

What is a Home Guard³⁶⁵ Protection Plan?

A Home Guard³⁶⁵ Protection Plan is a comprehensive Integrated Pest Management Program (IPM) for your home. We customize a pest control program that is tailored specifically for you and your home while using a multitude of different industry leading treatments. We then apply those treatments four times a year for endless protection to your home.

- ✓ Inspection and Identification
- ✓ Consultation
- ✓ Application and Monitoring

HomeGuard³⁶⁵ Pest Protection Plan

After an initial inspection of your home is conducted and all problem areas are identified, our service technicians will begin with applying a primary pest barrier around the outside perimeter.

We only apply registered insecticides to the outside of your home, concentrating around the foundation wall, eaves and ornamental shrubbery and landscaping.

After completion of the primary pest barrier, we then come inside and apply a secondary barrier to sill areas and baseboards throughout the house for added protection.

In addition to protecting against most common household insects, we also install rodent stations around the outside perimeter and in some cases in the basement of your home for added protection.

What does a Home Guard Protection Plan Cover?

Our Home Guard³⁶⁵ Protection Plan covers most common household pests including but not limited to spiders, bees, roaches, ants, fleas, Asian ladybug beetles, boxelder beetles, rats and mice.

Some exclusions apply, please speak with one of our technicians for details.

Warranty

At Pied Piper Pest Control, we stand behind all our services. Our Home Guard Protection Plan is backed by a warranty all year long. If you ever have a problem between services, we will take care of it at no additional cost to you.
