# Smart Access

by cohesion

CMAC COMMUNICATIONS

| Introduce flexibility | Modernize your access experience | Unified monitoring portal for multiple systems | Predict occupancy |

Simplify Security and Modernize Your Access Experience

Cohesion's cloud platform transforms employee access to the workplace by consolidating credentials, card readers, and user profiles into a single interface, eliminating the hassle of managing multiple PACS and keycard systems. It seamlessly integrates with existing infrastructure, avoiding costly capital investments. This solution offers quick, secure access for employees and visitors and includes popular digital features like a mobile app and digital wallet, enhancing user convenience and experience.
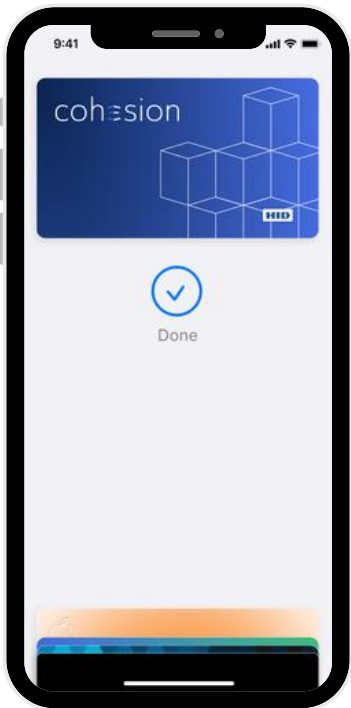

Drive efficiency with comprehensive features to automate the entire security workflow from security teams to end users

Cloud Access Portal

Issue keycards, assign access credentials to building spaces via an integration with multiple Access Control Systems across your Enterprise. Simplify onboarding / offboarding by connecting to active directory or SSO.

Digital Wallet

Fast and easy access from your iPhone, Android phone, and wearables, even when devices are turned off. Touchless access to all spaces and places within your office – parking, doors, turnstiles, elevators and office suites. Simply wave mobile devices at keycard readers equipped with Bluetooth/NFC radios.

Elevator Call

Expedite arrivals and reduced wait time frustrations with connected mobile elevator calls. Remove extra touch-points throughout the employee experience by designating an arrival floor based on individual clearances.

Keycard Management

Manage all keycards from a single portal.
- *Physical Keycards:* Standardize card formats across spaces, servers, and PACS for issuance of one keycard.
- *Mobile Keycards:* Issue multiple digital credentials . Access multiple credentials, locations and systems in one place for entry that's seamless.

Integrated Visitor Management

Offer a streamlined and secure method to organize guest visits effortlessly. Hosts can schedule and manage visitors remotely, at any time, ensuring flexibility and convenience. Upon scheduling, guests receive a personalized email invitation that includes a time-specific access credential.

OccupancyAI

Enhance decision-making with AI-powered occupancy insights. Predict people and space utilization up to two weeks in advance, understanding group interactions with various spaces. Insights to improve operational efficiency, enhance workplace experience, and reduce costs. With OccupancyAI, you're not just planning; you're staying ahead.
