

**SUCCESSFUL TREATMENT PROTOCOLS
FOR COVID**

SUCCESSFUL TREATMENT OF COVID

“COVID-19, no matter what variant, is easily treatable at home. About 85% of hospitalizations and deaths are completely avoidable with early treatment. The only way people end-up in the hospital and have a miserable time is when they receive no treatment. Anybody with common sense should understand that it’s easy to treat the illness when it’s early and the symptoms are mild. It becomes progressively worse as people progress in the disease.”

“There is a drug that is proving to be of miraculous impact [against COVID-19]. And when I say ‘miracle,’ I do not use that term lightly. That is a scientific recommendation based on MOUNTAINS of data that has emerged in the last 3 months. It basically obliterates transmission of this virus. If you take it, you will not get sick. Early treatment is key. And that drug that will treat them and prevent the hospitalization is Ivermectin.”

But they don’t want you to know about this. They want you to stay at home, get sick, and then go to the hospital. It’s an outrage. “[Dec 2021] We’ve been having tunnel vision dealing with the COVID-19 pandemic. Let’s throw the politics out. We could solve this problem pretty quickly. Let’s look around the world at things that work. Let’s look at the fact that on the western coast of Africa, there’s almost no COVID. And let’s ask ourselves, why is that? And then you see, it’s because they take antimalarials, particularly hydroxychloroquine. Let’s listen to these physician groups who’ve had incredible success with ivermectin. “For years, the censorship of factual information that is inconvenient to certain powerful actors, including the US Federal Government and Big Pharma, has been steadily increasing as “information warfare” has become an ever present force in our lives. Too often in this “information war,” the first casualty is the truth itself. Facts are rarely treated as sacred by the world’s largest and most influential media outlets, but instead are treated as something to be twisted and manipulated for the benefit of their paying sponsors.”

Tens of thousands of doctors have successfully treating covid - without ventilators. Based on their success rate, **3-4 MILLION OR MORE COVID DEATHS WORLDWIDE WOULD HAVE BEEN PREVENTED** if these effective treatments weren’t suppressed and attacked to make way for more expensive drugs and vaccines.

<https://doctorsandscientistsdeclaration.org/home/supporting-evidence/>

<https://covid19criticalcare.com/>

Yet these successes and treatment protocols have been heavily censored and suppressed by the news media and politicians. Not only suppressed, but attacked and falsely discredited.

Doctors weren't allowed to publicly announce their successful treatment protocols, under threat of losing their medical licenses and their reputations. The successful treatments that will be described in this section have been vilified to the point that many people think they are snake oil, and the doctors who prescribe them as quacks or worse.

Why wouldn't everyone WANT to know about successful covid treatments? Why has there been so much suppression and censorship? To pave the way for mass vaccinations of the world's population - which has been happening since the beginning of this pandemic.

"It seems to me, early on, there was an intentional, very comprehensive, suppression of early treatment in order to promote fear, suffering, isolation, hospitalization and death. And it seemed to be completely organized and intentional in order to create acceptance for, and then promote mass vaccination."

- Dr. Peter McCullough

There is conclusive and worldwide proof that the treatments listed below are effective in treating covid. Most protocols and doctors use *combinations* of these items. After the details are provided for each item, various protocols will be given.

Ivermectin

Hydroxychloroquine (HCQ)

Quercetin

Zinc

Vitamin D

Monoclonal Antibodies

Azithromycin

Doxycycline

Anti-Inflammatory Medicines, Steroids

N-acetylcysteine

Favipiravir

1. HCQ and Zinc

Dr. Harvey Risch, one of world's foremost epidemiologist in at Yale School of Public Health, praised the proven benefits of HCQ in fighting COVID-19, emphasizing at the same time that opponents of HCQ have no science to back them up. **"I conclude the evidence is**

overwhelming. There's no question that in the people who need to be treated, and are treated early, HCQ has a very substantial benefit in reducing risk of hospitalization or mortality."

Here are links to several hundred studies proving the success of HCQ and zinc in treating covid illnesses.

2. Ivermectin

Ivermectin has been used in humans since 1981, and over 4 billion doses have been administered. Merck, the original patent holder, donated 3.7 Billion doses to developing countries. In 2015, the two individuals who developed Ivermectin were awarded a Nobel Prize for medicine. Thousands of doctors all over the world have had excellent results treating covid patients with ivermectin. India, several African nations and Japan have made ivermectin an official and recommended course of treatment for covid. And those countries have experienced very low hospitalization and death rates where ivermectin is used. Now, it's being attacked and ridiculed, and it's effectiveness suppressed. That's because it works too well and would end all the fear surrounding this falsely inflated virus. And cost drug companies tens of billions in profits.

3. Vitamin D

The importance of Vitamin D cannot be overstated. Not only for covid-19, but for all viruses. A healthy immune system requires high doses of Vitamin D daily.

