

## **Covid Asymptomatic vs Symptomatic Transmission; Masks**

One of the myths that has been widely written and spoken is *“asymptomatic people can spread covid to others.”* This has been proven conclusively to be false.

Dr. Anthony Fauci in Oct. 2020:

**“In all the history of respiratory borne viruses of any type, asymptomatic transmission has NEVER been the driver of outbreaks. The driver of outbreaks is ALWAYS a symptomatic person. Even if there’s a rare asymptomatic person that might transmit [the virus], an epidemic is not driven by an asymptomatic carrier.”**

<https://www.youtube.com/watch?v=JIOzN03ZWXY&feature=youtu.be>

Dr. John Lee:

**“A respiratory virus needs associated symptoms in order to be clinically relevant. One year ago, this belief would have been universally accepted by the wider medical community. ... Infectiousness or transmission of a virus requires active infection resulting in high levels of viral replication and shedding. Symptoms, such as coughing, are the real drivers of spread.”**

<https://www.hartgroup.org/wp-content/uploads/2021/03/ASYMPTOMATIC-SPREAD.pdf>

Over 45,000 medical doctors and scientists in an open letter to governments:

**“So-called asymptomatic cases have never in the history of respiratory disease been the driver for spread of infection. Rather it is symptomatic people who spread respiratory infections - not asymptomatic people.”**

<https://worlddoctorsalliance.com/?fbclid=IwAR16Fbw8aDWOr5XyEyd3DjKXF-JOo2c-9fGsTEzSzDoq5n1wjXDOqANPflg>

Do asymptomatic people and children spread covid? Dr. Sucharit Bhakdi: **“It is complete nonsense. It’s never been shown. It’s a claim that has been spread as a fact. And this, I consider, is criminal. The idea of an asymptomatic carrier spreading covid-19 is untrue, and is backed by zero data. There isn’t a single case in the world documented.”**

Dr. Andrew Kaufman: **“There is no asymptomatic spread of disease. We have grown up our entire lives and never once have we ever worried about catching any illness from any healthy people.**

Dr. Zac Cox: **“One of the biggest lies we are being told at the moment is asymptomatic spread. Everybody is terrified of their fellow man. They’re scared to hug Granny. They are lying. The reality is, people who spread infections have symptoms. You HAVE to be symptomatic in order to spread a respiratory infection. Time to speak the truth.”**

Dr. Paul Alexander: **“Madewell et al. showed us in 2020 that asymptomatic transmission was just that, asymptomatic (no symptoms to spread) & was a LIE by CDC, Fauci, Francis Collins, Walensky; they lied! You were NOT transmitting, a devastating lie to get you to lock down, mask & rush to vaccine.”**

<https://pubmed.ncbi.nlm.nih.gov/32442256/>

Dr. Anna Forbes: **“People need to stop being scared of healthy people - people who are not displaying signs and symptoms of infectious disease. I would really urge people to get back in touch with their common sense, to get back in touch with their sense of humanity.**

Dr. Johan Denis: **“There are no data supporting asymptomatic spread. Healthy people cannot transmit a virus to someone else. Only sick people can. Kids can play as they used to and embrace their grandparents. They are no danger to them. Quarantine is only for sick people. Healthy people can resume their lives. We have been lied to.”**

Stanford University: **Researchers Had a Simple Test for Determining if an Asymptomatic Person Who Tested Positive for COVID Was Infectious — But CDC, Fauci Ignored It**

**Researchers at Stanford University who developed the test also determined that the vast majority of asymptomatic individuals who tested positive - 96% - did not transmit the virus.**

Dr. Peter McCullough: **“All we’re doing is generating false positives, creating extra cases, and creating extra concerns. The FDA never approved these tests for asymptomatic testing. The WHO as of June 25th has said ‘no asymptomatic testing.’”**

Dr. Barre Lando: **“Have you ever sought medical help because you felt just fine? Have you ever avoided perfectly healthy people for fear of illness transmission? If not, why would you change this very rational behavior now? The only real virus is fear, and it has been very effectively weaponized against us. The only real answer is truth.”**

## Children and School Closures

The proven fact that asymptomatic people do NOT spread covid applies even more strongly to children. Children under the age of 20 are remarkably immune to covid. More children died from the flu in 2020 than from covid. Therefore, forcing children to wear masks and distance themselves is infinitely more harmful than covid, both physically and mentally. Closing schools was an enormous mistake.

**Dr. Simone Gold: “Coronavirus shutdowns are a mass casualty incident with exponentially growing negative health consequences to millions of non-COVID patients... Keeping schools and universities closed is incalculably detrimental for children, teenagers, and young adults for decades to come.”**

**Prof. Mark Woolhouse: “Lockdown was a panic measure and a monumental mistake on a global scale, the cure was worse than the disease. We absolutely should never return to a position where children cannot play or go to school. I believe the harm lockdown is doing to our education, health care access, and broader aspects of our economy and society will turn out to be at least as great as the harm done by Covid-19.”**

There has been ZERO evidence or data supporting school closures. The only reason schools were closed is blind fear. There has been enormous harm done to a generation of children - not from covid, but from the fear, panic, lockdowns and school closures. Children and teen mental health has declined sharply as a result of being quarantined., with depression and suicides skyrocketing the past year or more.

