The Volunteer Program for Rainbow Omega Inc.

Public Relations Campaign

Rainbow Omega

Serving adults with developmental disabilities

Authored by: Cory O'Neal,
COM 440 Campaign Management

Department of Communication, Jacksonville State University
May 5, 2022

Research & Audience Strategy

I. History and Background of the Rainbow Omega

Brenton and Dianne Carpenter founded Rainbow Omega in 1991. The Carpenters aimed to provide individuals with developmental disabilities a safe place to develop and thrive by providing life. Rainbow Omega began as a dream for the Carpenters after the birth of their son, Chris. Carpenters knew that he and his wife, Dianne, would not live forever and wanted to know that Chris would be taken care of when they were gone. The idea manifested after Carpenters discovered a lack of resources in the area for adults with developmental disabilities. The founders believed in a place where residents maintained a sense of dignity. God who are gifted with the extraordinary capability to bless others. Rainbow Omega's name means "rain in the end." It comes from Biblical connotations in the rainbow, representing "hope," with Omega being the Greek alphabet's last letter signifying the "end."

Mission Statement

The Rainbow Omega mission is "to glorify God by ensuring that individuals with developmental disabilities have a permanent safe and nurturing home where their gifts and talents are respected and nurtured in a Christian environment" (Owner on Rainbow omega," n.d.). The direct extension "Rainbow Omega may be a non-institutional environment that provides both a family and a community atmosphere where residents experience quality standards of care" (Rainbow Omega, 2021). Rainbow Omega's vision is "to be a model for Christian living and love" (Owner on Rainbow omega," n.d.). The organization specifies the following statements: "We believe in the sanctity, dignity and worth of each person. We are committed to the well-being of our residents, staff, and families. We believe in the value of a Christian family for our residents. We diligently steward the precious gifts provided by our benefactors. We are guided by and upheld the highest principles in all we do" (Owner on Rainbow omega," n.d.).

Residential Facilities

The dual two-addition homes opened in 1995 to serve sixteen residents. Its operations have grown significantly over time. Today, the organization offers residence to eighty-eight individuals and recreational budget of \$1.2 million (Owner on Rainbow omega," n.d.). Rainbow Omega's also consists of one hundred staff members. The staff members do not reside in the residential facilities. Rainbow Omega's has 24/7 staff on duty. Each home provides with six to eight residents living in each with a family dynamic. These homes are also intermediate care facilities, overseen by the Department of Public Health.

Rainbow Omega is considered a privatized, non-profit organization. The organization accepts monetary and from Medicaid, WCherokee, and personal donations. Its fiscal year begins on October 1 to September 30. Due to its nature, Rainbow Omega relies on generous donors to continue to fund its organization.

Garden Center

Rainbow Omega takes pride in its Garden Center that was started in 1995. The organization constructed the center in a one acre area on campus in 2019. The Garden Center also operational greenhouses for wholesale and retail use. In addition, it serves as an integral part of the organization's vocational program as residents and professionals work in the upkeep and production of the plants sold by the center. Aside from plants, the center sell pottery, garden tools, and other gardening supplies. The Garden Center is also a seasonal market. The Garden Center provides opportunities for the community to volunteer. In addition, it promotes an arts and crafts show featuring local artists and entertainment. Rainbow Omega's annual Christmas Open House is a festive event for the community. Patrons, Prices are presented from Apr. 1, Aug. 31, Music are presented from Nov. 3-5, and Poinsettias are presented from Nov. 3-Dec. 31.

The Garden Center and Honda Center provides visitors with on-site work experiences. The residents assemble owners' manuals and assist at the Honda Center. The individuals receive compensation for their employment. Hilda, the Carpenters' other son, oversees the organization's leadership to ensure his parents' dream continues to thrive while also managing the Garden Center.

II. SWOT Analysis

The SWOT stands Strengths, Weaknesses, Opportunities, and Threats) of Rainbow Omega helps identify areas of expansion to help overcome its obstacles. All the information found in this section is to support why we chose the areas of improvements. The findings for our SWOT are described in more detail below.

Strengths

Some strengths that Rainbow Omega holds are advocacy, the Medicaid waiver, individual care, and living/working residents on campus. These are important strengths because they elevate Rainbow Omega from their competitors.

Strength 1: Advocacy

Rainbow Omega's strong suit is advocacy, as the current audience is their donors and people close with residents associated with Rainbow Omega are strong advocates for the organization. Rainbow Omega's "mission is to glorify God by ensuring that individuals with developmental disabilities have a permanent safe and nurturing home where their gifts and talents are respected and nurtured in a Christian environment" (Rainbow Omega, 2021). Rainbow Omega advocates for their residents by ensuring that people with developmental disabilities have a safe and nurturing home. Rainbow Omega's "Statements, mission and Statement of Faith is a Christian environment" (Rainbow Omega, 2021). Rainbow Omega advocates for their residents by ensuring that people with developmental disabilities have a safe and nurturing home.

Strength 2: Medicaid

Medicaid has aided residents of Rainbow Omega who require further financial assistance. The Medicaid waiver helps with the financial burden that comes with living with disabilities. It is a non-profit that helps individuals with disabilities and their families. Medicaid also funds vital supports to keep them in their communities" (Ou Act, 2021). This Medicaid waiver helps residents with disabilities live in their communities. Ou Act (2021) "Mandatory benefits include services like inpatient and outpatient hospital care, physician services, laboratory and x-ray services, and home health services, among others. Optional benefits include services like prescription drugs, case management, physical therapy, and occupational therapy" (Ou Act, 2021). The residents can get better medical attention. Rainbow Omega's "Medicaid waiver helps with the financial burden that comes with living with disabilities. It helps them live their lives. "Nationwide, state and federal dollars work together provide over 75 percent of the funding for services for people with IDD" (Ou Act, 2021). Rainbow Omega's Medicaid waiver helps with the financial burden that comes with living with disabilities. It helps them live their lives. Medicaid is a non-profit that helps individuals with disabilities and their families. The Medicaid waiver helps with the financial burden that comes with living with disabilities. It helps them live their lives.

Strength 3: Individual Care for Residents

Rainbow Omega allows individual care for residents so they can get the care they need and deserve. The residents are able to have one-on-one care for them. They have a home manager who is dedicated to them. This can be looked like a strength because according to our survey on Facebook, the audience prefers to see more post about the residents and their individual care (Facebook Survey, 2022). Q1 and Q2 of the Facebook survey showed that staff and mission statement which shows how committed the employees are to the health and safety of each resident.

Strength 4: Living/Working residents on Campus

Rainbow Omega residents' vocational opportunities to earn money for independent living. This includes their refurbishment with friends and the garden center. Residents work part time or full time on campus. This is a strength because this allows residents to be active in their community atmosphere.

Weaknesses

Some weaknesses that Rainbow Omega possesses are lack of social, digital content, no in-house PR, lack of volunteers, location, the Newsletter, and Rainbow Omega's website.

Weakness 1: Lack of social, digital content

Rainbow Omega' social media tends to not be updated on a regular basis, which creates a barrier between their publics and the organization. Rainbow Omega should post something every day to their social media platforms. They do post on their social media platforms, but not as often as they should. Rainbow Omega's interaction rate with their target demographic would skyrocket if they were more proactive on social media.

