doctors who have called out the falsely inflated fatality rates that have been published in the media and by government officials in many nations, including Europe and the US.

FALSELY INFLATED DEATH COUNTS

So much fear has been manufactured over covid because of the large numbers of people reported hospitalized and dead from the virus.

These hospitalization and death counts have been falsely inflated - greatly.

“The Emperor Has No Clothes: COVID Math Simply Doesn’t Add Up. 18 months of COVID-related health data show the numbers promulgated by public health officials and mainstream media vastly overstate the risk of COVID.”

Children’s Health Defense Report

<https://childrenshealthdefense.org/defender/covid-health-data-mainstream-media-vaccine-risks/>

“World Health Organization (WHO) told governments to code deaths as Covid ones, even without the virus present.”

<https://gerardrennick.com.au/who-covid-deaths-code-lie/>

https://rwmalonemd.substack.com/p/its-evil-to-fake-deaths-to-panic?utm_source=substack&utm_medium=email

In the US, the actual number of covid deaths is approximately 25% of the reported “confirmed” number - in other words, only 25% or fewer of the reported number of deaths were from covid.

In the UK the actual number of deaths is only 30-40% of those reported.

Over-counting has been done in many other nations as well, such as Italy, Ireland and Germany.

In the US, falsely inflated hospitalization and death counts have been legitimized and even advised by the CDC.

If the CDC used the same industry standard for listing cause of death - the Medical Examiners’ and Coroners’ Handbook on Death Registration and Fetal Death Reporting Revision 2003 - as they had for the 17 years prior to the pandemic, covid death counts would be fewer than 250,000 in the US - with over 85% of those being people over the age of 70.

In a nation of over 330,000,000 people, this is not considered a “deadly pandemic.”

- ▶ In early 2020, the CDC changed their cause-of-death guidelines, telling doctors to list covid as cause of death even on symptoms alone.

<https://www.cdc.gov/nchs/data/nvss/coronavirus/Alert-2-New-ICD-code-introduced-for-COVID-19-deaths.pdf>

<https://www.lewrockwell.com/2021/04/joseph-mercola/cdc-violated-law-to-inflate-covid-cases-and-fatalities/>

- ▶ Here are excerpts right from the CDC website:

“... when coronavirus cases are suspected, it is acceptable to report COVID-19 on a death certificate.”
“In cases where a definite diagnosis of COVID-19 cannot be made, but it is suspected or likely (e.g., the circumstances are compelling within a reasonable degree of certainty), it is acceptable to report COVID-19 on a death certificate as ‘probable’ or ‘presumed.’”

This gave doctors and hospitals a legal license to call many deaths as covid even though covid wasn't the cause of death.

<https://www.lewrockwell.com/2021/02/bill-sardi/cdc-sleight-of-hand-revealed-in-covid-19-death-rates/>

- ▶ Dr. Annie Bukacek tells the extent of falsely labeled covid deaths by the CDC in this video:

https://www.youtube.com/watch?v=_5wn1qs_bBk&list=WL&index=173&t=369s

- ▶ The CDC started lumping together all flu, pneumonia and covid deaths as one category - and all such deaths are counted as covid. This is right on the CDC's own website. From the CDC website:
 - *Deaths with confirmed or presumed COVID-19, coded to ICD-10 code U07.1.*
 - *Counts of deaths involving pneumonia include pneumonia deaths that also involve COVID-19 and exclude pneumonia deaths involving influenza.*
 - *Counts of deaths involving influenza include deaths with pneumonia or COVID-19 also listed as a cause of death*
 - *Deaths with confirmed or presumed COVID-19, pneumonia, or influenza, coded to ICD-10 codes U07.1 or J09-18.9.*
- ▶ Here's a short excerpt from the CDC website on Dec. 11, 2020: *“... the percentage of emergency department (ED) visits for COVID-like illness (CLI) decreased slightly during week 49. The percentage of deaths due to pneumonia, influenza and COVID-19 (PIC) has been increasing since October.”*

