

COVID TESTING METHODOLOGIES

COVID TESTING METHODOLOGIES

The entire covid narrative that is written and talked about nonstop in the news media and by politicians, is based entirely and only on fear.

- ▶ fear of getting severely ill
- ▶ fear of dying
- ▶ fear of spreading the virus to others
- ▶ fear of catching the virus from others
- ▶ fear of killing Grandma
- ▶ fear of being shamed for not believing what the media and politicians tell one to think
- ▶ fear of being made to feel guilty for not wearing a mask or keeping one's distance
- ▶ fear of being ridiculed or attacked if one disagrees with the narrative or does any independent research
- ▶ fear of being cancelled
- ▶ fear of refusing covid vaccines
- ▶ fear of refusing to give children vaccines
- ▶ fear of being left out of society because of all the vaccine mandates being pushed

As Dr. Mark McDonald, board-certified psychiatrist stated: **“Americans are suffering from mass insanity due to their delusional fear of COVID-19.”** It isn't just Americans; it's the majority of people on this planet. Approximately 2/3 of the world's population is in such fear of covid, they will do anything to “stay safe.”

And the fear is magnified because of all the media and government attention on this virus. A steady diet of bad news and fear wears people down, and causes them to sink lower and lower. This causes stress, and stress in itself causes illnesses.

“PCR Test: 95% false positives!” - Dr. Paul Alexander

https://palexander.substack.com/p/pcr-cycle-count-thresholds-above?utm_source=substack&utm_medium=email

Two Fuels That Drive Fear of Covid

As presented in Section 2, the most important thing that drives and fuels the fear are all the falsely inflated hospitalization and death counts. These counts give the impression that covid is far more deadly than it actually is. This fear causes the majority of people to comply - without question - with all government restrictions, mandates and lockdowns - no matter how illogical, irrational and destructive those are.

Covid has been presented as one of the deadliest viruses in history. As shown in the report Covid Fatality and Hospitalization Rates, it is deadly mostly to those over 70 with co-morbidities. For all others, covid doesn't even make the Top 10 List of Deadly Viruses over the past 200 years.

The second aspect of covid that fuels the fear and keeps the falsely inflated and never-ending narrative in play, is TESTING. Testing leads to *cases*. And of course, people think that *cases* lead to *hospitalizations* and *deaths*. So **CASES = ILLNESS and DEATH** in people's minds. And **TESTING** uncovers **CASES** which lead to **ILLNESS and DEATH**. Sounds logical, right? What sane person would argue against testing?

So TESTING is actually the key to the entire pandemic being kept "alive" and not allowed to end.

However, there are two enormous flaws in the logic equation "**TESTING uncovers CASES which lead to ILLNESSES and DEATHS.**" Let's find out what the TRUE science is regarding testing and cases.

The first thing to do is define *case*. From the World Book Dictionary, a *case* is

an instance of disease or injury;

a person being treated by a doctor ;

a patient, which is defined as a sick individual especially when awaiting or under the care and treatment of a physician or surgeon.

These definitions have been the medical industry meaning of the word *case* for centuries. Right in these definitions is the idea of illness or injury, some sort of medical condition that requires treatment.

For an individual to be a case, he or she must be *sick* with something or *injured* in some way. If a person isn't sick with cancer, he or she isn't a cancer case. If a person doesn't have the symptoms of a flu, he or she isn't a flu case.

"Asymptomatic spread is virtually non-existent, and if this does occur, it is less than 1%. It is very rare. Spread of pathogen will occur more surely when the persons are ill/sick with symptoms, especially if the symptoms function to expel the pathogen into the surrounding air. Having no symptoms or very mild symptoms reduces risk of spread and with no symptoms, spread is basically removed. If you have and had no symptoms, you do not transmit. This means that all of the asymptomatic testing was never ever needed. None of it was ever needed and we used the flawed PCR test with the near 95% false positives. You do not mass test asymptomatic persons, you only test 'symptomatic' persons with strong clinical suspicion."

- Dr. Paul Alexander, Epidemiologist

https://palexander.substack.com/p/asymptomatic-transmission-was-a-lie?utm_source=email

These definitions have been completely twisted for covid - just as the CDC re-defined industry-standard cause-of-death protocols just for covid. Now, for covid, a *case* no longer means actually sick with the virus. It means an individual who tests positive in some way is then AND FOREVER labeled as a *covid case*.