Weakness 2: No in-house PR

Rainbow Omega has an in-house public relations, which could restrict the group from reaching its target audience. According to the Department of Labor (2021), "Most of the work of how a single shift can affect the entire system and lead to predictable outcomes (Penn State, 2021). Rainbow Omega's in-house public relations could be a weakness because the group is always in control of the social media and the information that is posted on the website. The shift could happen when you start to see the change in how the media and audience accepts the changes. Considering there is no in-house PR, an in-house PR dedicated to updates social media sites in a timely manner, creating a barrier between Rainbow Omega and the general public.

Weakness 3: Lack of Volunteers

The lack of volunteers relates to the system theory (Penn State, 2015), which is discussed in detail in Weakness 2. If the public is not informed about Rainbow Omega's needs, the organization will continue to struggle to find volunteers. Rainbow Omega has struggled to find volunteers to help with their events. Rainbow Omega has a Facebook page dedicated to their fans though. Rainbow Omega starts the process to build a volunteer program, they will be able to keep the relationships with the volunteers that will last long term.

Weakness 4: Rainbow Omega Website

The Rainbow Omega website does not get updated on a regular basis. The website could look more up to date with more information. The website does not include the wonderful information about Rainbow Omega such as their history and their upcoming events are not updated on a regular basis. Rainbow Omega's website is outdated and the website does not have current information about Rainbow Omega which can lead to lack of public participation.

Opportunities

The opportunities for Rainbow Omega include an expansion on social media, the Garden Center, local volunteer services for high school/college students, a relationship with the Jemimes Bear, and starting an Instagram page for Rainbow Omega.

Opportunity 1: Facebook Page

Rainbow Omega currently has 2,525 followers on its Facebook page. Because of this platform, Rainbow Omega can grow its social media presence if the organization chooses to do so (Facebook, 2022). Rainbow Omega has the opportunity to post more information to Rainbow Omega, stories about the facilities, and how to get involved.

Opportunity 2: Local Volunteers with high school/college students

Rainbow Omega has the option to work with local schools to recruit volunteers because of their location in Jacksonville, Alabama. Rainbow Omega can work with local organizations can offer making opportunities to earn community service hours, or taking advantage of this opportunity will raise awareness of the non-profit.

Opportunity 3: Building a relationship with the Jemimes Bear

The Jemimes Bear is used not only by Jemimes residents, but also by students and professors at local colleges. The Jemimes Bear is free to all JSU students (Jemimes, 2021). Rainbow Omega can work with the Jemimes Bear to have a table at their location so that the Jemimes Bear staff help them to reach out to new target audiences and to raise their services but are unaware of their presence.

Opportunity 4: Creating an Instagram page for Rainbow Omega

Rainbow Omega does not currently have an official fan base to reach the suggested ideal target audience (18-24 years old) for this campaign. "As of 2022, the average Instagram's audience are Millennial or Gen Z users. In fact, overall, Instagram is Gen Z's favorite social media platform (Aslam, 2022). Instagram is a great avenue using the target age group, and it can be used to connect with various groups and cities.

Threats

The threats Rainbow Omega currently faces are its employee reviews, donors' legacy passing, and COVID-19.

Threat 1: Employee Reviews

On the internet, there are negative employee evaluations for Rainbow Omega. There are two of reviews from website such as Indeed, Google, and Glass Door. Reviews from google states "Wonderful place serving special needs people" and another says "It's not recommend this place to work" (Rainbow Omega, 2022). Rainbow Omega's rating is 3.7 out of 5 stars. It has comments such as "I love working here. It is a great environment, and everyone is wonderful! Some of the reviews on Indeed can be scary. I was leery about coming here. It was the best decision I've made in a long time. I have great supervisors and co-workers" (Indeed Reviews, 2021). This is a risk because negative ratings could harm Rainbow Omega's reputation and lower the organization to lose volunteers.

Threat 2: Donor's leaving funding

The donors of Rainbow Omega are mostly members of the Church of Christ. These members where once fully active supporters donor is beginning to retire or pass, paying a huge loss to Rainbow Omega's budget. "Rainbow Omega's budget is around \$1.2 million. With donors passing, the legacy they have left at Rainbow Omega will slowly fade if there are not new donors. Donors are a large financial aspect to Rainbow Omega, the employees and most importantly the residents.

Threat 3: COVID-19

Rainbow Omega imposed limits on who is permitted on their campus as a result of the pandemic. The occupants are at a heightened risk of contracting the virus because this is a group home. "The COVID-19 pandemic has a perverse robustness from visiting the campus and visitor awareness.

III. Situational Analysis

The situation for Rainbow Omega is complicated regarding if this is a short-term or a long-term situation. The situation is that there is a lack of awareness from the public (digitally and traditionally. Yet, there is also a need for Rainbow Omega to have more volunteers to help around campus and to generate more of a relationship with the area's digital community. In order to fix the situation, there are obstacles such as lack of awareness and volunteers to consider.

Obstacles

The biggest obstacle for Rainbow Omega is keeping up with their social media profiles and updating their website. Rainbow Omega must keep their social media profiles updated to keep the public informed about the organization's activities.

Rainbow Omega must communicate to their target audiences, such as current donors and social media audiences about what they are searching for to recruit more volunteers. This relies on updating social media and web pages to ensure that the public has access to all information regarding Rainbow Omega's volunteer opportunities. Rainbow Omega's website is what fans are hoping to get out of Rainbow Omega. Rainbow Omega target audience for this campaign is high school and college students that are seeking community service hours. This is a challenge because Rainbow Omega is not in a location that is close to a college campus with awareness within their community. The target audience would also be providing Rainbow Omega with volunteers to help with short-term tasks and give the volunteers a sense of belonging and memories that will stay with them long term. The age group wants to see opportunities that will connect them with their community "By being actively engaged in their community, young people can develop a sense of belonging, responsibility, and pride and they can develop a strong sense of ownership in their place" (MELIDA, 2021). While Rainbow Omega hires representative's for the volunteers to come back and eventually work for the organization. Rainbow Omega's "Volunteers are also encouraged to apply if a chance to share their unique knowledge and experiences with new recruits and pass on the legacy of what they've learned" (Johnson, 2017). Rainbow Omega could be mentoring these volunteers to help people within their community. If Rainbow Omega's goal is to have these target audiences, you must allow them to spend substantial time for them to grasp Rainbow Omega's mission.

To improve the awareness of Rainbow Omega, the organization will need to work on their target publics. It is important to reach out to different clubs and organizations on that specific campus that aligns with Rainbow Omega vision. This allows Rainbow Omega to build a relationship with that specific school and raise awareness of the non-profit. It is important to remember that "Not all of the work will be done by the staff. Many of the other organizations when reaching out to them. It is important to concentrate on the challenge Rainbow Omega is facing and turn it into a chance for both parties to flourish.

Communication channels

Rainbow Omega has three main communication channels. The Rainbow Omega Newsletter, Facebook Page, and Website. The audience of these channels are predominately people who have a connection to Rainbow Omega, such as donors, staff, residents, and families, and donors (see Appendix A, Figure 3).

