

To all interested residents:

Firstly, we would like to thank you all for the incredible support we have received. When we started this, we had no idea what people would think or how strongly they would feel. With the Royal Borough of Greenwich website showing 206 objections and 9 supporting I think the answer is clear!

Additionally, the website has had almost 1,000 views, the video well over 600 and this distribution list of supporters has reached almost 100. There are 83 members of the WhatsApp group.

Yesterday the BCER emailed residents showing their support for our actions. The email can be found on the website under "Useful Files". <https://blackheathpcag.com/>

The support of BCER is extremely welcome and we thank Tony Bugg and his team for their involvement. We will be working closely with them going forward.

We have engaged all required service providers and consultants and are confident we will be ready for the May 7th deadline.

There is one final thing we need help with, however. Of almost 100 recipients of this email, we have had pledges of financial support from 19. This is amazing and we are delighted with our progress.

We do not yet know what the full cost will be for this round of the process but given our estimates we are hopeful that, given more pledges, we might only need to call on people for 50-60% of what they have pledged at this stage.

We fully understand that there is a wide variety in people's ability to pay and we have no issue with those who feel unable to do so. We also understand that some people are far more impacted than others.

But if you can help us, we would love to get a pledge of financial support from you, we suggest up to £1,000 depending on ability to pay and impact of this scheme on you.

Thanks again for your support