Notice how they lump together flu, pneumonia and covid. Also note their phrase “COVID-like illness.”

https://www.cdc.gov/nchs/nvss/vsrr/covid_weekly/index.htm

- ▶ Dying *with* covid isn't the same as dying *from* covid. “Confirmed covid deaths” are greatly exaggerated because of “dying with covid” even if covid didn't cause the death. And in many cases, covid wasn't even tested for, but were listed as covid deaths because of symptoms only!
- ▶ Here's just one example of how the CDC cause-of-death changes were used to justify falsely inflated covid deaths. Dr. Ngozi Ezike, director of Illinois Department of Public Health, said this in a press conference: *“The case definition is very simplistic. That means, that if you were in hospice and had already been given a few weeks to live, and then you also were found to have covid, that would be counted as a covid death. It means, technically even if you died of clear alternative cause, but you had covid at the same time, it's still listed as a COVID death. Everyone who is listed as a COVID death, doesn't mean that was the cause of the death, but they had COVID at the time of death.”*

https://www.youtube.com/watch?v=ljpHugKNcoI&feature=emb_logo

<https://www.youtube.com/watch?v=qwkDJ7PSLvQ>

- ▶ Many other deaths were also listed as covid, when people weren't even tested for covid, thanks to the CDC re-definition of cause-of-death. Medical examiners in Michigan use the same definition. In Macomb and Oakland Counties, where most of the deaths occurred, medical examiners classify any deaths as Coronavirus deaths when the postmortem test is positive. Even people who died in suicides and automobile accidents meet that definition. New York is classifying cases as Coronavirus deaths even when postmortem tests have been negative. Despite negative tests, classifications are based on symptoms, even though the symptoms are often very similar to those of the seasonal flu.
- ▶ Nearly all hospitals applied this same definition as Dr. Ezike described. Hundreds of thousands of terminally ill people - terminal from other causes - were listed as covid deaths, even though covid had nothing to do with their deaths. Those people were going to die, that's what terminal means.
- ▶ Dr. Deborah Birx also said, ***"If someone dies with COVID-19, we are counting that as a COVID-19 death."*** EVEN IF SOMETHING ELSE CAUSES YOUR DEATH!
- ▶ Dr. Birx and others state that the CDC's "antiquated" accounting system is double counting cases and inflating mortality and case counts by as much as 25%.

- ▶ All this gave doctors and hospitals a legal license to call many deaths as covid even though covid wasn't the cause of death. Many hospitals and doctors labeled deaths as covid, even when postmortem tests have been negative. Doctors were pressured to go by symptoms only, even though the symptoms are often very similar to those of the flu. This was made legal and acceptable by the CDC. But why? MONEY!
- ▶ Here is a representative example of one doctor's experience: *"The straw that broke the camel's back for me was when I had finished working up a nursing home outbreak. Every resident was screened including the residents dying on hospice. Two of the hospice patients tested positive, and when they died a day or two later of their advanced Alzheimer's, I was sent their info to sign off on as a COVID death. I told my supervisor I would not classify them as COVID deaths and wrote a long*

note to that effect in their charts. Despite my efforts, the cases were counted as deaths anyway. I resigned a month later.” (Dr. Dr. Eileen Natuzzi). This is what occurred all over the US and the world. Multiply this by tens of thousands of doctors, and the false death counts are enormous.

<https://brownstone.org/articles/the-courage-to-dissent-from-the-left/>

- ▶ There are financial incentives. Dr. David Brownstein explained that *“Hospitals receive ...up to \$13,000 from the Government for an admission diagnosis of COVID. If the patient is ventilated, they receive up to \$39,000. I can guarantee you that hospital administrators are running around telling every physician and resident physician to diagnosis COVID at the first cough or sneeze.”* The CARES Act adds a 20 percent premium for COVID-19 Medicare patients.