Rainbow Omega Newsletter

The Rainbow Omega Newsletter is mailed every three months to the specific audiences that is connected to Rainbow Omega (see Appendix B, Figure 4). The newsletter appears to be emailed or posted on social media. There should be an electronic copy uploaded and sent to donors about everything going on at Rainbow Omega. They do upload the newsletter to their website (Rainbow Omega, 2022). Rainbow Omega's newsletter is informative, but the mailing the newsletter available digitally to reach other target audiences. Rainbow Omega should consider updating the newsletter to give it a more modern feel. Finally, Rainbow Omega should consider sending the newsletter out more frequently.

Rainbow Omega Facebook Page

Rainbow Omega has a large Facebook following of 2,500 people. This is the place where the public may learn more about the organization. "Keeping the content up to date on your site helps build trust between you and your customers. Most likely, customers look to your site for useful information so whatever market you are in. Updated information also helps build your search engine ranking. This is a great way to communicate with your audience as well as a regular basis to keep readers interested.

Rainbow Omega Website

Rainbow Omega's website is intended for the public to obtain all necessary information. There is a tab under the Store Quit ("Help!" section of the website called "volunteer" (Rainbow Omega, 2021). This section provides a printable volunteer application for people to fill out and then send to Rainbow Omega. There are lots of areas that could be updated to improve the website. Rainbow Omega's "Store" is outdated and does not have a lot of plants for their display. The website is not updated on regularly as it should be, and the design of the website should be more modernized.

IV. Suggestions for Public Relations and Advertising Improvements.

Rainbow Omega has four areas of improvements to address regarding the public relations and advertising that could complicate Rainbow Omega from expanding its awareness and volunteers. Rainbow Omega's "Statements, mission and Statement of Faith is a Christian environment" (Rainbow Omega, 2021). Rainbow Omega advocates for their

Area for Improvement 1: Strategic Communications

Strategic communications is a crucial idea in achieving and maintaining a relationship with a target audience (Strategic Communications, 2022). Rainbow Omega's "Statements, mission and Statement of Faith is a Christian environment" (Rainbow Omega, 2021). Rainbow Omega is having a face-to-face encounter or virtual involvement. Rainbow Omega has been able to determine their main target audience and how to communicate with this target audience Facebook page. This finding is supported by our primary survey research.

Area for Improvement 2: Awareness

Digital audience awareness stems from how the public obtains information, after performing the survey, it was discovered that social media is the primary source of information for Rainbow Omega's audience. Rainbow Omega could further utilize social media to better reach their audience (Facebook, 2022). Rainbow Omega's audience awareness of the organization is double since, but only information is obtained is the public. For Rainbow Omega, the company will need to have social media posts scheduled for the public to see. Rainbow Omega's "Statements, mission and Statement of Faith is a Christian environment" (Rainbow Omega, 2021). Rainbow Omega advocates for their

Area for Improvement 3: COVID-19 (Pandemic)

The COVID-19 pandemic has transformed the conversation about how the organization interacts with its residents and visitors. Rainbow Omega's "Statements, mission and Statement of Faith is a Christian environment" (Rainbow Omega, 2021). Rainbow Omega advocates for their groups, particularly younger ones, because it is a more convenient approach to broaden Rainbow Omega's mission. The pandemic changed the way Rainbow Omega interacted with the community and how they could volunteer

Rainbow Omega seems to have a low level of engagement with individuals from the ages of someone in twenty-four-year-old based on the survey. The age group would be beneficial to volunteerism for Rainbow Omega to increase their audience reach. Most high schoolers are not old enough to drive, so they rely on their parents to transport them to and from events. There are also many of them and teens with high schools and college close to Rainbow Omega where this age group resides (see Appendix A, Figure 2).

Rainbow Omega is located between Birmingham, AL and Atlanta, GA in Lamburgh, AL. Rainbow Omega provides in between one of the largest cities in Alabama, which is Birmingham, and Atlanta, GA, which is the largest city in Georgia. Rainbow Omega location brings in the middle point between the two cities so that they can be found by all of the individuals most people travel to get to the cities. Based on the survey, the respondents are primarily located in Anniston, Oxford, Pell City, and Lincoln areas.

Rainbow Omega is a Christian-based organization. The survey helped us to find all the Christian institutions that Rainbow Omega locates. This is important for our team to become knowing the different Christian audiences Rainbow Omega has will provide a better opportunity to reach out to the correct audience. Some of the Christian institutions Rainbow Omega knows through their church or a friend that is a member is Presbyterian, Assemblies of God, Lutheran, Church of the Nazarene, Pentecostal, Holiness, Seventh-Denominational, and no religion (see Appendix A, Figure 3).

Religion is very important to Rainbow Omega. The Rainbow Omega mission statement is "Rainbow Omega is a place for all to be loved, to be accepted, to be encouraged, to be healed with their mission statement. The mission statement is important because everything we do should be based around it. Anything that we do will be based around the core values and mission statement of Rainbow Omega. Most people who have visited Rainbow Omega know the mission statement and we want to make sure all audiences know the mission statement (see Appendix A, Figure 4).

Rainbow Omega has a large focus on the Bible. The survey shows Rainbow Omega has a minimum of conference. Based on the survey, we found sixty percent of the respondents know of Rainbow Omega through a friend or family member. We need to find a new way for Rainbow Omega to be known for their products and wonderful atmosphere rather than just through word of mouth (see Appendix A, Figure 5). Forty percent of the survey respondents know about Rainbow Omega through their church or a friend. With this information, we believe that we could get a larger audience to learn about Rainbow Omega besides a friend or from a church (see Appendix A, Figure 6).

Rainbow Omega has had the same logo since the 1970s, but it has been changed a few times. The logo has been changed to a more modern look. Rainbow Omega has been known for their mission statement. Twenty-eight percent of the survey respondents believe that it is extremely clear that the logo reflects their mission statement. Twenty-six percent believe that it is somewhat clear that the logo reflects their mission statement is reflected in the logo (see Appendix A, Figure 8). People know Rainbow Omega by their logo and their mission statement. A changing of the logo would not hurt, but it is also not necessary (see Appendix A, Figure 7).

The Rainbow Omega website is very straightforward. Twenty-nine percent of the respondents believe that the website is extremely easy to navigate, and thirty-four percent say that it is easy. Twenty-one percent of the respondents never visited the website. Rainbow Omega should be looking at the website to find updates and opportunities. Having a website is the easiest way to find information, increase information, and share their services (see Appendix A, Figure 9).

Rainbow Omega offers many services such as corporate work, garden center and gift shop, greenhouse, and intermediate care facilities. Forty-three percent of the respondents do not associate Rainbow Omega with the intermediate care facilities. Eighty-nine of the respondents answered the survey question. While the second largest was Rainbow service was Greenhouses by fifty-six percent. The services that Rainbow Omega offers can be offered to clients, workers, customers, and volunteers (see Appendix A, Figure 10).

Secondary Research: Content Analysis

Google Reviews

Rainbow Omega has a total ranking of 3.8 stars out of five stars on Google Reviews (Google Reviews, Rainbow Omega). There are a total of nine reviews posted. One of the reviews posted two months ago.