Take the flu as an analogy. Every single individual on this planet carries flu viruses in their bodies. If we were tested for the flu using the same test as for covid, each and every one of the 7.8 Billion people would test positive for the flu. Using the covid definition, all 7.8 Billion people would be considered *flu cases*.

But this is untrue. The industry-standard medical definition of a case as defined above must include an actual illness or injury. If you don't have any flu symptoms, you are not a flu case - **EVEN THOUGH YOU CARRY FLU VIRUSES**. Just because every individual carries flu viruses, doesn't make all of them flu cases. A true flu case is an individual who is actually sick with the flu - whether it's mild, medium or severe.

Yet this same established, standard medical industry definition of case - that has been accepted for hundreds or thousands of years - has been thrown out the window for covid. Now, simply having even the tiniest amount of SARS-related antibody - or even a false positive as will be discussed below - makes one a *covid case*. This is fraudulent, just as fraudulent as labeling someone without a flu illness as a flu case.

80-90% of people with covid don't even know they have it. They are asymptomatic. They are **NOT SICK**. Yet they are called a covid case if they have even the tiniest amount of related antibodies in their system.

So this is the first of the two enormous flaws in the logic equation "**TESTING uncovers CASES which lead to ILLNESSES and DEATHS**" - the false definition of *case* when applied to covid.

Because people unconsciously think **TESTING uncovers CASES which lead to ILLNESSES and DEATHS**, they then are fearful they will get sick or die if they "test positive" and therefore are labeled as a *case*. The equation is **NOT true** for covid, because 80-90% of people with covid are asymptomatic and therefore not a true *case*. If they aren't a true covid case, then they can't get sick or die from covid.

If they are asymptomatic, they also can't transmit covid to others - this will be shown in Section 4. Just as a person who doesn't have any cold or flu symptoms and isn't actually sick, cannot spread a cold or flu to others. The key point here is to understand that 80-90% of people who test positive for covid are **NOT covid cases** - even though they might be counted and considered as a case.

We also hear the word *infections* being used interchangeably with *cases*. *Infections* sounds so much scarier than cases, and implies people are actually sick. This is false, as an individual isn't necessarily sick if they carry the virus. Yet the word *infection* is used to imply illness and keep the fear going. We hear such phrases as "infections are surging." This is a misleading phrase.

This brings us to the second enormous flaw - testing itself. The test that has been used to "identify" covid is called the Real Time Reverse Transcription Polymerase Chain Reaction (rRT-PCR) test, or PCR test for short. This test was adopted by the WHO on January 23, 2020 as a means to detect the SARS-COV-2 virus, following the recommendations of a Virology research group based at Charité University Hospital in Berlin. And here the plot thickens.

Thousands of doctors and medical scientists have studied the PCR test methodology. Every such study has concluded the PCR test itself - as well as the method used by labs to run it - are deeply flawed. So flawed that over the past 2 years, the PCR test has yielded 50-97% false positives. More on this below.

The PCR tests relied on by governments all round the world for detecting the covid-19 virus are not fit for purpose. This test was invented by Nobel Prize winner Dr. Kary Mullis, who emphatically stated they WERE NOT to be used for medical diagnostic testing.

Dr. Mullis stated, **“These PCR tests cannot detect infectious free viruses at all. Anyone can test positive for practically anything with a PCR test, if you run it long enough. It doesn’t tell you that you’re sick.”**

So the majority of covid “cases” are falsely inflated. As are the number of covid deaths based on this test as well as the re-definition of cause of death as presented in Section 2.

Here is Dr. Mullis himself:

<https://www.bitchute.com/video/wOSeTz57xrCF/>

Here is a video of Dr. Tom Cowan mirroring and explaining Dr. Mullis’s statements about the inaccuracies of the PCR test:

<https://www.bitchute.com/video/EN78RCYKA7Yr/>

“I’m skeptical that a PCR test is ever true. It’s a great scientific research tool. It’s a horrible tool for clinical medicine.” - Dr. David Rasnick, biochemist and protease developer.

https://needtoknow.news/2020/12/kary-mullis-the-inventor-of-the-pcr-test-explains-why-its-results-are-meaningless/?fbclid=IwAR0dFwP05G5_6IBKQkFUSq8NpNveOS1QHwXI0dh9KLLty8u_ntQExRUqx7s

The PCR test DOES NOT detect viruses, it simply picks up fragments of DNA and RNA which may well be remnants of a common cold someone had weeks or months earlier. So “testing positive” doesn’t even mean someone has covid. And testing positive doesn’t mean a covid case. If a person is asymptomatic, that person is definitely NOT a covid case - even though he or she is counted as one.