- ▶ Dr. Mark Sircus: *“Everyone dies of COVID; that’s where the money is for hospitals, at least in the United States. Though warnings never stop about the dangers of antibiotic-resistant bacteria and killer fungus infections that make COVID look like a walk in the park, not a word is printed in the media about people killed by these other infections.”*

- ▶ The CDC reported that over 94% of people who died with covid ALSO had an AVERAGE of 2-3 co-morbidities. From the CDC website: *“For 6% of the deaths, COVID-19 was the only cause mentioned. For deaths with conditions or causes in addition to COVID-19, on average, there were 2.6 additional conditions or causes per death.”* This means these people had 2-3 other serious medical conditions that contributed to their deaths. So it was the COMBINATION of covid and other serious medical conditions that caused the deaths of 94% of people who were reported as dying with covid.

- ▶ Many patients have several concurrent infections, not just COVID-19.
- ▶ “People who have very low white blood cell counts from chemotherapy might be admitted because of bacterial pneumonia or foot gangrene,” Dretler was quoted as saying. “They may also have COVID, but COVID is not the main reason why they’re so sick.”
- ▶ Former CDC director Robert Redfield admitted that financial policies resulted in artificially elevated hospitalization rates and death toll statistics, that hospitals have a monetary

incentive to overcount coronavirus deaths. "I think you're correct in that we've seen this in other disease processes, too. Really, in the HIV epidemic, somebody may have a heart attack but also have HIV - the hospital would prefer the [classification] for HIV because there's greater reimbursement." (Redfield said this during a House panel hearing when asked by Rep. Blaine Luetkemeyer about potential 'perverse incentives'.)

- ▶ **Dr. Robert Malone:** "For political reasons, these deaths were all generally been lumped together as "Covid deaths, but this coding was appallingly sloppy. This examination concludes that, contrary to popular belief, there was no uniquely deadly strain or variant emanating out of New York in spring 2020. On the contrary, over 30,000 Americans appear to have been killed by mechanical ventilators or other forms of medical iatrogenesis throughout April 2020, primarily in the area around New York."

https://rwmalonemd.substack.com/p/30000-americans-estimated-killed?utm_source=email

- ▶ The NY Times reported that NYC falsely inflated covid deaths by 58.7%. "*The city included 3,700 additional people who were presumed to have died of the coronavirus but had never tested positive.*"
- ▶ Comments from funeral director in Queens: "*To be honest with you, all the death certificates they are writing COVID on all the death certificates whether they had a positive test or that they didn't. So I think, this is my personal opinion, I think like the mayor of our city, they are looking for federal funding, and the more they put COVID on a death certificate, the more they can ask for federal funds. So I think that it is political. So I am going to turn around and say not everybody who has COVID on their death certificate died of COVID. They are putting it on everybody's death certificate to make life easier for them ... I couldn't give you a number, but it's quite a lot.*"
- ▶ A Johns Hopkins study showed that covid-19 had far less effect on total deaths in the U.S. than was being pushed in the media and by politicians. The US population grew significantly, and has a large number of very elderly people. Many "excess deaths" were NOT because of covid, but for other reasons - such as undiagnosed and untreated worse diseases because of fear, lockdowns and restrictions. In other words, all the fear and government restrictions against the virus caused more illnesses and deaths than the virus itself.

<https://web.archive.org/web/20201126163323/https://www.jhunewsletter.com/article/2020/11/a-closer-look-at-u-s-deaths-due-to-covid-19>

- ▶ The health departments in San Diego County, LA County, Miami-Dade County, and the states of Pennsylvania, Washington and Oregon all officially reported that death counts were inflated by 25-40%.

- ▶ A Portuguese court showed that only 0.9% deaths of people with verified cases of covid, actually died from the virus. The studies showed that *“the number of verified COVID-19 deaths from January 2020 to April 2021 is only 152, not about 17,000 as claimed by government ministries.”* 0.9% of verified cases means that the actual fatality rate in Portugal is much lower, because several times more people have the virus than were verified. The actual fatality rate comes out to be around 0.1%.

