THE QUAID SAID

There is no doubt the future of our state will and must greatly depend upon the type of education we give to our children and the way in which we bring them up as future citizens of Pakistan. Education does not merely mean academic education. There is immediate and urgent need for giving scientific and technical education to our people in order to build up our future economic life and to see that our people take to science, commerce, trade and particularly well-planned industries. We should not forget that we have to compete with the world which is moving very fast in this direction.

At the same time we have to build up the character of our future generation. We should try, by sound education, to instill into them the highest sense of honor, integrity, responsibility and selfless service to the nation. We have to see that they are fully qualified and equipped to play their part in the various branches of national life in a manner which will do honor to Pakistan.

*Message to All Pakistan Education Conference
27th November 1947*