Dr. Ryan Cole: **“There is no such thing as cold and flu season. There is only low vitamin D season. Inflammatory (cytokine) storm cannot be controlled without adequate vitamin D levels. Massive numbers of Americans have low vitamin D levels. 96% of ICU patients are vitamin D deficient. You cannot synthesize vitamin D from sunlight during fall and winter at 35-degrees north. Living in northern climates you are immune suppressed if you do not supplement with vitamin D during fall and winter. Scandinavian countries (Finland, Norway, Sweden) test their citizens twice a year for vitamin D and fortify 35 foods with vitamin D. Our population is left vulnerable to any seasonal viral infection without a public health program to promote vitamin D adequacy. Fauci says he personally takes 8000-9000 units of vitamin D per day but why has this has not become a public health message?”**

7. Monoclonal Antibodies

“I can tell you first hand the development of monoclonal antibodies against SARS-CoV-2 was a clear winner. Ambrose et al, reporting a stunning 88 and 86% 14- and 30-day mortality reductions, respectively, in largely unvaccinated patients with acute COVID-19. The array of products was robust and those who received infusions had terrific outcomes.

“Looking back I sincerely wish every acutely sick patient with COVID-19 would have received a monoclonal antibody infusion in the emergency department before discharge or admission. This could have saved hundreds of thousands of American lives. Sadly HHS pulled these products off the market just a few months after they were approved based on theoretical modeling studies and not real outcomes.”

SUMMARY OF KEY COVID FACTS

These summary points have been proven by thousands of studies conducted by tens of thousands of doctors and medical scientists.

- ▶ Medically and scientifically, Covid-19 is a Severe Acute Respiratory Syndrome (SARS) Coronavirus 2, and is named (SARS-CoV-2). There are several SARS viruses, and these have been around for many, many years.

- ▶ The actual overall fatality rate of covid - averaged across all ages - is 0.1 - 0.3%. It is lower for people under 60, and higher for people over 60.
- ▶ *“Among COVID-19 exposed individuals, people in their 70s have roughly twice the mortality of those in their 60s, 10 times the mortality of those in their 50s, 40 times that of those in their 40s, 100 times that of those in their 30s, 300 times that of those in their 20s, and a mortality that is more than 3000 times higher than for children. Since COVID-19 operates in a highly age specific manner, mandated counter measures must also be age specific. If not, lives will be unnecessarily lost.” - Dr. Martin Kulldorff, Harvard Epidemiologist*
- ▶ Children are remarkably immune to covid illness and death. 7X more children die from flus than from covid.
- ▶ Dr. Michael Yeadon points out that the "novel" covid-19 contagion is novel only in the sense that it is a new type of coronavirus: *“There are at least four well characterized family members (229E, NL63, OC43 and HKU1) which are endemic and cause some of the common colds we experience, especially in winter. They all have striking sequence similarity to the new coronavirus.”* So, covid-19 is in the same family of viruses as the common cold and flu, even if it is slightly more lethal.
- ▶ Dr. Michael Yeadon: *“It is now established that at least 30% of our population already had immunological recognition of this new virus, before it even arrived...COVID-19 is new, but coronaviruses are not. A major component our immune systems is the group of white blood cells called T-cells whose job it is to memorise a short piece of whatever virus we were infected with so the right cell types can multiply rapidly and protect us if we get a related infection. Responses to COVID-19 have been shown in dozens of blood samples taken from donors before the new virus arrived.”*
- ▶ PANDA (Pandemic Data & Analytic): *“SARS-CoV-2 presents a negligible risk to the great majority of the world’s population. It primarily poses a risk to elderly, metabolically unhealthy and immunocompromised individuals. Many individuals already had a degree of immunity acquired through previous encounters with similar viruses. Moreover, those infected develop further natural immunity against severe disease, which appears to be more flexible and durable than any protection acquired through the Covid-19 vaccination.”*
- ▶ Covid is easily treatable at the early stages. 80-85% of covid deaths COULD HAVE BEEN PREVENTED. This means millions of covid deaths worldwide were needless.
 - Dr. Peter McCullough: *“COVID-19, no matter what variant, is easily treatable at home. About 85% of hospitalizations and deaths are completely avoidable with early treatment.”*
 - Dr. Theresa Lawrie: *“This medicine prevents deaths by 80%. So 80% of those people who are dying today don’t need to die because there’s ivermectin.”*
 - Dr. Harvey Risch: *“Hydroxychloroquine, ivermectin, and other therapeutics are highly effective in early COVID treatment. These drugs have been suppressed... for reasons that have nothing to do with the science and the medicine.”*
 - Dr. Pierre Kory: *“There is a drug that is proving to be of miraculous impact [against COVID-19]. And when I say ‘miracle,’ I do not use that term lightly. That is a scientific recommendation based on MOUNTAINS of data that has emerged. It basically obliterates transmission of this virus. If you take it, you will not get sick. Early treatment is key.*