- ▶ In Ireland, the government admitted that covid-19 was put on nearly every death certificate - even when covid was NOT the actual cause of death. This greatly inflated Ireland’s death counts by many times. And the number of covid hospitalizations were likewise false inflated in Ireland.

- ▶ In the UK: “NHS Director confirms Hospitals lied about Cause of Death to create illusion of COVID Pandemic. When four different diseases [are] grouped and now being called covid-19, you will inevitably see covid-19 with a huge death rate. The mainstream media was reporting on this huge increase in covid-19 deaths due to the Medical Examiner System being in place. Patients being admitted and dying with very common conditions such as old age, myocardial infarctions, end-stage kidney failure, hemorrhages, strokes, COPD and cancer etc. were all now being certified as covid-19 via the Medical Examiner System. Hospitals were switching to and from the Medical Examiner System and the pre-pandemic system as [and] when they pleased. When covid-19 deaths needed to be increased, the hospital would switch to the Medical Examiner System. “Hospitals were incentivised to report covid-19 deaths over normal deaths, as the government was paying hospitals additional money for every covid-19 death that was being reported.”

II. Covid Hospitalizations

Much has been written in the news media and spoken by politicians about the dangers of overcrowded hospitals because of covid-19. There have been many reports of many hospitals swamped with covid patients. Over 90% of these reports are either completely false, or exaggerated. Very few hospitals were overrun with covid at any point over the past 2 years. Those few that were, were overloaded for a short time. The truth is that 98% of all hospitals in the world experienced NO increases over previous years, and NO hospital was ever full or overloaded with only covid patients.

- ▶ In the US, very, very few hospitals were ever overloaded with covid patients.

- ▶ Hospitals have been at the same percentage of capacity throughout this pandemic as they are every year, seasonally. And the vast majority of people going to hospitals are going for other conditions and diseases, NOT covid. Some hospitals are short of staff and nurses, but that's because hospitals furloughed staff and nurses early in 2020, because they were so empty. Now they're scrambling to get those people back because of cold and flu season.
- ▶ There are 1 million hospital beds in the US. The media reported in December 2020 there were around 100,000 Covid patients in hospitals. This was a false statistic, it wasn't that high. But even using that inflated number, it means only 10% of hospital beds were taken up by Covid patients. The truth is that **hospital ICUs were and are at the same percentage of capacity then and now as they are every year at this time.**

- ▶ In 2020, a Navy hospital ship was sent to New York City to help deal with an expected surge in hospitalizations. The ship was turned back due to the lack of patients.
- ▶ In the UK, the BBC was reporting overloaded hospitals because of covid. Yet on Jan. 11, 2018, BBC reported that “patients are dying in hospital corridors” because hospitals had run out of beds and were overwhelmed. No difference now, except that BBC reports are misleading because the majority of hospital patients are NOT there because they’re sick from covid. The UK hospital system is a shambles, and has been declining for many years. If any UK hospitals are overloaded, it is because they are short on staff and beds, NOT because they are over-run with covid patients.

There is a deadly consequence of false positives for covid:

Dr. James Lyons-Weiler: “COVID-19 ‘rates’ must adjust for testing rates and the DEADLY false positive rate. UNLESS SEQUENCED TO CONFIRM OR ALSO TESTED FOR BACTERIAL PNEUMONIA, PEOPLE WILL DIE FROM PCR FALSE POSITIVE RESULTS! THE PROBLEM IS PEOPLE WITH OTHER RESPIRATORY ILLNESSES WILL BE TREATED AS COVID-19 AND WILL DIE FROM BACTERIAL PNEUMONIA. MOST PEOPLE WHO DIED ON VENTILATORS DIED FROM BACTERIAL PNEUMONIA. THEY WON’T RECEIVE ANTIBIOTICS AND OTHER TREATMENTS AND WILL DIE FROM SEVERE BACTERIAL PNEUMONIA AND SEPSIS.”

https://popularrationalism.substack.com/p/covid-19-rates-must-adjust-for-testing?utm_source=substack&utm_medium=email

The majority of infectious disease doctors, treating physicians and medical scientists agree that covid-19 is NOT nearly as deadly as all the news media and politicians want us to believe. Here are some quotes from some of the world’s leading doctors:

Dr. Geoffrey Wells

“The lockdown is causing more harm than good. If you’re under 65 years of age, then the chance of dying from the virus is markedly decreased, it’s about one in 150,000.”

