

Monthly Newsletter

December 2019

November was such a great month for all our classrooms. We rearranged layouts to keep things interesting for the children, we added many new exciting materials to our centers in the classrooms, and each class dove into their own unique learning project based on the children's interests!

In our Preschool/Kindergarten classroom November was such an exciting month of exploring, learning, and working on our pets interest. We went fishing in the preschool pond, explored play in a Vet Clinic, and also enjoyed the addition of many games and puzzles in our classroom. We also had our first classroom visitor, Susan, from CanLearn who is with us for a 4-week program where she reads to our children and then the kids are gifted with a book at the end!

Our Toddler classroom is diving into all kinds of fun activities around vehicles. We took a trip in a Hot Air Balloon, did all kinds of active learning exercises that are art and constructive in nature, and we implemented some enhancements to our daily routine, including daily circle time, which the toddlers are loving. Ms. Olivia and Ms. Jessirae facilitated many interesting sensory bins and this month we saw exciting leaps of growth in many developmental domains for the children.

The Infant classroom, for our smaller toddlers, has officially been open a month now! Wow time flies. Our little ones have been working on their motor skills and their sensory exploration with an integration of emotional development and colors. We often have the foam blocks out for climbing on and the little ones are becoming fast friends.

Happy Holidays from your Family at Right Start

Reminders/Special Dates
