Project Profile 3: Animal Feed Processing Unit

Product Category: Animal Feeds

Project Capacity: Input Capacity of 5MT per Hour

Operations: 300 days a year with 8 to 12 hours per day

End Products (Bulk Packaging):

- Cattle Feed
- Poultry Feed
- Aqua/ Fish Feed

Raw Materials: In general, the major raw materials that are used as ingredients for preparing animal feeds include maize, wheat, bajra, corn, soybean, oil cakes, sugarcane, oil seeds and rice bran, Soybean followed by rapeseed, groundnut, de-oiled rice bran, sunflower meal, cottonseed cake, wheat bran and some non-vegetarian sources. By virtue of advancements in Technology, Feed Software is available and updated regularly to formulate Raw Material composition and pricing of ingredients

Gross Margin/ Payback: 50%+/ 2.5 years

Though the Animal Feed segment is not a high fancy industry, but the margins generated are constant throughout the lifetime of project.