Dr. John Ioannidis

“We know that 95% of the population has practically minimal risk... We show a fatality rate of 0.2-0.3%”

Dr. Harvey Risch, Yale Epidemiologist

“Overall, I’d say that we’ve had a pandemic of fear. And fear has affected almost everybody, whereas the infection has affected relatively few.”

Dr. Heiko Schöning

“We have a lot of evidence that it (the new coronavirus) is a fake story all over the world. Not that the virus is fake, but simply that it’s no more dangerous than the seasonal flu (or just as dangerous) and that there is no justification for the measures being taken to combat it. The corona panic is a play. It’s a scam. Swindle. It’s high time we understood that we’re in the midst of a global crime.”

Dr. John Lee

[Covid] overall has resulted in a similar number of fatalities to those we'd expect during a bad influenza season.”

Prof. Hendrik Streeck

“The new pathogen [covid-19] is not that dangerous, it is even less dangerous than Sars-1.”

Dr Andrew Kaufman MD

“The number of deaths was comparable to the seasonal flu...So why the fear mongering?”

Dr. Elke de Klerk

“We do not have a medical pandemic or epidemic. We now know that covid-19 is a normal flu virus. If there is no pandemic, why are our kids in schools with masks?”

Dr. Shira Miller

“Similar to CDC estimations, our analysis results in a COVID-19 [fatality rate] of 0.26%, which is comparable to the [rate] of previous seasonal and pandemic flu period. A COVID-19 vaccine should only be voluntary, in order to safeguard a patient’s human right to determine what will happen with his or her body.”

Dr Simon Thornley, Epidemiologist, University of Auckland

“Covid-19 is a nasty flu-like virus. It’s new, but not unique. The Ioannidis study shows that the death rate is only very marginally worse than the standard flu viruses that kill hundreds of sick and elderly New Zealanders every year. The response should be the measured one we had all planned for lower mortality pandemics, not lockdowns. We’ve sacrificed our humanity, our society, and our economy for the wrong virus. The fear and panic that has driven the response of many scientists, politicians, policymakers and media is unwarranted – even irrational.”

Lord Sumption

“I do not doubt the seriousness of the epidemic, but I believe that history will look back on the measures taken to contain it as a monument of collective hysteria and governmental folly.”

Ronald B. Brown, Ph.D. from the School of Public Health and Health Systems at the University of Waterloo stated that the COVID-19 fatality rate is the “worst miscalculation in the history of humanity.”

Top pathologist Dr. Roger Hodkinson

“[The current coronavirus crisis] is the greatest hoax ever perpetrated on an unsuspecting public. There is utterly unfounded public hysteria driven by the media and politicians, it’s outrageous, this is the greatest hoax ever perpetrated on an unsuspecting public. This is not Ebola, it’s politics playing medicine, and that’s a very dangerous game.”

Dr. Vernon Coleman

“Back in February and March, I called the [covid] panic a hoax. This wasn’t because I didn’t believe that the virus existed. I called it a hoax, and still believe it a hoax, because I believed that the threat of the coronavirus had been dramatically exaggerated. And that belief has never wavered and now the evidence supports my assertion.”

Prof. Sucharit Bhakdi

“We Need to Stop Following the Pied Piper on COVID. The time has come for homo sapiens to stand up and start becoming humans again. This scare, this global panic has caused man to lose reason, to stop thinking and to follow the Piper’s call, and we are being led to our downfall. This is the downfall of civilization.”

