SPECS

AIR LAYER FOR INSULATION

Features a layer of air that bolsters its insulation strength, making this a powerful roofing option.

LIGHTWEIGHT

Due to the nature of its construction, the sheet is as lightweight as it is rigid.

FLAME RETARDANT

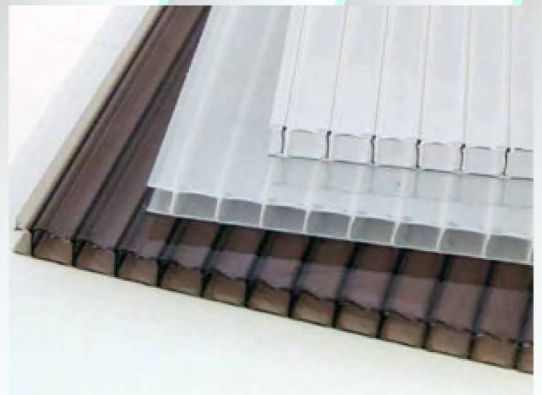

Polycarbonate is considered a self-extinguishing material.

ULTRA RIGID

These panels have the ability to withstand heavy snow, high winds, and even average hail. Its exceptional performance will brave the elements without risks of cracking or breaking.

UV RATED

Clear panel transmits up to 80% of light. With solar control, the thermoclear sheet blocks infrared heat while still allowing high levels of light to pass through.

AFFORDABLE!

Compared to acrylic or glass, polycarbonate panels are much more affordable.