As soon as the WHO adopted the PCR test for covid worldwide, scientists and doctors tested the test. It was immediately evident that the PCR test was ineffective - just as Dr. Mullis warned. One of the first studies on the PCR test is entitled *External peer review of the RTPCR test to detect SARS-Cov-2 Reveals 10 Major Flaws At The Molecular and Methodological Level: Consequences For False-Positive Results*. Here is an article on that study and the study itself:

<https://uncoverdc.com/2020/12/03/ten-fatal-errors-scientists-attack-paper-that-established-global-pcr-driven-lockdown/?>

<https://cormandrostenreview.com/report/>

Here is a quote from one of the authors, Dr. Kevin Corbett: **“Every scientific rationale for the development of that test has been totally destroyed by this paper. It’s like Hiroshima/ Nagasaki to the Covid test. When Drosten developed the test, China hadn’t given them a viral isolate. They developed the test from a sequence in a gene bank. Do you see? China gave them a genetic sequence with no corresponding viral isolate. They had a code, but no body for the code. No viral morphology.”**

The PCR test is what keeps all the covid fear and paranoia in place. Study after study after study has since proven conclusively that the PCR test is inappropriate for covid, and yields 50-97% false positives.

According to Drs. Pieter Borger, Bobby Rajesh Malhotra, Michael Yeadon, Clare Craig, and others:

“If someone is tested by PCR as positive when a [amplification] threshold of 35 cycles or higher is used (as is the case in most laboratories in Europe & the US), the probability that said person is actually infected is less than 3%, the probability that said result is a false positive is 97%.”

<https://www.globalresearch.ca/the-pcr-test-does-not-identify-the-virus-covid-false-positives-used-to-justify-the-lockdown-and-closure-of-the-national-economy/5735395>

“We do not routinely perform RT-PCR on any patient who is overheated, coughing or has an inflammatory syndrome!”

- Dr. Pascal Sacré

<https://www.globalresearch.ca/covid-19-rt-pcr-how-to-mislead-all-humanity-using-a-test-to-lock-down-society/5728483>

Thousands of doctors and medical scientists have denounced the PCR test as not only worthless for covid, but dangerous in itself as it creates too much fear and bad decisions from all the false positives. Even the WHO and US CDC have reported the test is flawed.

“As of January 1, 2022, the CDC in a request to the FDA withdraws it’s endorsement of the RT-PCR test. The CDC acknowledges that the PCR test does not effectively differentiate between Covid-19 and Seasonal Influenza. Amply documented and analyzed by numerous scientists, the RT-PCR test does not detect or identify SARS-CoV-2 and its variants.”

- Prof Michel Chossudovsky

https://www.lewrockwell.com/2022/01/no_author/bombshell-cdc-no-longer-recognizes-the-pcr-test-as-a-valid-method-for-detecting-confirmed-covid-19-cases/

There is a deadly consequence of false positives for covid:

Dr. James Lyons-Weiler: "COVID-19 'rates' must adjust for testing rates and the DEADLY false positive rate. UNLESS SEQUENCED TO CONFIRM OR ALSO TESTED FOR BACTERIAL PNEUMONIA, PEOPLE WILL DIE FROM PCR FALSE POSITIVE RESULTS! THE PROBLEM IS PEOPLE WITH OTHER RESPIRATORY ILLNESSES WILL BE TREATED AS COVID-19 AND WILL DIE FROM BACTERIAL PNEUMONIA. MOST PEOPLE WHO DIED ON VENTILATORS DIED FROM BACTERIAL PNEUMONIA. THEY WON'T RECEIVE ANTIBIOTICS AND OTHER TREATMENTS AND WILL DIE FROM SEVERE BACTERIAL PNEUMONIA AND SEPSIS."

https://popularrationalism.substack.com/p/covid-19-rates-must-adjust-for-testing?utm_source=substack&utm_medium=email

Below are several articles and studies. These articles/studies were written by doctors, or contain links to the doctor reports and studies. Every doctor and study proves that PCR tests give 50-97% false positives, and are worthless in detecting covid or any other virus.

There is a LOT of technical data contained in these articles, but it's worth the time and effort to understand how and why the PCR test is so flawed - and how the test prolongs the covid fear endlessly.