Dr. Mark McDonald, board-certified psychiatrist

“Americans are suffering from mass insanity due to their delusional fear of COVID-19. Healthy people should never wear masks, social distance or self-isolate. Not only are these strategies unhealthy from a physical standpoint, they also perpetuate the delusional psychosis gripping the nation and therefore must end. Even when the statistics point to the extremely low fatality rate among children and young adults (measuring 0.002% at age 10 and 0.01% at 25), the young and the healthy are still terrorized by the chokehold of irrational fear when faced with the coronavirus.”

Dr. Roger Hodkinson

“There is utterly unfounded public hysteria driven by the media and politicians, it’s outrageous, this is the greatest hoax ever perpetrated on an unsuspecting public.”

Dr. John Lee

“We know the death rate globally is very low, between 0.1 and 0.5% of those infected. We know that the majority of deaths occurred in people with pre-existing conditions and we also know that in England, the median age of those who died from Covid is above 80. Every death is sad but should the country have been brought to such an abrupt halt - with catastrophic consequences?”

Children

“Zero, NONE, '0', not one healthy child in US or Canada, Sweden, Germany etc. who was exposed to COVID, got the virus, and died from it, NOT ONE!”

- Dr. Paul Alexander, epidemiologist

https://palexander.substack.com/p/zero-none-0-not-one-healthy-child?utm_source=substack&utm_medium=email

SUMMARY OF KEY COVID FACTS

These summary points have been proven by thousands of studies conducted by tens of thousands of doctors and medical scientists.

- ▶ Medically and scientifically, Covid-19 is a Severe Acute Respiratory Syndrome (SARS) Coronavirus 2, and is named (SARS-CoV-2). There are several SARS viruses, and these have been around for many, many years.
- ▶ The actual overall fatality rate of covid - averaged across all ages - is 0.1 - 0.3%. It is lower for people under 60, and higher for people over 60.
- ▶ *"Among COVID-19 exposed individuals, people in their 70s have roughly twice the mortality of those in their 60s, 10 times the mortality of those in their 50s, 40 times that of those in their 40s, 100 times that of those in their 30s, 300 times that of those in their 20s, and a mortality that is more than 3000 times higher than for children. Since COVID-19 operates in a highly age specific manner, mandated counter measures must also be age specific. If not, lives will be unnecessarily lost."* - Dr. Martin Kulldorff, Harvard Epidemiologist
- ▶ Children are remarkably immune to covid illness and death. 7X more children die from flu than from covid.
- ▶ Dr. Michael Yeadon points out that the "novel" covid-19 contagion is novel only in the sense that it is a new type of coronavirus: *"There are at least four well characterized family members (229E, NL63, OC43 and HKU1) which are endemic and cause some of the common colds we experience, especially in winter. They all have striking sequence similarity to the new coronavirus."* So, covid-19 is in the same family of viruses as the common cold and flu, even if it is slightly more lethal.
- ▶ Dr. Michael Yeadon: *"It is now established that at least 30% of our population already had immunological recognition of this new virus, before it even arrived...COVID-19 is new, but coronaviruses are not. A major component our immune systems is the group of white blood cells called T-cells whose job it is to memorise a short piece of whatever virus we were infected with so the right cell types can multiply rapidly and protect us if we get a related infection. Responses to*

COVID-19 have been shown in dozens of blood samples taken from donors before the new virus arrived.”