"Management was among the worst that I have ever seen. Usually rude and when I would try to talk to them about the issue, they would walk off. I left a note for the GM, but I have always found out by the very next before that we and would talk down to me. The last time I was got on to me when I became ill and had to go to the hospital one morning. He made it there to me that he did not care about me and that all he cared about was getting money. Screw bad I left so disrespected, insulted, and unappreciated in my life and so I left more than I have ever left. I will never go back to Rainbow Omega and I would not have had to submit a review of them since leaving. I do not recommend this company at all. I want to see even a second time." (Google Reviews, Rainbow Omega)

Positive reviews are also found about Rainbow Omega. There are positive comments such as "Wonderful place serving special needs people" and "Awesome Job" (Google Reviews, Rainbow Omega). Rainbow Omega has many reviews. There should be a focus of getting employees, clients, and volunteers to leave a review.

Indeed Reviews

Rainbow Omega has fifty-four total reviews on Indeed.com, and the company has an overall rating of 3.2 stars (Indeed, Inc, 2021). The first review was a 3.0 and was posted on August 19 of 2021, which states,

"The work environment is very interesting the ECF is the place to work if you are going to work at Rainbow Omega. The ECF Management team has some amazing people there that they work with. Some days you are unable to succeed at the job they have given you. A problem is that they have to deal with the administration office and that is where the resident culture is. The office is very toxic. The office is where you will see the make-over the people that they can be long and stressful." (Indeed, Inc, 2021)

This review will impact Rainbow Omega by providing a negative connotation to the reader. This explains that the positions are the best part of the job. There are also positive reviews on Indeed.com about working at Rainbow Omega such as "I love working here. It is very fast paced and always something to do. Management is great and very supportive to get to work. I was hired starting here. It was the best choice I made for me and my family. I have a great connection with the residents" (Indeed, Inc., 2021). Reviews are essential to any business and can be a make-or-break factor for customers; but with Rainbow Omega having the positive reviews can drive over the negative ones.

Rainbow Omega's Website

The website is off to a great start but does need to be updated more often. The most recent blog post is dated November 2020 (Rainbow Omega, 2021). The website has a blog, but it is not the Christmas post that the readers have had. There were prior letters and there was not uploaded to the website. There is a section on the website for the Board Members and officers. You should display more contact information and knowledge about the board members, if you ask someone related to their section of why they became board member the reader would be more likely to want more of a duty of why they become a part of Rainbow Omega. (2021)

The newsletter section of the website has not been updated since Fall 2021. This is an area that needs to be updated more than once a year. Rainbow Omega has a newsletter as much updated content as possible. If you are only updating the content once a year, your readers will not be interested in your newsletter (Rainbow Omega, 2021). Section 1.1.1 believe that the newsletter should always be uploaded on the website with the most recent reporters. Rainbow Omega sends a new release to read every three months with an update about Rainbow Omega. The organization's newsletter typically includes a promotion about the seasonal flower being sold at the Garden Center. Forms presented from Apr. 1, Aug. 1, and Dec. (Rainbow Omega, 2021). The newsletter contains fun from June 1, 2021 (Rainbow Omega, 2021).

Under the Life at Rainbow Omega section on the website, there are the residential program, respite care, and vocation program. The residential program section explains that Rainbow Omega is home to eighty-two adults with development disabilities. The respite care section explains that Rainbow Omega provides short-term care for individuals ages 18 and older (2021). "Rainbow Omega can help by providing short-term respite care for your loved one can travel, receive medical treatment, or just take a break. Parents can stay up to a week in advance" (Rainbow Omega, 2021). The vocation program is for ages 18 and older. The vocation program is a day program that provides individuals with the opportunity to work in a variety of work centers where they can research, productive employment. Our work centers is staffed by Direct Support Professionals who train consumers and individuals and always job coaches and quality control coordinators." (Rainbow Omega, 2021)

Garden Center

The Garden Center is one of Rainbow Omega's main attractions This is a great attraction to the community. The Garden Center is open to the community from March to October. It is considered a month in progress. We believe that with repairing the roads, Rainbow Omega would be able to provide them with volunteer services and resources in the garden center (Rainbow Omega, 2021). Rainbow Omega has a variety of plants, vegetables, flowers, herbs, and flower plants, and the community can visit the Garden Center to purchase them also make their purchases while helping to support a worthy cause at the same time. Rainbow Omega can offer that same atmosphere with the youth. You can buy memorial bricks, spring crops, and black and blue berries. Under this section you can look at pictures of the Garden Center and their services etc. (Rainbow Omega, 2021).

Rainbow Omega Facebook

Facebook provides the public's resources to learn and see what the organization is about. Rainbow Omega has a Facebook. The Facebook page has 1,100 likes. There is a lot of details about of Rainbow Omega (Rainbow Omega, 2021) We believe that there should be more consistent posting. Based off the Facebook, it seems the post are posted randomly with little to no rhyme or reason. There is a lot of information that is not posted on the Facebook page that you are posting. Facebook is about interactions. A posting calendar is good thing. Connect to nonprofits using social media. Rainbow Omega could benefit from a posting calendar to update the public following on social media.

VA. Target Public Problem

Our target audience is high school and college students. We believe that Rainbow Omega has wonderful opportunities within their surrounding area to target high school and college students for community service and engagement. According to the survey that Rainbow Omega has the lowest audience rate in the range of 19- to 24-year-olds. We want to target this and a few other age ranges to help bring more awareness to Rainbow Omega (See Appendix A, Figure 2).

High school and college students want to engage in the nonprofit area and influence them back area, apart from that, there is in some cases a distinction between the way students and nonprofit associations impact. "Teenagers today feel very busy lives between school, homework, sports, and jobs. They are also very likely to be involved in a variety of anything else their students would like to find time to volunteer at different nonprofit organizations" (Smith, 2021). Students can engage in a club or an association anyclub, they are interested in, whether it is sports, arts, or anything else that they are interested in service. "Through their service, students are given the opportunity to work with a variety of diverse people. This helps them develop a sense of social awareness. They learn patience and empathy while getting to see first-hand how they can have a positive impact on their community" (Smith, 2021). These are the kinds of student nonprofits, such as Rainbow Omega can benefit from. They can help students learn about the services that the student nonprofits, keep up with these connections, and take advantage of what the students can offer.

Colleges

- Jacksonville State University
- Gadsden State Community College
- Jefferson State Community College (St. Clair Campus)

High Schools

- Oxford High School
- Lincoln High School
- Pell City High School

All of these locations are special. The colleges are all within thirty miles and the high schools are within fifteen miles of the Rainbow Omega Campus. While there are more high schools and colleges in the area, these are the ones that are the closest to the Rainbow Omega. Rainbow Omega connecting with these schools and colleges will allow Rainbow Omega to have access to show more awareness and to create connections for themselves with students and staff at these locations.

Throughout all the colleges and high schools' campus, there are fliers, signs, and all events. Rainbow Omega can post fliers around the campus to help with awareness and to help with the nonprofit reach out to them. Through this, Rainbow Omega could potentially engage these students thinking about inclusion in an association - philanthropists should see this while endeavoring to enroll students to work with them. Inviting connections can be fabricated through branches nearby, facilitating volunteer occasions, or teaming up with different philanthropies have an occasion for mutual advantage.

A part of an organization led by students nearby permits those contribution or volunteering with the association to feel more genuine. Students are more likely to engage in a cause or association with a time they see different students in their position doing it as well. Partnering community service has been shown to offer a number of benefits for young people before, during, and after college (Shook, Chris, 2021). "Students who participate in service before, during, and after college have been professionally, educationally and personally" (Smith, 2021). Students who have chosen a volunteer opportunity to enroll on campus will get more people involved.

