How to trade fundamental with tectical analysis

Here i will show you how to trade this both

I will not waste my time writing table of contents and so forth.will straight forward with tool and every thing a will need to have

For more info you can dm me on telegram on 067 250 4130

Which brokers I should use

This is one of the secrets traders hide as I also hide mine but only traders that will DM me will know which broker is good for trading writing this brokers here incase they find out that we use them they will manipulate the meta platform like others do.

Make sure you DM me on telegram or WhatsApp for that brokers and the setups on the account on what leverage to use and so on.

Now let's begin with fundamental trading in according to my strategy I trade fundamental on M15 time frame 3-5 minites before the news release

This is the beginner guide guys to minimise the risk. For advance trading contact me.

We set 100 pips on pending orders and stop losses

Let's say is **USD** pair to release news at 15:30

Current price is **1.19750 usdjpy**

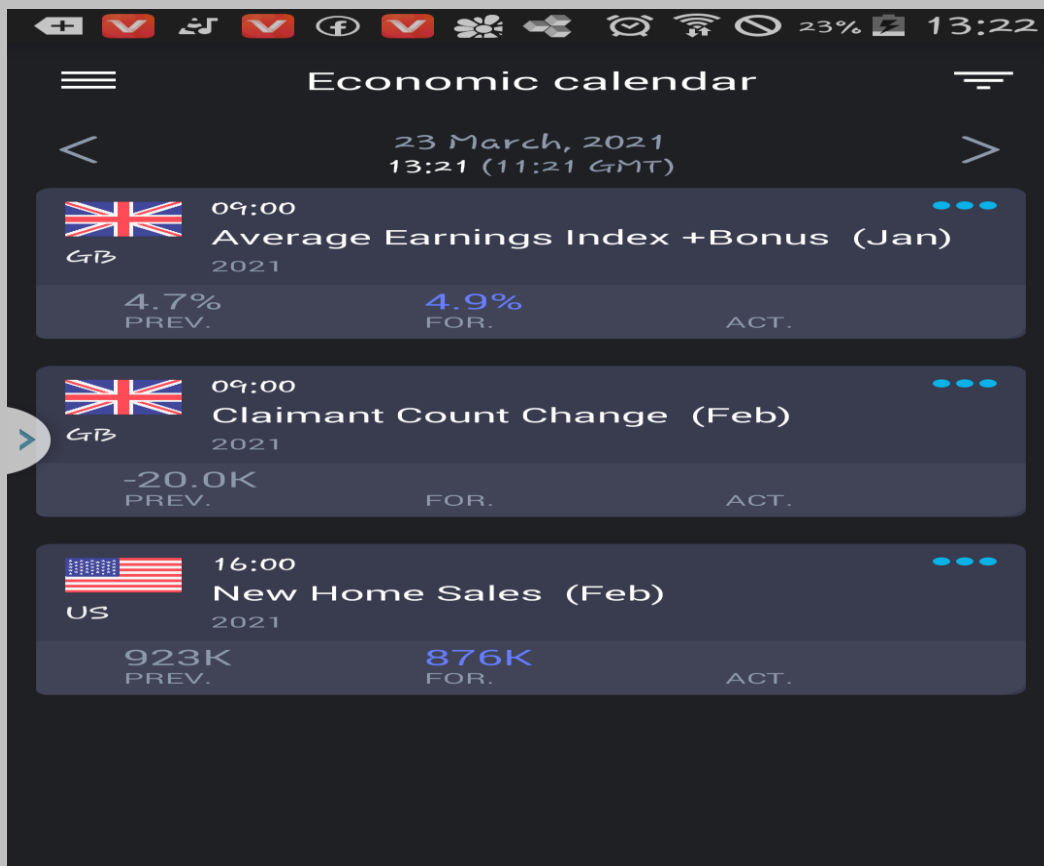

We then place buy stop @**1.19850** sl@ **1.19750**

Again we place sell stop @**1.19650** [sl@1.19750](#)

If you can count the pips used is 100 pips. Both sell and buy stops even on stop losses.

At all time note that we use only high votide news that have 3bulls or 3 stars depending on your source one is using.

Below is the example of news events we use

This is the news we focus on as you can see it has 3 dots on your right corner and please note that the event must show previous results then Focused and will be waiting for the actual results. If you are in South Africa your time zone must be +2 this can be changed in app settings

Currency we focused on

USD

GBP

JPY

AUD

CAD

NEWS TO CONSIDER MOST

Interest rate

Gdp

Employment change

FOMC and NEW

Before news release most of the time forex goes to consolidati

on

As you can see on pic above showing consolidation

Then again there is something we so call gaps please see the example below

News often cover or fill the gaps after news release I don't mean to say always trade to fill gaps but most likely to fill.

You can back test most news releases and see what am talking about anyway for further information on this fundamental trading please contact me I have videos that will direct you on every steps you might need.