- ▶ PANDA (Pandemic Data & Analytic): *“SARS-CoV-2 presents a negligible risk to the great majority of the world’s population. It primarily poses a risk to elderly, metabolically unhealthy and immunocompromised individuals. Many individuals already had a degree of immunity acquired through previous encounters with similar viruses. Moreover, those infected develop further natural immunity against severe disease, which appears to be more flexible and durable than any protection acquired through the Covid-19 vaccination.”*
- ▶ Covid is easily treatable at the early stages. 80-85% of covid deaths COULD HAVE BEEN PREVENTED. This means millions of covid deaths worldwide were needless.
 - Dr. Peter McCullough: *“COVID-19, no matter what variant, is easily treatable at home. About 85% of hospitalizations and deaths are completely avoidable with early treatment.”*
 - Dr. Theresa Lawrie: *“This medicine prevents deaths by 80%. So 80% of those people who are dying today don’t need to die because there’s ivermectin.”*
 - Dr. Harvey Risch: *“Hydroxychloroquine, ivermectin, and other therapeutics are highly effective in early COVID treatment. These drugs have been suppressed... for reasons that have nothing to do with the science and the medicine.”*
 - Dr. Pierre Kory: *“There is a drug that is proving to be of miraculous impact [against COVID-19]. And when I say ‘miracle,’ I do not use that term lightly. That is a scientific recommendation based on MOUNTAINS of data that has emerged. It basically obliterates transmission of this virus. If you take it, you will not get sick. Early treatment is key.*
 - Dr. Brian C. Joondeph: *“How many COVID deaths could have been prevented if doctors, using their professional and clinical judgement, could have prescribed HCQ without fear of ostracization or loss of their jobs?”*
- ▶ Vaccination cannot prevent infection and transmission. Various severe and fatal vaccine adverse events have been reported, including in young people. A prior infection generally confers superior immunity compared to vaccination.
- ▶ COVID-19 is NOT spread by asymptomatic people. Dr. Anthony Fauci in Oct. 2020: *“In all the history of respiratory borne viruses of any type, asymptomatic transmission has NEVER been the driver of outbreaks. The driver of outbreaks is ALWAYS a symptomatic person. Even if there’s a rare asymptomatic person that might transmit [the virus], an epidemic is not driven by an asymptomatic carrier.”*
- ▶ Asymptomatic people should not get tested. Natural immunity is robust, complete and durable. *“The virus is not spread asymptotically. Only sick people give it to other people.”* - Dr. Peter McCullough
- ▶ Numerous studies have proven that natural immunity is superior to any covid vaccine.
- ▶ Treating covid-19, no matter what variant, is easily treatable at home. For people at high risk or high exposure, early or prophylactic treatment is essential to prevent progression of the disease. According to hundreds of studies, early outpatient treatment of covid significantly reduces hospitalizations and deaths.
- ▶ Age profile: The median age of covid deaths is over 80 years in most Western countries (78 in the US) and about 5% of the deceased had no serious preconditions. The age and risk profile

of covid mortality is therefore comparable to normal mortality, but increases it proportionally.

- ▶ Nursing homes: In many Western countries, about 50% of all covid deaths have occurred in nursing homes, which require targeted and humane protection. In some cases, care home residents died not from the coronavirus, but from weeks of stress and isolation.
- ▶ Excess mortality: Overall, the pandemic has increased mortality by 5% to 25% in most Western countries. The majority of additional deaths have NOT been caused by covid, but by government restrictions and lockdowns, as well as an aging population.
- ▶ Symptoms: 85-90% of all infected persons show no symptoms. Overall, about 90% of symptomatic people develop at most mild or moderate symptoms and do not require hospitalization. Early outpatient treatment significantly reduces hospitalizations.
- ▶ Much has been written in the news media and spoken by politicians about the dangers of overcrowded hospitals because of covid-19. There have been many reports of many hospitals swamped with covid patients. Over 90% of these reports are either completely false, or exaggerated. Very few hospitals were overrun with covid at any point over the past 2 years. Those few that were, were overloaded for a short time. The truth is that 98% of all hospitals in the world experienced NO increases over previous years, and NO hospital was ever full or overloaded with only covid patients.
- ▶ Masks: There is still little-to-no scientific evidence for the effectiveness of face masks in the general population, and the introduction of mandatory masks couldn't contain or slow the epidemic in most countries. If used improperly, masks actually increase the risk of infection.
- ▶ Children and schools: In contrast to influenza, the risk of disease and transmission in children is rather low in the case of covid. There was and is therefore no medical reason for the closure of elementary schools or other measures specifically aimed at children.
- ▶ Testing. The PCR test produce 50-95% false positives, depending on how many amplification cycles are run. In this regard, the so-called cycle threshold or ct value is an important parameter.
- ▶ Virus mutations: Similar to influenza viruses, mutations occur frequently in coronaviruses. Most of these mutations are insignificant, but some of them may increase the transmissibility of the virus.
- ▶ Government lockdowns , mandates and restrictions have caused MORE hospitalizations and deaths than covid.
- ▶ According to the UN, lockdowns put the livelihood of 1.6 billion people at acute risk, and push an additional 150 million children into poverty. And additional 3-5 Million children have died from starvation thanks to lockdowns - over and above the usual 3 Million children who starve to death every year.
- ▶ Sweden. In Sweden, covid mortality in 2020, without lockdown, was comparable to a strong influenza season and BELOW the EU average - where the EU used massive lockdowns and mandates. About 50% of Swedish deaths occurred in nursing homes at the beginning of the pandemic. The median age of Swedish covid deaths was around 84 years. (Section 7)
- ▶ Japan. Japan had one of then lowest fatality rates in the world, with NO lockdowns.
- ▶ Taiwan. Taiwan had one of the lowest fatality rates in the world, with NO lockdowns.