This part of the plan book is to go over strategies and tactics created for Rainbow Omega. Each objective has strategies to have an effect on awareness, acceptance, and action, and attached to those are tactics to execute those objectives.

Objectives

1. Objective One: To have an effect on awareness; specifically, to create an increase in knowledge about Rainbow Omega's mission among 150 high school and college students in the local Eastalonga and surrounding areas in one year.

Rationale: There are three prominent high schools and colleges within the Eastalonga surrounding areas. We calculated an average of 1,000 high school and college students. Based on this estimation, we believe 150 student volunteers would be a reasonable goal for seventy-five high school students and seventy-five college students over a fiscal year. "Through their services, students are allowed to work with various diverse people groups, which helps them develop a sense of social awareness. In addition, they learn patience and empathy while getting to see first-hand how they can have a positive impact on their local community" (The importance of community service, n.d.). This campaign centers on students as a method to engage the community. Rainbow Omega's organizational opportunities are excellent for students to prepare for the future and enhance their communities, a mutually beneficial possibility for students and Rainbow Omega. In addition, service participation fosters social aptitudes and understanding of humanity.

Strategy 1: Engage with high school and college students on social media to inform them of Rainbow Omega's mission.

Rationale: The younger generations are avid social media users. To reach this target audience, Rainbow Omega will need to be active on social media. "Over 70% of adults on Facebook, Instagram, and the Rainbow Omega website. "If there was to accomplish this, social networks as a channel through which they reach their customers, they must fully understand the reasons that these customers choose to use social networks. The relationship between attitude and behavioral intentions established in the Theory of Reasoned Action (TRA) (Fishbein and Ajzen, 1975) and the Technology Acceptance Model research constructs confirm that influence consumer attitude toward social networks and their intention to use, continue using, and recommend social networks" (Cavazos, & Cousson, 2011).

Tactic 1: Dedicate an individual to manage social media accounts.

Tactic 2: Create an Instagram account for Rainbow Omega. (See Appendix B, Figure 10)

Tactic 3: Generate a potential list of websites to follow on Instagram page. (See Appendix B, Table 2)

Tactic 4: Develop a seasonal content calendar (See Appendix B, Figure 11).

Tactic 5: Share photos and videos of the organization's residents. (See Appendix B, Figure 12).

Strategy 2: Utilize Facebook to interact with parents of high school and college students to inform them of Rainbow Omega's mission.

Rationale: "The previous studies have examined the relationship between Facebook and student engagement, a construct related to positive college outcomes" (Junco, 2012). This shows us how Rainbow Omega can use Facebook to engage parents and students.

Tactic 6: Post 3 to 5 times a week to connect target audience to reaching content.

Tactic 8: Share photos and videos of the organization's residents. (See Appendix B, Figure 13).

2. Objective Two: To have an effect on acceptance; specifically, to increase positive attitudes toward the volunteer programs among 25.7% of college students and 26.4% of high school students in one year.

Rationale: Participating in community service allows one to review where they are as a professional mannor. Volunteer work is also what more than a jobs. High school and college students with more volunteer experience than their peers will have an advantage over their peers when it comes to applying for jobs (Shook, Chris, 2021). Rainbow Omega can use this in addition to the effect of Motivations for Volunteer (MOV) on rates of volunteering to see the impact of utilitarian, MOV and the signaling value of volunteering on the nature of volunteering (Handy, Brodeur, & Cnaan, 2006). "Using the 2001 and 2004 CPS data on intensity of involvement, only long-term active volunteers significantly more likely to affect altruistic MOV than shorter-term episodic volunteers, who are likely to be satisfying more self-interested MOV such as resume building" (Handy, Brodeur, & Cnaan, 2006; Brown & Ferris, 2007). This research shows the nature of why individuals choose to volunteer and how they choose a volunteer program.

Strategy 1: Produce social media content to influence college and high school students to engage in volunteer opportunities at Rainbow Omega.

Rationale: "Hootsuite Insights' Global Social Media Impact Study examines actual behaviors and rates how influential they actually. According to a recent poll, 22% of teenagers log in to their favorite social media site more than 10 times a day, and more than half (53%) log in to a social media site more than once a day" (Al-Rawi & Clarke-Pearson, 2011) This shows that if Rainbow Omega can be active on social media, we will have a influence on them through their favorite platform.

Tactic 4: Create a static coverage for why high school and college students should volunteer at Rainbow Omega. (See Appendix B, Figure 14)

Tactic 5: Create Instagram content for college and high school students to influence them to volunteer at Rainbow Omega. (See Appendix B, Figure 15)

Tactic 6: Create Facebook content for target audiences' parents informing them of the volunteer opportunities at Rainbow Omega. (See Appendix B, Figure 16)

Strategy 2: Create a traditional media campaign, to promote the benefits of volunteer service for students.

Rationale: "This study investigates characteristics of internet users compared to a non-internet individuals — newspaper readers. Consumers of each medium are compared based on their perceived motivations, shopping innovativeness, self-esteem, and reluctance toward technology" (Eastman, Iyer, & Thomas, 1999). This research shows that traditional media and digital media have similar characteristics. In Rainbow Omega, we will make it easier for students to engage through traditional media.

Tactic 8: Create a newsletter on the benefits of becoming a volunteer for Rainbow Omega. (See Appendix B, Figure 17).

Tactic 9: Create an infographic of the benefits of volunteer work for college and high school students. (See Appendix B, Figure 18).

3. Objective Three: To have an effect on action; specifically, to obtain an increase in high school and college volunteers at Rainbow Omega by 15% in one year.

Rationale: "The research emphasizes the influence of volunteering as a starting point on past that for an undergraduate student population volunteering is motivated by career development" (Hustinx & Lammertyn, 2003). Rainbow Omega can use this to influence the college students' perceptions of students and help advance their careers. Key volunteer participation will be higher" (Handy, Cnaan, Hustinx, Kang, Brudney, Haski-Leventhal, & Zrinscak, 2010). This shows us that volunteering is attractive to students because it boosts their chances of getting jobs in the future, so they will more than likely take the action of volunteering.

Strategy 1: Implement social media campaigns to influence high school and college students to volunteer at Rainbow Omega.

Rationale: "Online social networking tends to enhance these benefits, as consumers are able to share their experiences with a wide audience, and they can also receive feedback. Individuals can seek out others' opinions about specific products. In doing so, consumers have been shown to value peer judgments more than firm promotions, inducing a shift in power from companies to consumers" (Mangold & Faulds, 2009). This shows the importance of using digital media through persuasive power.

Tactic 6: Create a sign-up portal that is linked to Rainbow Omega website. The sign up is a google form. You will be able to add the form responses to your tracker as you receive them. (See Appendix B, Figure 19).

Tactic 8: Add the link from the sign-up portal to Rainbow Omega's social media accounts (Facebook and Instagram).

Tactic 7: Provide sign up form on the Rainbow Omega website but can also submit it on social media. (See Appendix B, Figure 7)

Strategy 2: Implement traditional media to demand ways of volunteering in the program.

