

Slavery wasn't really abolished in Nebraska....

Income Tax: You worked hard and now you got paid. Nebraska State Government will take 2.46% - 6.64% of your income.

Sales Tax: So you want to spend some of the income you make...great! Nebraska State Government will charge you an additional 5.5 percent and many local jurisdictions will charge you an additional 1.5 percent on whatever is sold and every time it is re-sold!

Property Tax: So you saved a portion of your income (after taxes) and you want to buy a home or farm or ranch, instead of paying rent. Local Government will charge you thousands of dollars each year for the privilege of ownership, even after your home or farm or ranch is paid off.

Capital Gains Tax: So you want to take some of your income to invest. Great, you take all the risk and if you make money, Nebraska State Government will take another 2.46% to 6.64% of your gains. If you lose, you can only deduct a small portion of your loss per year.

Inheritance Tax: You worked hard and saved and built up assets you want to leave to your family. The problem is you died with too much...shame. Nebraska State Government will take a portion of what you left as well.

Corporate Tax: You worked hard and saved a portion of your income (after taxes) and you build a business and incorporate that business. Congratulations, Nebraska State Government will tax all income over \$50,000 at a rate of 7.81 %.

Abolish Tax Slavery: Adopt EPIC Option – Eliminate Property, Income and Corporate Taxes.
