

# DI MODULE

## DELIVERY & INSTALLATION

A fully customized system to control and monitor the delivery management to suit your business needs

# ONE-STOP BUSINESS SOLUTION

Delivery & Installation module is able to manage your drivers and also connect to third-party logistics providers

# CREATE & MANAGE YOUR NEXT DELIVERY

Users are able to observe all the created trips in one centralized calendar, that helps keep track of upcoming deliveries and shipments

Create a trip and **add multiple jobs** to it with various types such as delivery, pickup or petrol refilling

**Link Sales Order** and Sales Invoice to the specific trip and receive the information real-time and schedule the delivery in a few clicks!

The solution that allows you to have a 360'-degree control and monitoring over the **delivery management** for your business

**Schedule your deliveries, plan your trips**, empower your drivers with the mobile app and **track the status anytime, anywhere!**

## THE FEATURES YOU'LL LOVE

### SIGNATURE

Our system locks any further changes after the customer sign digitally, to ensure full transparency and control over delivery management

### COLLECTION

Our system supports the cases where the driver needs to collect the payment at the location of delivery rather than in advance (COD)

### HELPER

Our system allows to record the installation and other related activities to automate your service end-to-end

### SHIPMENT

Our system supports the logistics industry workflow to move goods from one place to another that can be catered to the users needs