Rationale: "Volunteer management practices have been shown to have positive effects on employees in terms of skill development, job success, organizational fit, job satisfaction, and the public, nonprofit, and corporate sectors" (Hoeve, Chen, & Lull, 2021). This shows us that by explain different volunteering opportunities can be seen as a positive way to gain experience.

Tactic 8: After the volunteer has signed up to volunteer. An employee at Rainbow Omega should reach out to the volunteer to provide more opportunities and different ways to volunteer. (See Appendix B, Figure 20).

Tactic 9: The employee should reach out to the volunteer services will be at the directions of the Rainbow Omega staff and administration. The services that will be provided on social media. (See Appendix B, Figure 21).

Tactic 7: Volunteer would help to perform basic daily tasks for Rainbow Omega such as will be picking berries, creating berry products, cleaning around the garden center, organizing the Garden Center, watering the plants, minor maintenance, picking up litter from the parking rents, answering garden phone, or performing other tasks on each day will be an option.

Strategy 3: After volunteers complete their service, they will be encouraged to share their experience through digital media.

Rationale: "This study examined how non-profit organizations (NPOs) adapted to the new media environment by using social networking websites to engage the public in dialogic engagement with interested supporters. Findings from this content analysis and virtual ethnography revealed NPOs dramatically transformed the structure of online content. Specifically, NPOs used the interactive capacity of the Internet to disseminate information to motivate conversations substantially changed the dynamism for activists and fosters new modes of engagement between NPOs and supporters" (Seelig, Mikkelsen, Brew, & Huang, 2010). This explains how important it is for Rainbow Omega to encourage use on social media with profits, but for their customers to do the same.

Tactic 4: Create a review tab on the Rainbow Omega Facebook. (See Appendix B, Figure 6)

Tactic 8: Encourage volunteers to leave reviews on the Rainbow Omega Facebook. (See Appendix B, Figure 8)

Tactic 7: Encourage volunteers to share their experiences by posting a picture on Instagram and tagging Rainbow Omega (See Appendix B, Figure 9).

This portion will go through the media plan and strategy. This will include the POST model which is short for: paid, earned, shared, and owned media and the tactics used to execute this plan.

1. Objective One: To influence awareness; specifically, to create an increase in knowledge about Rainbow Omega's mission among 150 high school and college students in the local Eastalonga and surrounding areas in one year.

Paid Media Strategy: To utilize a digital creative content website, such as Canva, to assist with the development and distribution of the campaign promotion for the volunteer program.

Rationale: Canva is one of the few digital creative content websites that offers a free membership. "Canva is a free online design tool that helps you create graphics for any purpose, no matter how much graphic design training you've had" (Canva, 2021). This will allow Rainbow Omega to provide a creative invitation program to use for the volunteer program. Rainbow Omega can also use Canva to create graphics for the Facebook and Instagram pages.

Tactic 1: Sign up to users by creating a profile with your email and a password.

Tactic 2: Purchase the website program Canva

Tactic 3: Choose a design for the graphic

Tactic 3: Insert advertising writing that will promote Rainbow Omega volunteer program.

Tactic 4: Use the graphics on all social media websites. Using Canva and intriguing graphics will catch the attention to Rainbow Omega social media sites.

Tactical Media Strategy: To help achieve this objective, Rainbow Omega can invite media to the volunteer program. Social volunteer program by forming a relationship with journalists, journalists and reporters.

Rationale: Traditional media is a helpful resource, even in the age of technology!

Supporting Data: 68% of adults aged 18-34 read more than an hr of online and print newspaper" (Newspaper Data, n.d.). Therefore, traditional forms of media should target students' parents.

Tactic 1: Generate media pitch about Rainbow Omega and the volunteer program (See Appendix A).

Tactic 2: Distribute media pitch to The Chanticleer's editor-in-chief, Breanna Hill via email. It is very important to develop and maintain a positive relationship with the reporters and staff with The Chanticleer. The staff of this paper can help to ensure your message is conveyed to those that read their paper.

Tactic 3: Distribute media pitch to Local Matters with Jamie Kimpson via Facebook messenger. Local Matters is a television show that highlights local businesses and inspires local viewers to act. Local Matters is in the Anniston/Oxford area.

Tactic 4: Finalize time to be on Local Matters and story with The Chanticleer's

Shared Media Strategy: This will be a post on Instagram and Facebook for inspiring volunteers. This will help achieve the objective by using Rainbow Omega's mission, vision, and values of Rainbow Omega as well as a brief history on the starting of Rainbow Omega. This information will consist of a Facebook post to reach the parents of the potential volunteers. (See Appendix P, Figure 1)

Rationale: During the mission, vision, and values available helps volunteers see why they should commit their time to Rainbow Omega for volunteers to see what Rainbow Omega stands on and believes in.

Tactic 1: Create an Instagram and Facebook post with information regarding Rainbow Omega Volunteer program and include the mission. (See Appendix P, Figure 1)

Owned Media Strategy: This will focus on emailing bulk schools (clubs, organizations) Making sure teachers/leaders/parents know about Rainbow is striving to do. Promote the vision, provide updates and FAQs that can think may appeal to parents. Express why many people decide to commit their time to Rainbow Omega by volunteering.

Tactic 1: Visit the school websites and email the principals of the schools to see how the best way to contact school sponsors. (See Appendix C, Figure 2)

Tactic 2: Email brochure sponsors for specific clubs and organizations.

SL Objective Two: To enhance acceptance, specifically, to increase the positive attributes toward the volunteer program among 20.7% of college students and 26.4% of high school students in one year.

Owned Media Strategy: To help achieve this objective, Rainbow Omega should use their website to post blogs about the benefits of participating in the volunteer program. Also how to know what type can receive their volunteering.

Rationale: This strategy is to ensure that volunteers can be informed to join the Rainbow Omega volunteer team through creating content on social media.

Tactic 1: Create social media content showing the incentives of volunteering at Rainbow Omega. Create an ad that will have a daily budget of five dollars every day for 4 weeks. (See Appendix P, Figure 3)

Tactic 2: Create flyers and ad units for seven days, to be rated for the ad would be thirty dollars.

Earned Media Strategy: Rainbow Omega can facilitate and analyze online reviews of the volunteer program to receive third-party vouchers of the benefits of participating with this nonprofit.

Rationale: Positive and negative reviews display audience perception. Volunteers can express their thoughts and ideas about Rainbow Omega on websites like Facebook and Google, where potential volunteers look for information. Acceptance can be measured by analyzing reviews.

Tactic 1: Rainbow Omega must create a separate tab on its website for volunteers to write reviews.

Tactic 2: Rainbow Omega also have an option where volunteers can write reviews on the Facebook page.

Tactic 3: The organization should monitor online reviews and respond in a timely manner (See Appendix P, Figure 4).

Owned Media Strategy: Have a form on the website that is available for volunteers to sign up making it very accessible site and easy to get involved. Then having a survey for recent volunteers to see what Rainbow Omega can do better at.

Rationale: This shows are the incentives of what the volunteers will receive from Rainbow Omega after completing from community service hours.

Tactic 1: Create an email and include the incentives in that comes with volunteering. (See Appendix P, Figure 5)

Tactic 2: Send email to local high school, colleges, and clubs. (See Appendix J, Figure 1)

SMA Objective Three: To have an effect on activism, specifically, to obtain an increase in high school and college volunteers at Rainbow Omega by 10% in one year.

