## **LAURENTIA CRYSTAL ENGERGY**

**After approximately 40 years of working with nature – both with animals and crops – and observing the energy connection between man-made electromagnetic pollution and nature, we felt we had to develop a product that would bring our knowledge into supporting animal life, crop and soil enhancement, as well as human health.**

**We developed a large egg-shaped crystal that we program with Radionics. This product can cover up to 500 acres to enhance animal and soil health. In poultry facilities there is little to no smell, dust, or flies. This also applies to swine and dairy.**

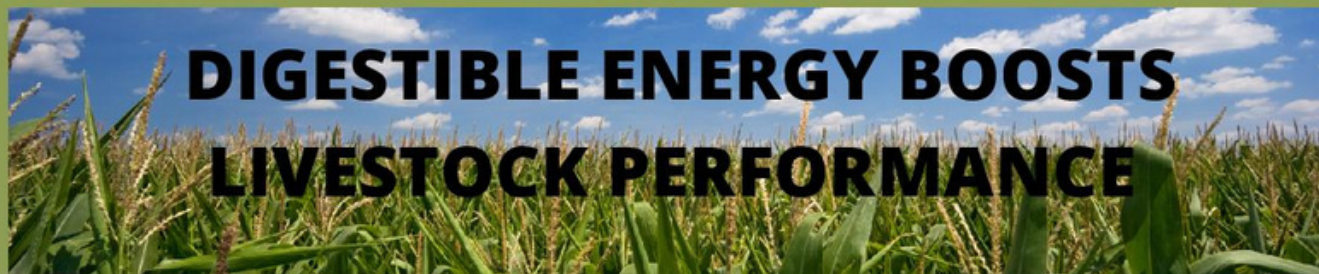

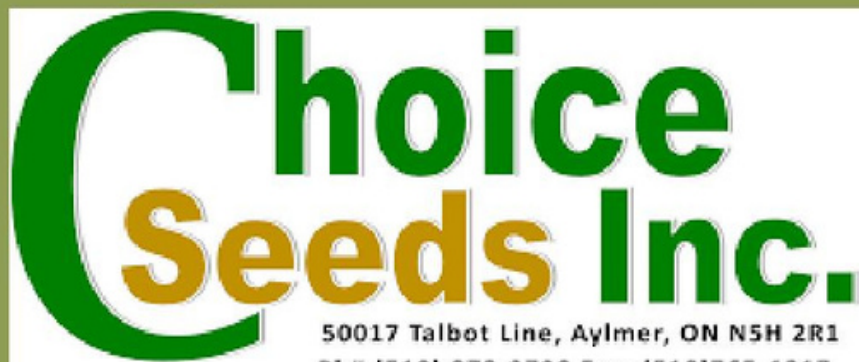

**We are able to enhance vitamins, minerals, and amino acids. We put in the frequency of nitrogen, which increases the nitrogen in the manure. As all greenhouse gases in livestock are created from the food they consume, we are able to harvest them and return them to the soil as carbon. Where food crops are concerned, higher quality and increased weight is seen with less or no insect damage. Finally, higher oxygen is found in soil and water.**

**Another product we offer is the HOME PROTECTOR. This provides life-aiding frequencies. It is used in the home and puts a "protective bubble" around the home in order to protect all life from harmful effects of man-made electricity.**

**Lastly, we developed a product we call the BODY PROTECTOR. It is a round, flat pendant that is designed to be worn throughout the day to assist in your health and wellbeing while outside the home.**

**For more information, contact Peter @ 613-258-4896 or  
prcwbb@magma.ca.**

**Exceptional Silage Corn Verified** - KingFisher corn had the highest milk per ton in the standard corn silage division of the 2021 Forage Analysis Super Bowl. KingFisher corn won Grand Champion of the standard corn silage division of the Forage Analysis Super Bowl three years in a row—2018-2020. KingFisher corn won the Quality Counts corn silage category of the 2020 Forage Analysis Super Bowl. KingFisher silage corn brings these benefits to your livestock operation:

- SoftStarch—Highly-digestible starch, excellent rumen retention and digestibility
- FiberGest—High sugar and stalk density means high quality corn silage (Average NDFD30 of the KingFisher corn finalists in the last two years at the Forage Super Bowl was 61%)
- Agronomics—Top-notch agronomics paired with ear flex and stalk expansion means more digestible starch and fiber harvested per acre

Plant a Winner.

## QUALITY EQUIPMENT AT A FAIR PRICE WITH A CUSTOM ATTITUDE

At HFL Fabricating, we manufacture equipment for YOU!  
Take a look at our ever growing line up of machinery.

If we don't have exactly what you are looking for, just give us a call and  
we'll design and engineer something that suits your needs.

Our services include:

- plastic welding
- welding supplies
- CNC Plasma cutting

26847 Kerwood Rd , Kerwood ON NOM 2B0