“75 Studies and Articles Against COVID-19 School Closures”

<https://brownstone.org/articles/75-studies-and-articles-against-covid-19-school-closures/>

Every independent study has shown schools should remain open and never should have been closed in the first place. And all the above studies that prove children and asymptomatic people don't spread covid, show that children don't need to wear masks or distance themselves from others. Masks and distancing cause great physical and mental harm to children.

## **MASKS**

Surgical masks were designed to keep medical personnel from inadvertently infecting patients' wounds, not to prevent the spread of viruses.

Dr. Simone Gold: **"Masks are irrelevant for stopping a virus. Viruses are 1000x smaller than a hair, and 50x smaller than a bacteria. It's like saying a chain-link fence can stop a mosquito."**

Dr. Ron Paul: **"Masks are theater. If you look at the cloth masks, 97% of virus-sized particles go through a cloth mask, so we're kidding ourselves, and what it's doing is it's detracting from the one thing that could save and could really help us, and that's the vaccine."**

Dr. Paul Alexander: **“Masking Children: Tragic, Unscientific, and Damaging.”**

<https://www.aier.org/article/masking-children-tragic-unscientific-and-damaging/>

Dr. Mark Sircus: **“In Germany, the association of “Kinder f. Weltfrieden eV” commissioned a laboratory analysis to investigate the level of microbial contamination that results after a child wears a fresh mask for 6-8 hours in school. What they found was alarming to all those recommending we mask our children for several hours every day. The masks were found to be contaminated with 82 bacterial colonies and 4 mold colonies. Where do you think the bacteria, molds, and viruses progressively colonizing and growing on the warm moist mask-mouth interface end up? In more than 50% of cases, a fungal infection will end in death. It’s challenging to diagnose, and fungus infections are often detected either too late, not at all, or treated inappropriately.”**

Review of 14 Mask Studies: **“The CDC’s, U.K.’s, and WHO’s earlier guidance was much more consistent with the best medical research on masks’ effectiveness in preventing the spread of viruses. That research suggests that Americans’ many months of mask-wearing has likely provided little to no health benefit and might even have been counterproductive in preventing the spread of the novel coronavirus.”**

Stiftung Warentest, one of Germany’s largest consumer organizations, has found that FFP2 masks, very similar to N95 masks in the U.S., are harmful for children.

Dr. Marty Makary: **“We have been encouraging Americans to wear masks since the beginning of the pandemic. But special attention should be paid to the many children who struggle with masks. Public-health officials claim to base their decisions and guidance on science, but there’s no science behind mask mandates for children.”**

<https://townhall.com/tipsheet/mattvespa/2021/08/25/johns-hopkins-doctor-shreds-the-narratives-behind-forcing-kids-to-mask-up-for-cov-n2594530>

<https://www.sott.net/article/442455-German-Neurologist-Warns-Against-Wearing-Facemasks-Oxygen-Deprivation-Causes-Permanent-Neurological-Damage>

Dr. Jay Bhattacharya: **“Children have developmental needs that require them to see other people’s faces. Learning to speak, for instance, requires seeing lips move. For slightly older children, they need to see people, the body, they learn body language, how to interact socially, by watching people. And when you ask them to wear a mask, you sort of cut that out. So you have harms on one side, and very little benefit on the other.”**

CDC Website, May 2020 study published in Emerging Infectious Diseases did a systematic review of 10 RCT’s on masks from 1946-2018: **“In pooled analysis, we found no significant reduction in influenza transmission with the use of face masks...either when worn by the infected person for source control or when worn by uninfected persons to reduce exposure.”**

Canadian review of 11 systematic reviews and 18 RCTs: **Synthesis: “Overall, the use of masks in the community did not reduce the risk of influenza, confirmed viral respiratory infection, influenzalike illness, or any clinical respiratory infection.”**

<https://www.globalresearch.ca/mask-mandates-science-political-dogma/5732682>

Dr. James Meehan: **“I’m seeing patients that have facial rashes, fungal infections, bacterial infections. Reports coming from my colleagues, all over the world, are suggesting that the bacterial pneumonias are on the rise. New research is showing that cloth masks may be increasing the aerosolization of the SARS-COV-2 virus into the environment causing an increased transmission of the disease. In February and March we were told not to wear masks. What changed? The science didn’t change. The politics did. This is about compliance. It’s not about science... Our opposition is using low-level retrospective observational studies that should not be the basis for making a medical decision of this nature.”**

Dr. Mark McDonald cited an Aug. 11 study by Brown University: “Children born during the pandemic have significantly reduced verbal, motor, and overall cognitive performance compared to children born pre-pandemic. The masks, “Zoom schools,” and lockdown mandates have led to deprivation overall, of social contact, [of] not being able to see faces, being stuck at home all day long, [and this] has actually caused brain damage to the youngsters.”

Professor Carl Heneghan, the director of Oxford University’s Centre for Evidence-Based Medicine, cited evidence that pandemic restrictions and the “fear we instill into children” has led to the worsening of psychological problems.

Dr. Mark Sircus: **“We have to stop that deadly virus that is so incredibly virulent that, according to the CDC, 99.8% of those exposed to it survive.