Paid Media Strategy: This will consist of ad on it to help get more knowledge to people on Facebook about opportunities of volunteers for Rainbow Omega. Rainbow Omega should use this to target the audience they prefer which would be high school and college students. This will also include having a giveaway fund for the past volunteers allowing Rainbow Omega to give out a gift card.

Rationale: Purchasing a Facebook ad will allow people to sign up to volunteer from wherever they are. Also, having a giveaway fund will help encourage people to sign up. This will increase number of sign ups for the volunteer program and help promote it's activism. (See Appendix P, Figure 6).

Tactic 1: Create an email and include the incentives in that comes with volunteering. (See Appendix J, Figure 1)

Tactic 2: Send email to local high school, colleges, and clubs. (See Appendix J, Figure 1)

SMA Objective Three: To have an effect on activism, specifically, to obtain an increase in high school and college volunteers at Rainbow Omega by 10% in one year.

Paid Media Strategy: This will consist of ad on it to help get more knowledge to people on Facebook about opportunities of volunteers for Rainbow Omega. Rainbow Omega should use this to target the audience they prefer which would be high school and college students. This will also include having a giveaway fund for the past volunteers allowing Rainbow Omega to give out a gift card.

Rationale: Purchasing a Facebook ad will allow people to sign up to volunteer from wherever they are. Also, having a giveaway fund will help encourage people to sign up. This will increase number of sign ups for the volunteer program and help promote it's activism. (See Appendix P, Figure 6).

Tactic 1: Communication is key for getting people to come to the campus. Having an uncomplicated way for volunteers to access volunteer program will be vital.

Tactic 2: Create email to send out to volunteers.

Tactic 2: Send out email to all interested volunteers. (See Appendix P, Figure 5)

Owned Media: Have on the website that is available for interested people to sign up making it is very accessible site and easy to get involved. Then having a survey for recent volunteers to see what Rainbow Omega can do better at.

Rationale: Providing recent pictures of volunteers on the website will show the involvement of volunteers. Having a survey for after the volunteer work is done will let Rainbow Omega know what they can do better.

Tactic 1: Create a google document sign up link (See Appendix C, Figure 12)

Tactic 2: Create important questions for the volunteers.

Tactic 3 Volunteers will be able to sign up using the volunteer website. (See Appendix P)

Tactic 4: Create survey that consist of questions about what the volunteers enjoyed and what Rainbow Omega can do better. (See Appendix P, Figure 5)

Budget

This first year we made the most of each dollar. This cost-efficient budget will enable Rainbow Omega to reach 20.7% of college students and 26.4% of high school students. Rainbow Omega should be able to raise their budget. This focuses on the year ahead and gives an option for ads every month. With this budget Rainbow Omega should see a change in the awareness of the volunteer program. (See Appendix C, Figure 1)

I. Calendar for Timeline of Program Implementation

Based on our development and suggestions for a volunteer program for Rainbow Omega, this program will take at least one fiscal year to implement. The objectives of this program, which focus on awareness, levels of awareness, acceptance, and action, provide the direction for how to evaluate the effectiveness of this volunteer program.

Phase One: Awareness

To foster awareness about the volunteer program, Rainbow Omega should frequently post on its Facebook and Instagram pages. Rainbow Omega should post content on these pages at a 5:1 ratio. (see Appendix P, Figure 1) After making the target audience aware of Rainbow Omega's mission on Instagram, the organization should begin posting on both Facebook and Instagram about volunteer opportunities. While also updating the website to keep information about the volunteer program and Rainbow Omega accurate for your audience.

Phase Two: Acceptance

It is essential to get students and their families to accept the volunteer program and have positive feelings toward it. We suggest ensuring the benefits of student volunteerism on social media and at speaking engagements. The benefits of volunteering should be communicated to students and their parents to demonstrate Rainbow Omega's importance at its organization (see Appendix P, Figure 1).

Phase Three: Action

In efforts to influence the action of student volunteers, we suggest that students are encouraged to sign up for the volunteer program and that they are aware of the many diverse ways that types of volunteer opportunities at Rainbow Omega and the benefits of participating in this program (see Appendix P, Figure 1). Rainbow Omega should promote the form on Instagram and Facebook. Rainbow Omega should also post on Instagram at a 5:1 ratio. By signing up from its Facebook posts, creating Instagram stories with a clickable link to the form, and mentioning the form in the captions of Instagram posts. With the website, students can have access to a volunteer sign up form. Rainbow Omega will be able to track the number of sign ups that come from each platform. The volunteer sign up form will be sent to the volunteer coordinator at the start of the campaign (see Appendix P, Figure 1). The sign-up form for this program can also be brought to hand out to students at various speaking engagements with student organizations and schools in the surrounding areas.

II. Measurement & Evaluation

After the implementation of the volunteer program, Rainbow Omega must evaluate the effectiveness of the volunteer program to see if all the objectives were achieved. An evaluation of the program will help Rainbow Omega to see what worked and what needs to be fixed. In developing a survey for volunteers and conducting a content analysis on mentions regarding the organization (see Appendix P, Figure 1). Our effective way to evaluate the program is to create a survey for the volunteers to fill out (see below). This survey will evaluate all the objectives. Each objective should be measured using primary and secondary research which is important as these methods provide a way to measure the organization's success of public opinion.

1. Objective 1: To influence awareness; specifically, to create an increase in knowledge about Rainbow Omega's mission among 320 high school and college students in the local Anniston and surrounding areas in one year.

2. Primary Research: Google Document Volunteer Survey

To measure the effectiveness of how Rainbow Omega initially promoted its mission and the volunteer program, a survey should be conducted to see how many high school and college students have become aware about the Rainbow Omega volunteer program. This will help Rainbow Omega to see if the objective was achieved. This survey will be conducted using documents. The link to the survey question have been attached to the posts on Instagram and Facebook to see what percentage the public has about the program (see Appendix P, Figure 1).

3. Objective 2: To have an effect on activism; specifically, to obtain an increase in high school and college volunteers at Rainbow Omega by 10% in one year.

4. Primary Research: Survey

Rainbow Omega should conduct a survey to get a better understanding of what types of volunteer activities the students did in the program, if the volunteers had a positive experience, and if they would volunteer again. This should help Rainbow Omega gain knowledge about how to continue with the volunteer program (see Appendix P, Figure 1).

5. Secondary Research: Content Analysis and Number of Volunteers

To measure and evaluate Rainbow Omega social media, the nonprofit will have to understand to measure the effectiveness of the content provided by Rainbow Omega of the volunteer program. This will help Rainbow Omega to see what content is working and what is more attractive on social media. This can be conducted through Rainbow Omega's Facebook and Instagram, and the interactions that the target audience has. This can include, but is not limited to, likes, comments, shares, etc.

6. Objective 3: To enhance acceptance; specifically, to increase the positive attributes toward the volunteer program among 20.7% of college students and 26.4% of high school students in one year.

7. Primary Research: Survey

To measure how students have increased positive attitudes toward the volunteer program at Rainbow Omega, a survey will be conducted (see Appendix P, Figure 1). This survey questions about the realization of the benefits and mission of the volunteer program. They should be able to know if the target audience accepts the message through the surveys questions. This should also help Rainbow Omega understand who accepted the program (see Appendix P, Figure 1).