- Dr. Brian C. Joondeph: *“How many COVID deaths could have been prevented if doctors, using their professional and clinical judgement, could have prescribed HCQ without fear of ostracization or loss of their jobs?”*
- ▶ Vaccination cannot prevent infection and transmission. Various severe and fatal vaccine adverse events have been reported, including in young people. A prior infection generally confers superior immunity compared to vaccination.
- ▶ COVID-19 is NOT spread by asymptomatic people. Dr. Anthony Fauci in Oct. 2020: *“In all the history of respiratory borne viruses of any type, asymptomatic transmission has NEVER been the driver of outbreaks. The driver of outbreaks is ALWAYS a symptomatic person. Even if there’s a rare asymptomatic person that might transmit [the virus], an epidemic is not driven by an asymptomatic carrier.”*
- ▶ Asymptomatic people should not get tested. Natural immunity is robust, complete and durable. *“The virus is not spread asymptotically. Only sick people give it to other people.”* - Dr. Peter McCullough
- ▶ Numerous studies have proven that natural immunity is superior to any covid vaccine.
- ▶ Treating covid-19, no matter what variant, is easily treatable at home. For people at high risk or high exposure, early or prophylactic treatment is essential to prevent progression of the disease. According to hundreds of studies, early outpatient treatment of covid significantly reduces hospitalizations and deaths.
- ▶ Age profile: The median age of covid deaths is over 80 years in most Western countries (78 in the US) and about 5% of the deceased had no serious preconditions. The age and risk profile of covid mortality is therefore comparable to normal mortality, but increases it proportionally.
- ▶ Nursing homes: In many Western countries, about 50% of all covid deaths have occurred in nursing homes, which require targeted and humane protection. In some cases, care home residents died not from the coronavirus, but from weeks of stress and isolation.
- ▶ Excess mortality: Overall, the pandemic has increased mortality by 5% to 25% in most Western countries. The majority of additional deaths have NOT been caused by covid, but by government restrictions and lockdowns, as well as an aging population.
- ▶ Symptoms: 85-90% of all infected persons show no symptoms. Overall, about 90% of symptomatic people develop at most mild or moderate symptoms and do not require hospitalization. Early outpatient treatment significantly reduces hospitalizations.
- ▶ Much has been written in the news media and spoken by politicians about the dangers of overcrowded hospitals because of covid-19. There have been many reports of many hospitals swamped with covid patients. Over 90% of these reports are either completely false, or exaggerated. Very few hospitals were overrun with covid at any point over the past 2 years. Those few that were, were overloaded for a short time. The truth is that 98% of all hospitals in the world experienced NO increases over previous years, and NO hospital was ever full or overloaded with only covid patients.
- ▶ Masks: There is still little-to-no scientific evidence for the effectiveness of face masks in the general population, and the introduction of mandatory masks couldn’t contain or slow the epidemic in most countries. If used improperly, masks actually increase the risk of infection.

- ▶ Children and schools: In contrast to influenza, the risk of disease and transmission in children is rather low in the case of covid. There was and is therefore no medical reason for the closure of elementary schools or other measures specifically aimed at children.
- ▶ Testing. The PCR test produce 50-95% false positives, depending on how many amplification cycles are run. In this regard, the so-called cycle threshold or ct value is an important parameter.
- ▶ Virus mutations: Similar to influenza viruses, mutations occur frequently in coronaviruses. Most of these mutations are insignificant, but some of them may increase the transmissibility of the virus.
- ▶ Government lockdowns , mandates and restrictions have caused MORE hospitalizations and deaths than covid.
- ▶ According to the UN, lockdowns put the livelihood of 1.6 billion people at acute risk, and push an additional 150 million children into poverty. And additional 3-5 Million children have died from starvation thanks to lockdowns - over and above the usual 3 Million children who starve to death every year.
- ▶ Sweden. In Sweden, covid mortality in 2020, without lockdown, was comparable to a strong influenza season and BELOW the EU average - where the EU used massive lockdowns and mandates. About 50% of Swedish deaths occurred in nursing homes at the beginning of the pandemic. The median age of Swedish covid deaths was around 84 years. (Section 7)
- ▶ Japan. Japan had one of then lowest fatality rates in the world, with NO lockdowns.
- ▶ Taiwan. Taiwan had one of the lowest fatality rates in the world, with NO lockdowns.
- ▶ Africa. African nations have very low fatality and hospitalization rates, with NO lockdowns and very low vaccination rates.
- ▶ India, the second-most populous nation on earth, has very low hospitalization and death rates, thanks to early treatment with inexpensive and successful treatments that have been proven in hundreds of studies.

Dr. Peter McCullough is one the world's leading expert on covid and treating physician of covid patients. Here are his 5 Most Important Truths about covid, and 2 excellent videos explaining everything about covid vaccines.