- ▶ Africa. African nations have very low fatality and hospitalization rates, with NO lockdowns and very low vaccination rates.
- ▶ India, the second-most populous nation on earth, has very low hospitalization and death rates, thanks to early treatment with inexpensive and successful treatments that have been proven in hundreds of studies.

Dr. Scott Atlas, *Robert Wesson Senior Fellow in health policy at Stanford University's Hoover Institution, Co-Director of the Global Liberty Institute, Founding Fellow of Hillsdale's Academy for Science & Freedom:*

Here are the 10 biggest falsehoods - known for years to be false, not recently learned or proven to be so - promoted by America's public health leaders, elected and unelected officials, and now-discredited academics:

1. SARS-CoV-2 coronavirus has a far higher fatality rate than the flu by several orders of magnitude.
2. Everyone is at significant risk to die from this virus.
3. No one has any immunological protection, because this virus is completely new.
4. Asymptomatic people are major drivers of the spread.
5. Locking down—closing schools and businesses, confining people to their homes, stopping non-COVID medical care, and eliminating travel—will stop or eliminate the virus.
6. Masks will protect everyone and stop the spread.
7. The virus is known to be naturally occurring, and claiming it originated in a lab is a conspiracy theory.
8. Teachers are at especially high risk.
9. COVID vaccines stop the spread of the infection.
10. Immune protection only comes from a vaccine.

“Ministry of Health, it’s time to admit failure. In the end, the truth will always be revealed, and the truth about the coronavirus policy is beginning to be revealed. When the destructive concepts collapse one by one, there is nothing left but to tell the experts who led the management of the pandemic – we told you so.”

Dr. Emanuel Garcia, psychiatrist and psychoanalyst: “The past three years, in our Corona Epoch, have revealed to those with eyes to see and ears to hear the rank depths of corruption within virtually every institute of government and within virtually every formerly honorable profession.

“To have witnessed Medicine undermine itself in such a way as to make itself unrecognizable – in, for example, its sudden enthusiasm for masks, its sudden forgetfulness about early treatment and natural immunity, its sudden acceptance of a novel therapeutic agent that had been inadequately tested, its mania to subject children to this agent, its sudden scorn for informed consent and its equally sudden disregard of the founding principle of the Hippocratic Oath, at first not to harm – is to recognize outright self-destruction.

“That so many so-called medical practitioners abandoned their fundamental duties to their patients and themselves is a disgrace for which I can find no adequate word except prostitution – bearing in mind that in using this word I am doing sex workers a disservice because their form of prostitution represents an honest exchange.”