8. Secondary Research: Content Analysis

To measure the attitudes towards the volunteer program, Rainbow Omega also needs to conduct a content analysis of the social media. This type of evaluation is to understand what content the public interacts with most and what impact the content makes on the organization. This can be conducted through Rainbow Omega's Instagram and Facebook to see what percentage the public has about the program (see Appendix P, Figure 1).

9. Objective 4: To have an effect on activism; specifically, to obtain an increase in high school and college volunteers at Rainbow Omega by 10% in one year.

10. Secondary Research: Content Analysis and Number of Volunteers

While we propose that a twenty percent high school and college students may participate in the volunteer program within its first year, Rainbow Omega must also conduct secondary research to see if the objective was achieved (see Appendix P, Figure 1). Rainbow Omega can be asked to have a count of how participants in the Rainbow Omega Facebook Reviews (see Appendix P, Figure 4). Rainbow Omega can analyze these reviews to understand how many students have participated in the event and gain a sense of their experience in the program.

Number of Volunteers: To also understand if this objective is achieved, Rainbow Omega should keep a count of how many volunteers participate in the program. The number of volunteers who participate in the program can also be compared to the number of sign-up forms received, as this helps determine the number of students who decided to act on the volunteer experience.

This is a sample of a graphic promoting the sign up link for the volunteer program.

Figure 22. Email of volunteer opportunities

This is an example email that the volunteer will receive when they sign up using the form.

Hello Jess,

Thank you for filling out our volunteer service form. We are always appreciative and looking for devoted people to come to spend time volunteering at Rainbow Omega. Based on our form, you would prefer to come on a Wednesday and Thursday to volunteer. Once you pick from our available dates below, we will provide you with the volunteer services currently for that day.

Our available options for the month of April would be:

Wednesday:

- April 6th,
- April 13th,
- April 20th.

Thursday:

- April 7th,
- April 14th,
- April 21st

If you have an idea of the volunteer service, you would like to do, please let us know. Some of our volunteer services are :

- Picking berries
- Creating berry packets
- Cleaning around the garden center
- Organizing the garden center
- Watering the plants
- Or performing other tasks on each day will be an option.

We look forward to hearing from you soon!

Blessings,

Tim Hedge

Rainbow Omega CEO

Figure 17. Rainbow Omega sharing stories

This is an example of Rainbow Omega sharing stories of the non-profit on Facebook.

Figure 1. Budget

This is a sample of the budget for the media plan and strategy.

Figure 2. Setting up screen account

Please continue reading below for steps about how to create this account.

These are the steps to create a Facebook ad. Before starting the steps, you must open your Facebook business Page on desktop or use the Facebook app on mobile.

Step One: Open Facebook Business page

Once you have the Facebook business page open, under the 'Create' tab, click on 'Ad.'

Step Two: Choose a Goal for the Ad

You will now choose a goal. Which means you can choose from, Get More Messages, Get More Website Visitors, Promote Your Business Locally, Promote Your Page, Boost Your Post, Build Your Business, Get More Customer Contacts, Boost an Instagram Post.

Step Three: Add your Creative

Your ad has three key components: visuals, text, and a call-to-action button. The visuals can be an eye-catching photo or a must-watch video about your business. The text should complement the image and lead your customers to take the action you desire. The call-to-action button directs people to take that next step.

Step Four: Define your audience

When you create a Facebook ad, think about the kinds of people who are most often attracted to your business, product, or services. Try to identify what they have in common and use that information to create an audience of other people like them. For Rainbow Omega, you are wanting to get more volunteers to provide service. You can put your audience location anywhere that you think you would get the best numbers from.

Step Five: Set your budget and duration

Decide how much you want to spend per day and how many days you want your ad to run. A daily budget is the average amount you will spend on your ad each day. For example, if you set a daily budget of $5 over the course of five days, you will be charged up to $25 total.

Step 6: Decide where you want your ad to appear

When you create an ad from your Facebook Page, you can select to have it appear on Instagram as well as Facebook.

Sample Email Media Pitch

Hi [JOURNALIST OR REPORTER NAME],

My name is [YOUR NAME], and I am [COMPANY POSITION]. I am writing on behalf of Rainbow Omega, located in Lincoln, NE. We are a non-profit that provides entertainment, food provisions, and multimedia for the public with benefits and potential disabilities—the nature of our non-profit leads to opportunities for individuals in the area to volunteer.

Our organization developed a volunteer program for high school and college students in Eatubrgo and surrounding areas which we believe could be intriguing to your audiences. This program primarily targets students at Oxford High School, Lincoln High School, Bell City High School, Jacksonville State University, Gadsden State Community College, and Jefferson State Community College.

As a member of your community, we want to spark coverage of this program to alert our neighbors and friends about the opportunity to volunteer and to encourage them to develop their leadership skills for the future and learn the importance of giving back to their community. Please let me know if you are interested in helping Rainbow Omega spread awareness about this opportunity to connect with your audiences. You can reach me at [CONTACT INFORMATION].

Thanks for your time,

[YOUR NAME]

Figure 1: Calendar of Timeline for Program Implementation

The Gantt Chart provided below is an estimate of the period it will take Rainbow Omega to implement this program. This chart also includes suggestions for what tasks should be completed each month and how long it will take to execute each task.

See next page

Figure 2: Survey Questions to Measure Objective One

Provided below are sample questions that can be used in the survey to measure the efficiency of how Rainbow Omega promoted the volunteer program. This also helps to measure the awareness of the program with the target audience.

Figure 3: Survey Questions to Measure Objective Two

Provided below are sample questions for the survey that can be used to measure the attitudes toward Rainbow Omega's volunteer program.

Figure 4: Example of Social Media Items for Content Analysis

The figures below are examples of how the public interacts with content on Facebook. To evaluate how the public is interacting with content, items such as the number of likes, shares, and comments should be noted. Also, the tone of comments is important to analyze for public opinion.

Figure 5: Survey Questions to Measure Objective Three

Provided below are sample questions for the survey to help measure how volunteers acted in the program. This allows the volunteers to describe what duties they conducted and if they would do the Rainbow Omega volunteer program again.

Figure 6: Facebook Revisace

The Facebook Review will help Rainbow Omega see what the volunteers have said about their experience. This is an example of a different organization and their review section. This review tab will need to be activated on Rainbow Omega's Facebook account.

Figure 1: Clubs and Organization Contact List

This is a list of contacts of people from both high schools and college that are active within student involvement

- High Schools

a. Lincoln High School

i. Lindy Smith- Secretary

• lsmith@rcboe.org

• 256-315-5295

b. Oxford High School

i. Heath Harmon- Principal

• heharmon.ohi@oxfoe.com

• (256) 241-5166

c. Pell City High School

i. Brittany McKinney- Beta Club Advisor

• brittany.mckinney@pellcityschools.net

• (205) 338-2250

• Colleges

a. Jefferson State

i. Sonja Williams – Advisor for Ambassadors

• recruiting@jeffersonstate.edu

• (205) 856-6054

b. Gadsden State Community College

i. Kelley Pearce – SGA advisor

• 256-549-8376

c. Jacksonville State University

i. Josh Robinson – Dean of Students

• Jrobinson6@jsu.edu

• 256-782-5491

•
